Mixed Movements Official Data
Darien Province, Panama-Colombia Border

January - February 2024

Context

Darien is Panama's largest and poorest province. Bordering Colombia, the province hosts a 60-mile-deep jungle, the only breaking point of the Pan-American highway, linking the continent from south to north. Despite being one of the most dangerous jungles in the world, Darien is a transit location for thousands of refugees and migrants, most of them coming from Venezuela, Ecuador, Haiti, and African and South Asian nations.

Panama's unprecedented mixed movement crisis has been ongoing for over two years. According to National Migration Service (SNM) published statistics, from 2021 to 2023, nearly 900,000 people crossed through this area.

Irregular entries through Darien 2023-2024 (in thousands of people)
UNHCR, the UN Refugee Agency, collects monthly information on the characteristics, vulnerabilities, and protection needs of refugees and migrants who enter Panama through Darien. The information is compiled through individual interviews conducted in Panama's Darien and Chiriquí provinces. The preliminary results presented are indicative and should not be interpreted as representative of the total population of refugees and migrants crossing the border through the Darien jungle.

### Nationality of interviewed individuals

Other nationalities include: Cuba, Jamaica, Peru, Syria, and Zimbabwe.

**Notes:**

- Interviews in January 2024
- ETRM San Vicente: 31 interviews
- ETRM Lajas Blancas: 74 interviews
Nearly seven in ten interviewed refugees and migrants were from Venezuela (68%). Thirty seven percent of them came directly from Venezuela, a slight decrease compared to last month, while the remaining 67% came from other countries of residence, mainly Colombia (36%), Peru (15%), and Ecuador (11%).

More than half of participants (57%) had applied for legal status in their previous country of residence, and half of them reported having valid documentation from that country.

Over two-thirds of respondents (68%) reported travelling with family, and nearly one-fifth (18%) reported travelling alone or with unrelated companions. Those travelling with children had an average of 2 children, most of which were under five (90%). Additionally, one childbirth was registered in the jungle this year.

One in three respondents (35%) travelled with at least one person with a specific need. In February, there was a slight increase in the number of people travelling with survivors of abuse (9%).

50% reported risks if they had to return to their country of origin/residence.

Main reasons for leaving country of origin
- Violence and insecurity: 61%
- Access to employment: 57%
- Access to food: 21%
- Access to healthcare: 19%
- Attacks, threats or intimidation: 11%

Main reasons for leaving country of residence
- Violence and insecurity: 57%
- Access to employment: 40%
- Access to food: 16%
- Access to healthcare: 16%
- Attacks, threats or intimidation: 5%

Reasons for choosing destination country
- Economic opportunities: 50%
- Family reunification: 40%
- Fresh start: 29%
- Job offer: 3%
- Other: 5%

Most common reasons reported under “Other” include seeking protection and safety.

This figure likely represents an underestimation of these incidents.

Out of 63 respondents that had lived in another country.
91% of interviewed individuals reported the United States as their final destination. Followed by Canada (3%), Mexico (3%), Costa Rica (1%), Panama (1%), and Venezuela (1%).

8 in 10 interviewed individuals reported that if they were unable to reach their country of destination, they would wait until allowed to proceed to said country.

5 in 10 interviewed reported receiving information about the journey and making decisions based on the information received from friends and relatives who had already made it. Also received information through social networks, mainly TikTok (31%) and Facebook (25%).

29% of interviewed Haitians, and Venezuelans reported not receiving information about the new entry requirements to the United States.

91% of interviewed individuals reported the United States as their final destination.

*Those who reported seeing cadavers, saw between 1 and 7 cadavers during the seven days before data collection.

Main needs for the continuation of the journey

Cash
The lack of access to financial service providers in transit communities and the ETRMs.

Information
A lack of timely and detailed information about the transfer services to Costa Rica, including the increase in bus fares from $40 to $60.

Drinking water
Concerns about the quality and safety of drinking water available at the ETRMs.

Healthcare
Increased number of families travelling with children with disabilities. Lack of specialized healthcare, adequate installations, and mobility aids at the ETRMs.
