The High Commissioner for Refugees is mandated by the United Nations to lead and coordinate international action for the worldwide protection of refugees and the resolution of refugee problems. Its primary purpose is to safeguard the rights and well-being of refugees. In its efforts to achieve this objective, the Office strives to ensure that everyone can exercise the right to seek asylum and find safe refuge in another State, and to return home voluntarily. By assisting refugees to return to their own country or to settle permanently in another country, UNHCR also seeks lasting solutions to their plight.

UNHCR’s Executive Committee and the UN General Assembly have authorized involvement with other groups. These include former refugees who have returned to their homeland, internally displaced people, and persons who are stateless or whose nationality is disputed. The Office seeks to reduce situations of forced displacement by encouraging States and other institutions to create conditions which are conducive to the protection of human rights and the peaceful resolution of disputes. In all of its activities, it pays particular attention to the needs of children and seeks to promote the equal rights of women and girls.

The Office carries out its work in collaboration with many partners, including governments, regional organizations, and international and non-governmental organizations. It is committed to the principle of participation, believing that refugees and others who benefit from the Office’s activities should be consulted over decisions which affect their lives.
The Global Report presents the work carried out by UNHCR in 2020 to protect and improve the lives of tens of millions of people of concern—refugees and asylum-seekers, returnees, internally displaced people, stateless persons, and others of concern. It highlights the year’s achievements, as well as challenges faced by the organization and its partners, in responding to multiple life-threatening crises and ever-growing humanitarian needs.

The Global Focus website is UNHCR’s main operational reporting platform for donors. Regularly updated, it complements and augments information in the Global Report with greater detail on UNHCR operations, data on key operational themes and objectives, and in-depth information on UNHCR’s budgets, funding and expenditure. It contains also a glossary of technical terms used throughout this publication.
An unprecedented response in an unprecedented year

If you have no reserves to fall back on, you have no resilience in a crisis. When the COVID-19 pandemic shocked the world in 2020, refugees and other people of concern to UNHCR were among the most vulnerable. For them, the most basic advice was often impossible to follow. “Don’t travel.” “Stay at home.” “Keep your distance.” “Get tested.” “Wash your hands frequently.” “Study or work online.”

COVID-19 meant UNHCR’s mission to protect and assist refugees was suddenly mired in an unprecedented emergency, and in a context where travel was difficult and physical contact all but impossible. The borders refugees must cross to reach safety were abruptly closed to stem the spread of the disease. Forcibly displaced people risked being excluded from the COVID-19 response, impoverished, evicted, unfed and unable to travel to seek safety or return home. Resettlement, already straining to keep pace with a historic decade of displacement, was squeezed further by the pandemic, with the fewest departures since 2002. There were fears for a worsening of the plight of stateless persons.

And yet, UNHCR had started 2020 on a positive note. The international community had come together for the first Global Refugee Forum in December 2019, making more than 1,400 pledges that would put the Global Compact on Refugees into operation, a manifestation of the whole-of-society approach to respond to forced displacement.

UNHCR had also completed its regionalization and decentralization process, a significant component of an ambitious reform agenda. It aimed to improve delivery, giving more authority to the field while maintaining and strengthening risk management and appropriate controls.

And how important those pledges and reforms were. When COVID-19 hit, most States found practical solutions to enable protection from persecution and from the pandemic. Some States, particularly in Africa, worked closely with UNHCR to ensure they could uphold their international legal protection obligations to even large numbers of refugees, while shielding their own citizens from the disease. Their leadership and solidarity have been exemplary.

Alongside our international, national and local NGO partners, UNHCR stayed and delivered vital protection activities and services and, critically, bolstered host State health systems and provided cash assistance, shelter and other support to help mitigate the most immediate impacts of the pandemic on the displaced and host communities.

Yet COVID-19’s impact has gone far beyond health and has driven millions of refugees into deeper poverty and despair. Often reliant on daily wage jobs or informal employment, they were among the first to lose out in lockdowns, with poverty rates amongst refugees soaring. And the consequences have been grave, especially for women and children. Gender-based violence has increased, as has domestic violence and early child marriage. Refugee children, especially girls, were already less likely to attend school than their host counterparts, had less access to remote learning opportunities, and are less likely to return to school after the pandemic. Mental health needs have grown faster than the response can manage.

While COVID stopped many things, it did not stop conflict. Old conflicts persisted or even reignited and new ones erupted, increasing the number of displaced as the year went on. Brutal killings were meted out in Mozambique. Conflict, which included sexual violence, engulfed Tigray in Ethiopia. The scourage of gang violence in parts of Central America drove more people — including children — into exile. The people of the Sahel continued to be plagued and persecuted by conflict and climate change, forcing more and more away from their homes.

UNHCR and partners were determined that the pandemic would not stop them protecting and assisting record numbers of forcibly displaced and stateless people around the world, with by year’s end more than 91.9 million people of concern — refugees and asylum-seekers, returnees, IDPs, and stateless persons. And despite the challenges of conflict, the pandemic and paralysis on political progress on most conflicts, UNHCR has continued to search for solutions so that men, women and children can stop living in a state of uncertainty and instead make the most of their potential. For example, at the behest of South Sudan and Sudan and under the stewardship of IGAD, the Intergovernmental Authority on Development, UNHCR is developing a solutions strategy that could help resolve displacement for up to 7 million people in and from the two countries. This has the potential to end the plight of millions of people, but it needs the support of the international community to strengthen peace and security efforts and provide resources to develop the countries, including areas where the displaced will live.

Despite the global economic challenges brought on by COVID, solidarity with and for refugees persevered. The major host governments, themselves often relying on fragile health systems, did not hesitate to include refugees in their health responses. Donors funded a large percentage of our COVID-19 response and, led by the United States of America, Germany and the European Union, responded with an unprecedented overall financial contribution to our budget of over $4.7 billion, including generous levels of unearmarked funding from donors such as Sweden, España con ACNUR, and the United Kingdom.
The World Bank and international financial institutions took drastic measures, including rapidly providing around $1 billion of grants instead of loans for refugee-hosting countries. The private sector, including contributions from innovative Islamic financing mechanisms, contributed $337.5 million and shared its valuable expertise to improve our worldwide response.

This was an unprecedented response to an unprecedented year and helped us carry out our mandate around the world.

Support also steadied our resolve to see through our ambitious reform agenda. The pandemic forced acceleration in a number of areas, including streamlining processes and partnerships to enable greater flexibility and improved delivery of assistance. And the global uprising against racism and social justice gave us pause and prompted reflection on our shortcomings and biases, unconscious or not. This led to sometimes painful, yet necessary, internal discussions on race and action to address and resolve.

With funding shortfalls for UNHCR and progress on resolving conflicts, combined, there are unfortunately more forcibly displaced people than ever before. Despite the many achievements of 2020, the world is still a dangerous place and we cannot afford to become complacent. The climate emergency, which threatens to undo decades of progress, requires multilateral cooperation and action to address and resolve.

At heart, UNHCR’s mission is about compassion and humanity. That simple truth is easily drowned out by the din of social media or lost in political arguments. In the Special Envoy of the UN High Commissioner for Refugees, Angelina Jolie, UNHCR has a high-profile champion whose inspiring and focused advocacy can cut through the noise and bring the conversation back to solutions for refugees.

On World Refugee Day, in an article for Time magazine, she urged Americans to look beyond borders and see the fight for rights and equality as universal, and asked governments to work towards durable settlements to the world’s conflicts. The article cited UNHCR data on displacement, while an accompanying video helped spotlight the plight of refugees in Bangladesh and Myanmar, with UNHCR staff briefing the Special Envoy on day-to-day challenges they encounter. She addressed the UN Security Council on sexual violence against children—highlighting Iraq’s Yazidi minority and challenging Member States to do more for survivors. At a UNHCR-UNICEF roundtable, co-hosted by Canada and the United Kingdom, she urged governments to invest in educating refugee children.

Although COVID-19 made travelling almost impossible, the Special Envoy remained informed and engaged, making a virtual visit to UNHCR’s Yemen operation in December and learning about the challenges that both the displaced and UNHCR staff on the ground are battling on daily basis, and speaking to UNHCR field officers in the Bolivarian Republic of Venezuela about the impact of the pandemic on their work.

Separately, during a virtual design competition and fashion show organized by UNHCR’s Kenyan partner RefuHE, the Special Envoy reunited virtually with a Congolese refugee she had met three years before and who had since been resettled to the United States of America. In October, the Special Envoy joined U.S. Representative Chrissy Houlahan for an online conversation on combatting gender-based violence, and the following month she addressed the Republic of Korea’s conference on Action with Women and Peace, demanding an end to impunity for gender-based violence and sexual violence in conflict. Her poignant op-ed in the Financial Times invited readers to consider the context and complexity of UNHCR’s work, and to support refugees with respect and understanding as well as donations.
UNHCR IN 2020

To protect and assist 91.9 million people of concern in 132 countries and territories,

UNHCR's budget was $9.131 billion
It received $4.776 billion in contributions
Its expenditure was $4.838 billion

People of concern 2015-2020

UNHCR was present in 132 countries and territories with offices in 520 locations

KEY RESULTS IN 2020

Safeguarding fundamental rights

REGISTRATION
9.2 million individuals (5 years and above) with biometric records in PRIMES. Target: 10 million 2019 result: 8.8 million

ASYLUM APPLICATIONS
115,800 Individual asylum applications processed by UNHCR. Projection before COVID-19: 120,000, 2019 result: 120,400

CHILD PROTECTION
45,974 best interests assessments conducted. Target: 48,451 2019 result: 56,091

Responding with life-saving support

EMERGENCY AND CORE RELIEF ITEMS
600,000+ people of concern received core relief items in emergency-affected countries. Target: 600,000 2019 result: 600,000

CASH ASSISTANCE
$695 million of cash assistance delivered to people of concern across all operations. Target: $585 million 2019 result: $650 million

SHELTER
249,000 people of concern lived in 2 refugee housing units. Target: 250,000 2019 result: 219,000

Building better futures

EDUCATION
1.7 million children enrolled in primary education. Target: 1.9 million 2019 result: 1.476 million

RESSETTLEMENT
22,800 UNHCR-facilitated resettlement departures. Target: 70,000 2019 result: 63,726

ENERGY AND ENVIRONMENTAL PROTECTION
1.7 million people of concern had access to a sustainable source of electricity. Target: 2.5 million

UNHCR GLOBAL REPORT 2020
The data are generally provided by Governments, based on their own definitions and methods of data collection. A dash (“-“) indicates that the value is zero, not available or not applicable. All data are provisional and subject to change. More information on people of concern to UNHCR in 2020, including statistical trends and changes of global displacement during the year, can be found in the 2020 Global Trends report.

- Refuges include groups of persons who are outside their country or territory of origin and who face protection risks similar to those of refugees, but for whom refugee status has, for particular or other reasons, not been acknowledged.
- Asylum-seekers are persons who are not considered as refugees under the operation of the law of the country in which they are present. Regardless of status, Venezuelans displaced abroad require protection against forced returns, and access to basic services. UNHCR and the International Organization for Migration work together with this population by leading the Regional Inter-Agency Coordination Platform, which is aimed at strengthening coordination, including information on people of concern to UNHCR in 2020, including statistical trends and changes of global displacement during the year, can be found in the 2020 Global Trends report.

- Internally displaced people (IDPs) are people who are outside their country or territory of origin and who face protection risks. IDPs who are in IDP-like situations.
- Returnees refer to persons who have returned to their place of origin during 2020. Source: country of origin and asylum.
- Stateless persons refer to persons who are not considered as nationals by any State under the operation of its law. This category also includes persons with undetermined nationality. The figures reported include statespersons who are also considered as refugees, asylum-seekers, IDPs, or others of concern to UNHCR. UNHCR’s statistical reporting generally follows a methodology that counts only one legal status for each person of concern: however, due to the extraordinary size of the displaced populations, this methodology is known to under-report the actual size of this population group as both displaced and stateless. Additional stateless refugees, asylum-seekers, and IDPs will be reported on as UNHCR continues to review and improve its reporting on related persons with a dual status.
- People of concern to UNHCR not included in the other categories but to whom UNHCR may extend its protection and/or assistance.
- Venezuelans displaced abroad refer to persons of Venezuelan origin who are likely to be in need of international protection under the 1951 Convention and its 1967 Protocol, but who have not applied for asylum in the country in which they are present. Regardless of status, Venezuelans displaced abroad require protection against forced returns, and access to basic services. UNHCR and the International Organization for Migration work together with this population by leading the Regional Inter-Agency Coordination Platform, which is aimed at strengthening the protection determinations and consistent response across the region in line with human rights standards.

GLOBAL STRATEGIC PRIORITIES 2020-2021

The Global Strategic Priorities (GSPs) for the 2020-2021 biennium set out areas targeted by UNHCR to enhance protection for people of concern and find solutions for them. The GSPs are divided into two categories: “operational priorities” for field operations and “support and management priorities” for core organizational functions. The operational priorities influence the development and implementation of country-level plans by field operations. The GSPs are in line with the 2030 Agenda for Sustainable Development and reflect UNHCR’s 2017-2021 Strategic Directions and commitments made at the World Humanitarian Summit, including under the Grand Bargain.

This year for the first time, the Global Strategic Priorities are fully integrated into the Global Report, and reporting on UNHCR’s achievements and challenges across all GSP areas in 2020 can be found in the thematic chapters of the Global Report.

FAVOURABLE PROTECTION ENVIRONMENT

1. Safeguarding access to territorial protection and asylum procedures, protection against refoulement; and supporting the adoption of nationality laws that prevent and/or reduce statelessness (Legislation on refugees, Law and Policy on IDPs and Legislation on statelessness)

<table>
<thead>
<tr>
<th>IMPACT INDICATOR</th>

- 120 Acronyms

---

## SUPPORT AND MANAGEMENT GSPs

### 1. FINANCIAL ACCOUNTABILITY AND OVERSIGHT

#### NARRATIVES in the chapter on Funding UNHCR’s programmes

- UNHCR strengthens and enhances its financial management and reporting systems and applies effective financial control.
- UNHCR monitors and discloses its accounts in compliance with the International Public Sector Accounting Standards (IPSAS).
- UNHCR implements robust financial controls and business processes in support of value and accountability in delivery of cash assistance.
- UNHCR simplifies and harmonizes its partnership arrangements and enriches a greater share of resources to local partners.

#### INDICATOR | RESULTS
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>UNHCR’s annual financial statements included a statement of internal controls for the first time.</td>
<td></td>
</tr>
<tr>
<td>UNHCR closed its 2019 accounts and obtained an unqualified opinion from an audit conducted virtually due to COVID-19.</td>
<td></td>
</tr>
<tr>
<td>UNHCR supported digitalization of new payment mechanisms and secure and direct cash delivery.</td>
<td></td>
</tr>
<tr>
<td>$1.455 billion went to 1,143 partners, including 728 national NGOs. 28% of operational programme expenditure went to local/national responders (above 25% Grand Bargain commitment).</td>
<td></td>
</tr>
</tbody>
</table>

### 2. INTERNATIONAL PROTECTION

#### NARRATIVES in the chapter on Safeguarding fundamental rights

- UNHCR strengthens global protection and solutions capacity and responds to direct operational needs, enhanced monitoring and partnerships.
- UNHCR enhances promotion of gender equality and women’s accountability to people of concern at global and operational levels.
- UNHCR's data and information management approaches, including storing, sharing and using personal data, respect protection practices and privacy and national development frameworks.

#### INDICATOR | RESULTS
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>UNHCR issued operational guidance on risk communication and use of expert input, and operational guidance and a guide for sector managers on accountability to affected people</td>
<td></td>
</tr>
</tbody>
</table>

### 3. PROTECTION AND SOLUTIONS

#### NARRATIVES in the chapters on Safeguarding fundamental rights and Responding with life-saving support

- UNHCR in close collaboration with States, international development and humanitarian actors and other relevant actors supports and advocates in favour of national, regional and global protection frameworks and capacities.
- By partnering, supporting national systems and institutions, and implementing comprehensive approaches, UNHCR strengthens the protection of displaced and stateless persons.
- By supporting, technical leadership to the UN Common Cash Working Group.

#### INDICATOR | RESULTS
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>UNHCR advocated for greater access to the 1951 Refugee Convention and 1967 Protocol. Despite COVID-related court closures, UNHCR intervened as a third party in 18 cases in 10 jurisdictions.</td>
<td></td>
</tr>
<tr>
<td>UNHCR co-chaired the Protection Cluster task team on anti-trafficking in humanitarian action, and issued the “Introductory guide to anti-trafficking action in internal displacement contexts”</td>
<td></td>
</tr>
</tbody>
</table>

### 4. USE OF DATA AND INFORMATION

#### NARRATIVES in the chapter on Transformative initiatives

- UNHCR partners manage and use data and information to enable evidence-based actions, programme design and decisions.
- UNHCR supports the submitted cases of 28,500 refugees for resettlement to 26 countries, representing a decrease of 48% when compared with the previous year.

#### INDICATOR | RESULTS

5. HUMANITARIAN COORDINATION

**NARRATIVES** in the chapter on Transformative initiatives

**INDICATOR**
- Effective coordination and leadership is established for refugee responses and for UNHCR-led clusters at the global and operational levels.

**RESULTS**
- UNHCR led 28 of 52 field protection clusters’ cluster-like mechanisms.
- GRC members visited Burkina Faso, Ethiopia, Iraq and Sudan.
- The Global CCM Cluster supported 23 clusters cluster-like structures (15 UNHCR-led or co-led). In Shelter, UNHCR led 16 country clusters and 10 coordination mechanisms.

- UNHCR combined coordination and leadership with field operations, emphasizing accountability, collaboration and government relations. An Operational Data Review covered collected analysis, and use of data disaggregated by age, sex, disability, and other diversity considerations.

6. PROGRAMME AND RESULTS-BASED MANAGEMENT

**NARRATIVES** in the chapter on Transformative initiatives

**INDICATOR**
- UNHCR’s strategies are informed by improved joint needs assessments and developed and implemented in consultation with key stakeholders, including national authorities, civil society, development partners and private sector representatives.

**RESULTS**
- UNHCR finalized design of its Results-Based Management Framework for multi-year strategic planning, aiming to engage stakeholders throughout the programming cycle and support SDG goals.

- UNHCR mobilized diverse strategic partnerships through active engagement with key stakeholders, including multilateral partners, governments, non-governmental organizations, the business sector, media, and the private sector.

7. CASH ASSISTANCE

**NARRATIVES** in the chapter on Responding with life-saving support

**INDICATOR**
- UNHCR has the systems, tools, skills and processes needed to manage and scale cash assistance programs in an accountable manner.

**RESULTS**
- UNHCR distributed $485 million to 8.2 million people. Refugees in 47 countries got digital payments; Over 65 operations launched cash initiatives and expanded or adapted cash assistance.

- UNHCR worked towards the UN Common Cash Statement in the seven focus countries, which have launched joint procurement for core relief items.

- UNHCR supported cash distribution initiatives and joint post-distribution monitoring.

8. EMERGENCY PREPAREDNESS AND RESPONSE

**NARRATIVES** in the chapters on Safeguarding fundamental rights and Responding with life-saving support

**INDICATOR**
- UNHCR has stocks of core relief items to provide emergency support in 41 countries and dispatched within 72 hours.

**RESULTS**
- UNHCR maintains active standby capacity. UNHCR and partner personnel, with appropriate leadership, coordination and protection skills, are available for immediate deployment to emergency operations.

- Representation of local and national partners and communities is increased in preparedness action planning.

- UNHCR applies a proactive approach to security management, with a qualified security workforce, security training and support to emergencies.

- UNHCR has global stockpiles set aside: UNHCR sets aside 683,000 people within 72 hours. UNHCR carried out 22 airlifts and added an eighth global stockpile in Panama.

- UNHCR continued to deploy 10,000 security personnel.

- Some 722 UNHCR staff and partners were trained in emergency management, leadership with security management, and awareness, situation emergency, and inter-agency emergency operations.

- UNHCR undertook security missions to Dizpora, Mozambique, the Sahel and elsewhere, and responded to 298 security incidents. Around 3,500 UNHCR and 500 partner staff received security training.

9. HUMAN RESOURCES

**NARRATIVES** in the chapter on Transformative initiatives

**INDICATOR**
- UNHCR analyzes talent requirements to improve strategic workforce planning, taking into account diversity and gender balance.

**RESULTS**
- UNHCR provides learning opportunities and performance reviews to support career management, informed by the operational demand for staff.

- UNHCR uses efficient human resources systems and a fair and transparent appointment framework to ensure diversity and gender balance in the deployment of qualified personnel, particularly in emergencies and high-risk operations.

- UNHCR’s operations observe standards of occupational health and safety.

10. MOBILIZATION OF SUPPORT

**NARRATIVES** in the chapters on Funding UNHCR’s programmes and Global communications

**INDICATOR**
- UNHCR increases its funding from public and private sources.

**RESULTS**
- UNHCR raised $5.04 billion from government donors, including Japan's $40 million in unrestricted funding. Private sector fundraising raised an unprecedented $137.5 million, $224.4 million uncommitted, an overall 27% growth in income and above the ambitious $500 million target.

- UNHCR redoubled efforts to collaborate with development banks, agencies and governments. UNHCR reached 82 or devered work for refugees and host communities. UNHCR set horizontal country-level collaboration, and UNHCR on integrating displacement into development initiatives.

- Goodwill Ambassadors and high profile supporters with 177 million followers brought record social media engagement. Posts on World Refugee Day reached 132 million via the #WithRefugees coalition.

- UNHCR maintained positive, strategic relations with nine National Partners, with a new National Partner in Switzerland. Equipe con ACNUR contributed a record $10 million to UNHCR.
Funding UNHCR’s Programs

This chapter presents an overview of UNHCR’s budget, expenditure and income in 2020. More detailed information can be found in WinterFocus, UNHCR’s main operational reporting platform.

UNHCR’s final 2020 budget was $8.668 billion. The increase was the result of two supplementary budgets totaling $463.7 million which were added during the year. Expenditure totaled $4.838 billion leading to an implementation rate (expenditure totalled $4.838 billion leading to an implementation rate) of 89.5%. Taking into consideration the date-related” reserve and adjustments, the final year’s expenditure reached $4.837 billion.

At its 70th session in October 2019, UNHCR’s Executive Committee approved an original global needs-based budget for 2020 of $8.668 billion. At its 7th session in October 2020, the Executive Committee approved a revised budget of $9.131 billion based on updated assessed needs.

That budget represented the sum of the approved original budget of $8.668 billion and two supplementary budgets of $463.7 million. It comprised programmed activities of $8.721 billion (including management and administration costs at Headquarters, covered in part by the United Nations Regular Budget contribution), an operational reserve of $395.4 million; the “new or additional activities – mandate-related” reserve of $2.5 million; and $12 million for Junior Professional Officers.

When compared with the 2019 budget of $8.636 billion, the final 2020 budget of $9.131 billion represents an increase of $494.5 million or 5.7%, mainly reflecting the response to the COVID-19 pandemic.
The largest requirements were in the Syrian Arab Republic ($210 million). Specific operations in Iraq ($328 million) and the specific operations in Jordan ($427 million); in the East and Horn of Africa and the Great Lakes regions, at $2.813 billion, increased by $89.8 million or 73.7% compared to 2019. Expenditure for stateless programmes was associated with expenditures of approximately 3.3% compared to 2019 and accounted for 14.5% of total expenditure. The second largest component of programmes was Pillar 4 (global IDP projects), at 15% of requirements, where the major operations continued to be in the Middle East and North Africa, specifically in Iraq ($328 million) and the Syrian Arab Republic ($210 million).

Regionally, the largest requirements were in the Middle East and North Africa and in the East and Horn of Africa and the Great Lakes, at $2.813 billion, or 32%, and at $1,901 billion or 22%, of total requirements for programmed activities respectively. This is reflective of a series of protracted and overlapping crises in these two regions.

Expenditure

Expenditure totalled $4.838 billion, an increase of $422.4 million or 9.6% in comparison with 2019. This is an implementation rate (expenditure over total funds available) of 89.5%. Expenditure under Pillar 1 increased by $272 million or 7.5% compared to 2019 and at 80% of total expenditure continued to account for the overwhelming majority of UNHCR expenditure. Pillar 2 (stateless programmes) increased by $1.3 million or 3.3% compared to 2019 and accounted for approximately 1% of total expenditure, approximately 34% of the expenditure for stateless programmes was associated to the operation in Myanmar. Expenditure for Pillar 3 (global reintegration projects) increased by $89.8 million or 73.7% and accounted for 4% of total expenditure. The largest expenditure ($103 million) under Pillar 3 was in the Syrian Arab Republic. Expenditure for Pillar 4 increased by $59 million or 9.2% compared to 2019 and accounted for 15.4% of total expenditure. Major IDP projects were in Iraq, the Syrian Arab Republic and Yemen in the Middle East and North Africa; the Democratic Republic of the Congo in Southern Africa, Burkina Faso and Nigeria in West and Central Africa; and Somalia, South Sudan and Sudan in the East and Horn of Africa and the Great Lakes.

Supplementary budgets

With COVID-19 the overwhelming priority for response, two supplementary budgets were issued for the COVID-19 pandemic ($404 million) and in support of the refugees and displacement crisis in the central Sahel region ($59.7 million). The financial requirements for these budgets were $463.7 million or 5.3% of the total budget for programmed activities ($8.721 billion).

With reference to the financial requirements for 2020 programmed activities of $8.721 billion, these increased by $562.5 million or 7% compared to 2019. Globally, Pillar 1 (global refugee programmes), was the largest component of the programmed activities, at 77%. The largest requirements under Pillar 1 were in the Middle East and North Africa for operations in Lebanon ($607 million) and Jordan ($427 million); in the East and Horn of Africa and the Great Lakes, in Ethiopia ($346 million), and Uganda ($357 million); in Asia and the Pacific for Bangladesh ($319 million); and in Europe for Turkey ($365 million) and Greece ($284 million).

CHART 1 | 2020 ORIGINAL AND FINAL BUDGET | USD millions

CHART 2 | EXPENDITURE BY REGION AND BY PILLAR | USD millions
By region

Increases in expenditure were recorded in all regions (see Chart 3). This was mainly attributable to the response to COVID-19, but also to new and growing displacement crises including those in the Sahel, in northern Mozambique, and in Ethiopia’s Tigray region.

East and Horn of Africa and the Great Lakes | Expenditure grew by $68 million or 9%. The increase included Sudan for the emergency in Ethiopia, providing assistance to some 59,000 refugees from Tigray. Over 6 million people accessed health care services and benefited from organized information campaigns about COVID-19. UNHCR also disbursed $30.2 million in cash assistance to 1 million people of concern.

Southern Africa | Expenditure grew by $3 million or nearly 2%. The conflict in Cabo Delgado in north-east Mozambique saw UNHCR increase its support to some 530,000 displaced people. Across the region, some 1.4 million people of concern received protection services, and 261,400 received cash assistance to mitigate the impact of COVID-19.

West and Central Africa | Expenditure grew by $113 million or 34%. Major increases were in Burkina Faso, Mali, Niger and Nigeria. In response to the emergency in the Sahel, some 154,000 people received shelter assistance, and almost 80,000 households received core relief items. UNHCR biometrically registered more than 1.2 million people across the region, and over 1 million people received health care services.

The Americas | Expenditure grew by $69 million or 28%. The increase was spread across the region, with the most significant growth in Colombia, Ecuador, Guatemala, and Honduras. In Colombia, UNHCR supported an additional 64,000 displaced people through protection monitoring, advocacy, outreach and assistance, and supported access to asylum through innovative technologies in Ecuador. With continued forced displacement in the north of Central America, UNHCR supported government reception facilities in Honduras and provided assistance and protection at border locations in Guatemala. Cash assistance in the region supported some 374,000 people.

Asia and the Pacific | Expenditure grew by $56 million or 9%. Increases included Myanmar and Pakistan. Some 1.4 million refugees, IDPs and other people of concern accessed health protection services and 797,561 people received cash assistance to mitigate the impact of COVID-19. In Bangladesh, Malaysia, and Thailand, UNHCR worked with the Government to reinforce community networks. With continued support to countries along the route to Europe, some 54,000 people accessed health and protection at border locations and over 1 million people received health care services.

Europe | Expenditure grew by $24 million or 5%. The main increases were in Greece, where UNHCR worked with the Government to quickly identify and move people at high risk of COVID-19 to safer accommodation under the “Emergency Support to Integration and Accommodation programme”. Throughout the region, in response to the pandemic, UNHCR advocated the inclusion of people of concern in national health responses, vaccination campaigns and social protection schemes, and some 520,383 vulnerable refugees and asylum-seekers received cash assistance.

The increase was mainly in Jordan, Lebanon, Libya, and Yemen, with COVID-19 exacerbating already precarious humanitarian situations in the region. UNHCR supported national health capacities so that people of concern could be supported through national systems. Across the region, 5.2 million people benefited from community outreach services, while 2.6 million women and girls accessed information on protection risks and services. Large-scale distribution of emergency core relief items continued in Libya, Syria, and Yemen, where more than 50 million core relief items were distributed. UNHCR provided support to over 30,000 survivors of gender-based violence with psychosocial counselling, legal and medical assistance into the national social welfare system.

Global programmes | Expenditure grew by $199 million or 11%. The main increases were in the Division of Information Systems and Solutions for investments in cyber security, replacement of obsolete equipment, and in the Business Transformation Programme, and in Executive Direction and Management due to the strengthening of the Enterprise Risk Management 2.0 in field operations and the creation of a small liaison office for the regional bureaux. Headquarter | Expenditure decreased by $23 million or nearly 10%. All regions recorded a slight increase of expenditure due to the new regional bureaux having been relocated from Headquarters to the field.
UNHCR disbursed $1.455 billion to 1,143 partners, including to 728 national NGOs. UNHCR again exceeded its Grand Bargain commitment of 25% of operational programme expenditure going to local and national responders, defined as including Governments, communities, Red Cross and Red Crescent National Societies, and local civil societies, with 28% UNHCR simplified partnership arrangements by reducing the length and complexity of required documentation, and by increasing budgetary flexibility a partner can apply within an agreement. The Office worked closely with UN agencies, most notably within the framework of the UN’s refugee-led Partnership to harmonize procedures, including on risk and capacity assessments.

Refugee coordination in 2020

Supporting partnerships and inter-agency coordination for large-scale or complex refugee situations, including for mixed movements, UNHCR coordinated seven Refugee Response Plans (RRPs) with a regional perspective (see Table 2). Overall, 685 inter-agency partners worked to assist over 13.3 million refugees, migrants and returnees, and UNHCR worked to assist over 13.3 million refugees, migrants and returnees, and according to the Refugee and Statelessness Executive Committee and Parties
the overall objectives of kickstarting emergency operations, bolstering underfunded operations, and enabling programmes to implement fully.

UNHCR funded $211.2 million of expenditure from indirect support costs, $161.5 million at Headquarters and $49.7 million to the regions. Earmarked voluntary contributions funded 13% and 10% respectively. The largest expenditures funded from earmarked voluntary contributions were in the Middle East and North Africa, followed by the East and Horn of Africa and the Great Lakes, and Europe at 39%, 20% and 15% respectively. No earmarked funding was used for Headquarters.

Throughout the year, UNHCR’s programmes were carried out in an environment of sound financial accountability and oversight. Financial management at UNHCR Headquarters and in the field was strengthened, and adequate internal control infrastructure was in place. For example, the launch of a PowerBI tool allowed offices to access and monitor local and regional financial data in real time. The Statement of Financial Accountability and Oversight was published for the 2020 audit was supported virtually on its financial statements. The fieldwork for the 2020 audit was supported virtually with results expected in 2021.

Cash assistance was also supported by a robust financial control framework and business processes embedded in the delivery system. Cash assistance amounting to $695 million (compared to $646 million in 2019) was provided with oversight and expertise in financial risk management and in review of financial policy and associated procedures for cash assistance implementation. Monitoring of cash assistance with operations included assessment and due diligence of global financial systems, and validation of accessibility of financial service provision meeting requirements in mobile and digital money. UNHCR also supported the digitalization and delivery of new payment mechanisms and modalities, further enhancing secure and direct delivery of cash assistance to directly reach the global financial ecosystems and people of concern.

**Inclusion Note**

Including funds raised for implementation beyond 2020, UNHCR raised $4.736 billion in voluntary contributions, a record level. With the assessed contribution of the UN Regular Budget of $401 million, total contributions came to $4.776 billion. UNHCR had $5.404 billion available against budgetary needs once the adjustments shown in Chart 5 are taken into account.
Income from the top ten donors

Since 2010, the top ten donors have provided annually between 74.79% of UNHCR’s voluntary contributions. When compared with their prior five-year average contributions, UNHCR received increased support in 2020 from several of the top ten donors—notably the United States, the European Union, Germany, and CERF.

</table>

In-kind contributions such as support for premises, provision of standby partners and other goods and services, came to $95 million which included $68.5 million from the private sector. This represented triple the level of in-kind giving from 2019, attributable in part to significant new clothing donations and large quantities of in-kind hygiene products and medical PPE for the COVID-19 response.

Quality of income

Overall funding from donors giving over $20 million—the $20 Million Club—increased by 5% in 2019 and by 11% in 2020. More than half of the increase was from the United States Government alone ($265.4 million, a 16% increase). Other notable increases among top donors came from CERF ($51.2 million, 119%), Germany ($56.4 million, 14%), and the European Union ($45.1 million, 14%). Taken together, funding from the EU and its Member States came to $1.613 billion. Ireland and Spain both increased their contributions by 16% to total $20 million in 2020. Qatar remained a strong partner, increasing its contributions by 16% to total $23.8 million in 2020. This is in contrast to an overall decline in contributions from the Gulf region. Kuwait decreased the most, from $20.1 million in 2019 to $3.6 million (an 82% decrease), dropping out of the $20 Million Club. Saudi Arabia declined 16%, from $37 million to $31 million in 2020.

Contributions from the CERF increased significantly to $20.1 million (a 16% increase) while country-based pooled funds dropped to $13.9 million (a 14% decline). Contributions from development funding sources decreased $31 million in 2019 to $23.8 million in 2020. This is in line with an overall trend of increased earmarking in funds provided to UNHCR. At $1.376 billion, flexible funding—which comprises 85% of UNHCR’s voluntary contributions—remained similar to 2019, in line with the overall trend of increased earmarking in funds provided to UNHCR. At $1.376 billion, flexible funding—which comprises 85% of UNHCR’s voluntary contributions—remained similar to 2019, in line with an overall trend of increased earmarking in funds provided to UNHCR. At $1.376 billion, flexible funding—which comprises unearmarked and softly earmarked funding—represented 28% of voluntary contributions. This was $120 million more than 2019, when it represented 30% of voluntary contributions.
Voluntary contributions have more than doubled between 2012 and 2020 with the main increase being in earmarked contributions.

- **$3.899 billion** in 2019
- **$4.736 billion** in 2020

Unearmarked funding, which is contributed without restrictions on its use, came to **$661.2 million**. This was only **$1.7 million more** than in 2019 and comprised **4%** of all voluntary contributions. Unearmarked funding from the public sector decreased **3%** from **$471.2 million** in 2019 to **$404.8 million**. Sweden continued to be the largest unearmarked donor ($88.1 million); notably, these funds are also predictable and multi-year. The private sector provided **37%** of UNHCR’s unearmarked funding. This was a **6% increase** from **$242.3 million** in 2019 to **$256.4 million** in 2020. España con ACNUR remained the second largest donor to UNHCR of such funds with **$83.4 million**.

**CHART 9 | LEVELS OF EARMARKING | 2012-2020**

**CHART 10 | QUALITY OF INCOME BY TOP TEN DONORS | IN 2020**

**SPOTLIGHT:** Mr. Per Olsson Fridh, Sweden’s Minister for International Development Cooperation, explains the commitment to unearmarked funding.

“Sweden’s multi-year, unearmarked contributions to UNHCR are intended to be flexible, predictable and timely, helping UNHCR to be agile in responding to new emergencies, supporting refugees in forgotten and underfunded situations, and fully funding a wide range of programmes across the globe. We have confidence that the flexible funding provided is directed to where the needs are greatest, making our contribution as impactful as possible for the displaced populations and host communities we support through our partnership with UNHCR. As a leader in the provision of unearmarked funding over many years, we encourage UNHCR to continue to expand its base of unearmarked contributors and invite other donors to follow our example.”

Softly earmarked funding, which can be used across a range of countries and activities in a given region or situation, came to $715.5 million (an increase of $118.3 million from 2019). At 13% of total field expenditure funded by softly earmarked contributions was in the East and Horn of Africa and the Great Lakes ($106 million or 24%) and Middle East and North Africa ($93 million or 21%) and South and Western Asia ($56 million or 28%). Softly earmarked funding is used especially in countries affected by emergency situations. In 2020, over $10 million in softly earmarked funding was used in Bangladesh, Burundi, Cameroon, the Central African Republic, Chad, the Democratic Republic of the Congo, Ethiopia, Iraq, Jordan, Kenya, Niger, Nigeria, Pakistan, South Sudan, Sudan, the Syrian Arab Republic, the United Republic of Tanzania, Uganda and Yemen. Multi-year funding is another measure of flexibility and predictability for UNHCR operations (see Chart 1). It reduces the negative impact of income fluctuations throughout the year which can have knock-on effects across all areas of UNHCR operations, from emergency supply chains, staffing capabilities in the field, and core operations. UNHCR was able to draw on close to $618 million in multi-year funding in 2020. Of particular note are the multi-year contributions from Belgium and Sweden, respectively 98% and 91% unearmarked. Raising funds from the private sector

2020 was a record-breaking year for UNHCR’s private sector fundraising. Together with its National Partners, UNHCR raised an unprecedented $537.5 million, including over $256.4 million in unreserved funding. This was an overall 28% growth in income compared to 2019, exceeding 2020’s ambitious fundraising target of $500 million.

After a period of rapid growth in private donor income for UNHCR and peer organizations in 2015-2017, there was stabilization in 2018 and a challenging year in 2019. Although a downturn was expected in 2020 due to COVID-19, private sector fundraising picked up and all regions and all income streams performed above plan and above 2019 results. Despite the evident difficulties in 2020 with face-to-face fundraising, the number of UNHCR’s individual donors increased from 2.4 million to 2.8 million and the final total income from individuals reached $340 million. Income from corporations, foundations and private philanthropists came to $198 million, an unprecedented 37% of the total private sector income and a 69% increase over 2019 income from the same donor segment.

Growth in 2020 was driven largely by a swift response to emergencies such as to COVID-19, the crisis in Idlib, the explosion in Beirut, the Moria fire in Greece, and Tigray. In total, support to new or ongoing and deteriorating emergencies brought in more than $197 million in 2020 of which 34% came from individuals and 66% from private sector partners. This was the highest emergency-related income ever raised from private donors representing over 36% of UNHCR’s total private income in 2020.

While COVID-19 shifted fundraising priorities, it also provided new angles of approach to donors, and the pandemic ultimately led to increased solidarity and an interest in exploring new ways of partnering with UNHCR, with $52 million raised for the pandemic response. Performance in channels such as direct response television (DRTV), direct mail and digital marketing increased, and digital income reached $90 million, 30% growth compared to 2019.

 Corporates, foundations and private philanthropists also stepped up in larger numbers and contributed 69% more than in 2019. UNHCR received the largest kind-of-donations to date from GAP Inc. ($22.7 million), Unilever ($19.6 million) and Inditex ($7.6 million), with the single largest individual donor for the second year in a row being H.E. Sheikh Thani Bin Abdullah Bin Than Al-Thani.

Global campaigns raised over $15 million. UNHCR successfully piloted Connecting Worlds, a mobile application and ecosystem to raise funds for cash assistance. Developed based on insights from refugees and donors, the app was tested in four countries, where it proved a successful engagement and fundraising product.

Step with Refugees, a new iteration of “2 Billion Kilometres to Safety”, launched as a virtual month-long peer-to-peer challenge asking participants to seek sponsorship to complete a refugee’s journey distance. The campaign will help establish community fundraising for UNHCR. The Ramadan campaign raised $8 million globally. Aiming Higher launched in December 2020, raising over $1 million in its first week to fund refugee scholarships. CTP, a leading industrial European property developer, was the first large contributor to the campaign and generously funded 70 scholarships for four years. The winterization campaign brought in $5.34 million in digital revenue, exceeding its target of $5.1 million with three months left of the campaign.

UNHCR’s National Partners
UNHCR continues to maintain positive, strategic relations with its nine National Partners. In 2020, a new National Partner was established in Switzerland, whereas UNO-Flüchtlingshilfe marked its 40th anniversary and achieved the best result so far in its history. España con ACNUR remained the largest contributor with a record $103 million transferred to UNHCR.

Australia for UNHCR
Despite the impact of the bushfires, Australia for UNHCR recorded significant increases of income across individuals and middle- and high-net worth donors. Emergency appeals were launched for COVID-19, Ethiopia, Lebanon and the Syria crisis. The annual World Refugee Day breakfast featuring UNHCR Goodwill Ambassador Catie Blanchett was a virtual event and attracted a record attendance of 750 people. In its 20th anniversary year, Australia for UNHCR launched the Leading Women’s Fund, a unique community of dynamic and passionate women committed to supporting refugee women and girls through donations and the Connecting World app. In October 2020, the cause-related marketing campaign Design a Car for a Cause was launched with Australian online graphic design platform Canva, to support refugee education.
Despite COVID-19, this year’s humanitarian response has delivered life-saving help to over 82 million people in 85 countries and regions. The UNHCR has successfully innovated its fundraising activities and a new focus on successful mailing, telemarketing and digital channels. Existing donors remained loyal, and emergency communication exceeded all expectations. In honour of the anniversary, partnerships were established with prominent figures in art and culture such as the pianist and conductor Daniel Barenboim and the theatre director Johan Simons. An innovative nationwide art lottery, #HEART, was organized and raised 1 million euros for UNHCR, thanks to the participation of over 100 artists committed to raising awareness for refugees and connect with new and existing donors.

España con ACNUR (Spain) | España con ACNUR continued to grow due to the effective diversification of its fundraising channel mix. While the private philanthropy unit closed one of the most profitable agreements in the history of this National Partner with Inditex, the individual giving team faced COVID-19 head on, managing the negative impact on the performance of the regular donor database. These joint efforts, combined with creative strategies related to fundraising communications, public engagement, global citizenship education and social mobilization, kept on delivering and offer promise for the future.

España con ACNUR Comité Argentino | The launch of the anniversary campaign was launched in December 2020, reaching 100,000 households and foundations while the first individual giving campaign was launched in 2020 with over $500,000 raised in a few weeks.

Switzerland for UNHCR (CH4U) | This new partnership was established in March 2020. Several new strategic partnerships were developed with philanthropists and foundations while the first individual campaign was launched in December 2020, reaching 100,000 households with encouraging results.

UK for UNHCR | Another recently established National Partner created in mid-2019 that became fully operational in 2020, it contributed $5.5 million in 2020, mostly from key partnerships, including a $3.9 million contribution from a joint Unilever-UK Government fund for COVID-19 response.

Sweden for UNHCR | There was a very positive outcome in 2020, mainly in response to emergency appeals for the Moria fire, the Sahel, Idlib, COVID-19 and Ethiopia. The Moria fire in particular saw the Swedish public respond generously and quickly, resulting in the highest private fundraising in Europe with over $500,000 raised in a few weeks.

UNO-Flüchtlingshilfe (Germany) | Celebrated its 40th anniversary by raising 24% more than in 2019. COVID-19 forced the rescheduling of several fundraising activities and a new focus on successful mailing, telemarketing and digital channels. Existing donors remained loyal, and emergency communication exceeded all expectations. In honour of the anniversary, partnerships were established with prominent figures in art and culture such as the pianist and conductor Daniel Barenboim and the theatre director Johan Simons. An innovative nationwide art lottery, #HEART, was organized and raised 1 million euros for UNHCR, thanks to the participation of over 100 artists committed to raising awareness for refugees and connect with new and existing donors.

USA for UNHCR | Despite the challenges of 2020, USA for UNHCR closed the year with its highest revenue to date thanks to its strong foundations and relationships. A partnership with Gap Inc., with an additional donation from Citizens of Humanity, launched a transformational gift-in-kind programme that provided more than 6 million pieces of clothing. Throughout the year, the voices of refugees in the United States were lifted up, bringing Americans together to advocate for and support refugees. In the face of so many unique workplace challenges created by the pandemic, culture and connection were prioritized, and USA for UNHCR was named a Great Place to Work.
The table shows all contributors coming from all sources, including from governments and the private sector in countries supporting UNHCR’s work, and from intergovernmental and pooled funding mechanisms. As such, it is a way of reflecting the financial support to UNHCR from the “whole-of-society” approach. A traditional donor ranking is available from the Global Focus website.

Gap Inc. and Inditex make a landmark donation in 2020 of $30.2 million worth of new clothing to UNHCR operations.

Trucks of generous contributions from Gap Inc. and Inditex, two of the world’s largest fashion retailers, nearly 7 million units of clothing were donated to refugees in Armenia, Burundi, Chad, Lebanon and Rwanda. Borrowed by UNHCR’s National Partners for USA by UNHCR and Inditex in 2020, the kind gifts represent more than one fifth of the annual global demand for clothing and are two of the single biggest new clothing donations to date for UNHCR. Valued together at nearly $60 million over two years, these partnerships also created a more sustainable model to support the achievement of SDG12 on responsible consumption and production.

OVERVIEW | TRANSFORMATIVE INITIATIVES

Transformative Initiatives

COVID-19

The COVID-19 pandemic tested the ability of UNHCR and partners to protect and assist people of concern in ways never before seen in its 70-year history, highlighting the importance of strategic collaboration, responsibility sharing, and the inclusion of forcibly displaced people in national responses. The pandemic preyed on the vulnerabilities of forcibly displaced women, men, girls and boys. It blocked access to territory, jeopardized livelihoods and endangered the lives of those without equitable access to health care. UNHCR adapted to stay and deliver, an achievement made possible by the dedication of its staff, particularly those in field locations, as well as by its emergency response capacity. Its pre-pandemic investments in forging strong protection partnerships with communities, its partnerships, and, most importantly, the strength and resilience of displaced communities themselves. The pandemic forced tough decisions about reallocation of funds towards the most urgent needs, such as life-sustaining support through health, WASH and protection services, ramped-up cash assistance and increased shelter capacity, among others. Unearmarked funds, the Operational Reserve, and operations’ reprioritizing of their budgets were vital elements in kickstarting the response before fresh contributions were received against UNHCR’s $745 million appeal, which was ultimately 66% funded with $492 million in contributions.

From the beginning, UNHCR’s response had to deal with myriad challenges. Many people of concern were in areas where health systems were already struggling, capacity for COVID-19 testing, isolation and treatment was limited, and tracing and quarantining difficult. UNHCR urged governments to include refugees, the internally displaced and stateless in their pandemic responses and supported national health systems to increase capacity. It adapted programmes to ensure continuity in reproductive health and HIV services, chronic diseases and mental health. UNHCR constructed or rehabilitated isolation and treatment facilities for local hospitals, built governments’ and partners’ capacity for surveillance, contact tracing and case management, and supplied personal protective equipment (PPE), medicines, oxygen and rapid testing kits. Despite global shortages and the near-collapse of global transport links, UNHCR procured $186.1 million of critical COVID-19 supplies, PPE and services, and 9.9 million people of concern received essential health care. Crowded living conditions and inadequate WASH services amplified the pandemic’s impact. UNHCR supported over 400 health care facilities and 95 schools with additional WASH facilities and distributed 50 million bars of soap, as well as hand sanitizer and disinfectant, to over 60 operations. Thousands of handwashing facilities were installed in public spaces, schools, health facilities and private accommodation. The pandemic exacerbated protection concerns, with 80% of operations reporting escalating conflict and violence, and pandemic-related restrictions affecting IDPs’ ability to seek safety or return home, access health services and maintain their livelihoods. Through the Global Protection Cluster, UNHCR issued guidance to all field clusters and, with ICR, issued common COVID-19 protection messages to all operations for joint demarches with States. UNHCR stepped up its response in the 33 countries where it engaged in situations of internal displacement. In Burkina Faso, Colombia and Sudan, UNHCR supported health authorities and ensured IDPs had access to health care; in Somalia, it reinforced COVID-19 awareness raising and ensured two-way communication; and in Afghanistan, the Democratic Republic of the Congo, Iraq and Ukraine, cash and livelihoods were vital in, for example, addressing the risk of evictions.

As the pandemic progressed, UNHCR increasingly invested in 24/7 protection helplines, local language call centres, and other remote delivery mechanisms. These kept communities informed about COVID-19, maintained two-way communication on gender-based violence and mental health, and allowed socially distant protection case management. About 85% of operations innovated to provide services and assistance remotely, such as delivering high-risk pregnancy telemedicine in Jordan and contactless cash in Ecuador. Gender-based violence increased dramatically and restrictions on movement often made it impossible for those in need to seek help, especially for those already forcibly displaced. In Afghanistan, for example, 97% of forcibly displaced women interviewed for an assessment reported an increase in intimate partner violence, as did 69% in Jordan and an average of 73% in a multi-country assessment in 15 countries across Africa. Calls to gender-based
violence hotspots rose 70% in Zimbabwe, 153% in Colombia, and 239% in eastern Ukraine. Together with partners and forcibly displaced women and girls themselves, UNHCR adapted programmes, updated online guidance and tools, and expanded community mechanisms, ultimately assisting 2 million women and girls through dedicated 24/7 helplines.

For those already dealing with the stress of being uprooted, the pandemic created an added psychological burden and increased protection risks, often disrupting care for those with existing mental health conditions. UNHCR and its partners provided mental health and psychosocial support to 75 countries, reaching more than 647,000 people.

Displaced people’s living conditions often precluded at hindered physical distance. Overcrowding and evictions were major risks. UNHCR piloted innovative shelter approaches, as in Bangladesh, where adding mezzanines to shelters gave families nearly 70% more space without using more land. Globally, UNHCR provided almost 150,000 emergency shelters, 58% more than in 2019, installed 268 isolation and quarantine areas and decongested more than in 2019, installed 268 isolation and quarantine areas and decongested almost 150,000 emergency shelters, 58% more than in 2019, installed 268 isolation and quarantine areas and decongested more than 268,000 people, helping to create additional space to those modifying their homes.

With schools forced to close, 934,000 students in 74 countries were assisted to continue learning from home through radio, television and internet-based programmes. UNHCR worked with governments to enhance national educational content platforms, drawing on investments in connected education. It distributed books and supplies, supported refugee-led initiatives and helped pay refugee teachers. UNHCR’s global advocacy ensured refugees’ needs were included in national and global efforts to address losses in learning, particularly where they were not addressed by humanitarian or development financing. The Office supported safe school reopening, ensuring schools had WASH and handwashing facilities and supplying catch-up resources for learners.

Cash assistance was scaled up to address immediate needs and mitigate the long-term socioeconomic impact of COVID-19, and more than 65 UNHCR operations launched or expanded cash assistance programmes, disbursing $695 million to 8.57 million people.

The pandemic underlined the need to strengthen the transition from immediate to long-term responses to ensure protection and solutions for people of concern, and it increased awareness of the importance of including forcibly displaced people in national services such as WASH, health and vaccine programmes, and in data collection. Noting that “what gets counted, counts”, UNHCR made significant efforts to ensure socioeconomic assessments of COVID-19 took people of concern into account. Micradata in Bangladesh, Kenya, Lebanon and Nigeria provided insight into how COVID-19 affects people of concern and, in some cases, host communities. In nearly all contexts, job losses were significant, leading to reduced food consumption and increased poverty and the incidence of child labour, while families found it harder to obtain health care.

UNHCR engaged with development actors to encourage inclusion in financing, programmes and social protection policies, including through its partnership with the World Bank Group which took important measures to systematically include refugees and others of concern in COVID-19 vaccine efforts in low- and middle-income countries. Its COVID-19 socioeconomic surveys conducted out in Djibouti, Ethiopia, Kenya, Morocco and Uganda included a refugee sample, with Kenya also including one on statelessness. Early findings of many surveys are striking, highlighting for example the refugee and host community poverty gap in Kenya. Overall, in 47 out of the 52 operations in countries hosting more than 10,000 refugees, UNHCR ensured people of concern were included in UN country teams’ socioeconomic response plans.

Partnerships were crucial to UNHCR’s ability to stay and deliver, adapt programmes and ensure protection and life-saving assistance. UNHCR rapidly issued new guidelines to implementing partners in April 2020 and flexibly to make discretionary budget allocations and reduced reporting requirements. Regional refugee response plans were revised with partners.

Weekly consultations with NGO partners, co-organized with the International Council of Voluntary Agencies (ICVA), created a space to harmonize approaches to COVID-19. Annual consultations with over 100 NGOs, including local partners and refugee-led organizations, focused on protection challenges raised by the pandemic. UNHCR encouraged localization through a specific fund set up to target small civil society actors and launched an innovation award for refugee-led organizations responding to the pandemic. The annual UNHCR NGO Innovation Award was dedicated to refugee-led organizations and their response to COVID-19, with seven organizations in each region acknowledged for their dedication, innovation and creativity.

The Office increased collaboration with WHO and Gavi, the Vaccine Alliance, to enhance inclusion of people of concern in national health responses and vaccination campaigns, and with IFRC to strengthen localization efforts at country level. A specific strategic objective to ensure the rights and assistance needs of refugees, migrants, stateless and the internally displaced was also included in the IASC-led Global Humanitarian Response Plan.

From the very start of the pandemic, faced with lockdowns and movement restrictions, communities themselves made extraordinary efforts to protect themselves and others. Community and religious leaders, outreach volunteers and women’s and youth groups all engaged to ensure culturally appropriate and understandable information reached people of concern through multiple channels. These included social media, going door-to-door, radio, bicycling to isolated communities, or using megaphones and loudspeakers to ensure all members of the community were contacted with accurate information.

Displaced women around the world led in protecting their communities, for example in Zambia where hygiene promoters and community health workers were trained on safe disclosure and referral for gender-based violence, as well as psychological first aid. In Pakistan, female outreach volunteers, community mobilizers and gender support groups enhanced outreach and communication on COVID-19 preventive measures, including addressing social stigma and psychosocial support.
COVID-19 triggered UNHCR’s first-ever declaration of a global Level 2 emergency on 25 March 2020, prompting additional frame agreements with suppliers to allow more flexibility in procurement and deliveries, and UNHCR’s active participation in the UN COVID-19 Supply Chain Task Force to streamline and expedite joint procurement of pandemic-related items. Strengthened regional leadership structures were key to the quality and speed of the COVID-19 response, helping UNHCR to stay and deliver by providing timely support to country offices, accessing regional or local pooled funding mechanisms, and speeding up decision-making. Regional bureaux supported procurement efforts, spearheaded measures to ensure health care services for frontline staff, and were instrumental in sharing good practices across country operations.

In summary, COVID-19 triggered an immediate worldwide reflex. UNHCR raced to prevent its most vital protection and assistance from being disrupted or interrupted. It reallocated resources and found new ways of working, pressed governments to include refugees in their health responses, and strove to prevent the pandemic from exacerbating the plight of refugees—in terms of hunger, poverty, family separation, education, discrimination and violence, as well as health. The pandemic engendered new partnerships and creativity, but it tested UNHCR’s ability to respond in a crisis, with already stretched funding and record numbers of forcibly displaced people.

In summary, COVID-19 triggered an immediate worldwide reflex. UNHCR raced to prevent its most vital protection and assistance from being disrupted or interrupted. It reallocated resources and found new ways of working, pressed governments to include refugees in their health responses, and strove to prevent the pandemic from exacerbating the plight of refugees—in terms of hunger, poverty, family separation, education, discrimination and violence, as well as health. The pandemic engendered new partnerships and creativity, but it tested UNHCR’s ability to respond in a crisis, with already stretched funding and record numbers of forcibly displaced people.

UN Foundation and UNHCR reimagined global protection to ensure no one is left behind

UN Foundation and UNHCR were closely aligned in their response to the COVID-19 pandemic. From the very start, UNHCR’s work to protect and assist refugees has relied heavily on the generosity of UN Foundation and UNHCR’s donors. This year, the UN Foundation committed $50 million to support UNHCR’s response to COVID-19. To date, UNHCR has received $477 million in COVID-19-related funding.

Private donors to UNHCR received $1 million from the UN Foundation and UNHCR. This amount was matched by the United Nations Foundation, bringing the total to $1 million. This amount was used to provide necessary medical supplies, including masks, gloves, and other personal protective equipment (PPE). Additionally, UNHCR received $1 million from the Unicef Global Fund for Education in Displacement (GFED) to support education programs for children affected by the COVID-19 pandemic.

In summary, UNHCR’s COVID-19 response was supported by a range of donors, including governments, foundations, and private sector organizations. This year, UNHCR received $477 million in COVID-19-related funding, bringing the total to $1.57 million. This amount was used to provide necessary medical supplies, including masks, gloves, and other personal protective equipment (PPE). Additionally, UNHCR received $1 million from the Unicef Global Fund for Education in Displacement (GFED) to support education programs for children affected by the COVID-19 pandemic.

Additionally, UNHCR received $1 million from the Unicef Global Fund for Education in Displacement (GFED) to support education programs for children affected by the COVID-19 pandemic.
GLOBAL REPORT 2020

OVERVIEW OF 2020

The COVID-19 pandemic was thus both a “stress test” for UNHCR’s newly accelerated to support the response to refugee situations. The early signs of progress, despite significant challenges faced in 2020, are a testament to the willingness of governments and other actors to uphold commitments made at the Forum, continuing the global effort to build a better future for people forced to flee. Find out more at the Global Compact on Refugees website.

The Global Compact on Refugees

The pandemic abruptly shook up the context in which 1,400 pledges were made at the 2019 Global Refugee Forum and High-Level Segment on Statelessness. COVID-19 tested the ability of UNHCR and partners to deliver protection and assistance. The pandemic reinforced the importance of strategic collaboration, responsibility sharing and the inclusion of displaced people in national responses underpinning the Global Compact on Refugees (GCR). The 2020 High Commissioner’s Dialogue focused on how putting these principles into practice could advance the protection and resilience of people forced to flee, and those hosting them during a pandemic. Undaunted, many pledges—States, NGOs, refugees, the private sector, academia, development actors, cities, faith leaders and other stakeholders—stepped up to fulfil their commitments. Many pledges were adapted or accelerated to support the response to the pandemic. By the end of 2020, UNHCR had received updates for nearly half of the pledges, with over 70% of updates indicating work in progress and 15% at the planning stage, while an encouraging 71 pledges were fulfilled in 2020. Over 230 good practices directly linked to the objectives of the GCR were shared on the GCR Digital Platform, particularly in the areas of jobs and livelihoods, education and solutions. It will be vital to keep monitoring technical, material or financial support from donors to facilitate implementation of host countries’ pledges on protection and inclusion. Matching demonstrates burden- and responsibility-sharing in action, enabling pledging entities to combine their efforts to make a tangible impact and advance progress where more support is needed. For example, in Uganda, Denmark matched Uganda’s pledge for refugee inclusion in the national education system with 35 million kroner. And the LEGO Foundation, as part of its pledge in the Play to Learn partnership, matched Bangladesh’s pledge to “design innovative refugee solutions” in developing a telecommunication model, to reach children and caregivers affected by COVID-19 in Rohingya camps and Bangladesh host communities.

Pillars of change: Transforming UNHCR in 2020

UNHCR’s change process was designed to better position it to protect and assist people of concern, work with others to promote solutions, and address new challenges and identify new opportunities. The transformation—still ongoing—encompassed multiple areas of work across a range of pillars. The Global Compact on Refugees, which is part of this transformation, set out a framework for ensuring more predictable and sustainable burden- and responsibility-sharing arrangements in the context of large-scale movements of refugees and protracted refugee situations. The COVID-19 pandemic was thus both a “stress test” for UNHCR’s newly decentralized design and an accelerator of change.

Reimagining refugee camps and transforming livelihoods in Ethiopia

In 2019, Oxford University’s Refugee Studies Centre evaluated UNHCR and IKEA Foundation’s livelihoods programme in Dale Ab, Ethiopia, which focuses on agriculture, horticulture, energy, and income generation through a cooperative model. The programme’s positive impact includes greater cooperation between refugees and host community members, reported income increases, expansion of markets and the provision of electricity. In line with the Global Compact on Refugees, this strategic partnership has successfully created innovative and sustainable solutions for refugees. In 2020, the programme was recognized for its success by the International Finance Corporation and Financial Times at their Transformational Business Awards.

Global Compact on Refugees

The pandemic abruptly shook up the context in which 1,400 pledges were made at the 2019 Global Refugee Forum and High-Level Segment on Statelessness. COVID-19 tested the ability of UNHCR and partners to deliver protection and assistance. The pandemic reinforced the importance of strategic collaboration, responsibility sharing and the inclusion of displaced people in national responses underpinning the Global Compact on Refugees (GCR). The 2020 High Commissioner’s Dialogue focused on how putting these principles into practice could advance the protection and resilience of people forced to flee, and those hosting them during a pandemic. Undaunted, many pledges—States, NGOs, refugees, the private sector, academia, development actors, cities, faith leaders and other stakeholders—stepped up to fulfil their commitments. Many pledges were adapted or accelerated to support the response to the pandemic. By the end of 2020, UNHCR had received updates for nearly half of the pledges, with over 70% of updates indicating work in progress and 15% at the planning stage, while an encouraging 71 pledges were fulfilled in 2020. Over 230 good practices directly linked to the objectives of the GCR were shared on the GCR Digital Platform, particularly in the areas of jobs and livelihoods, education and solutions. It will be vital to keep monitoring technical, material or financial support from donors to facilitate implementation of host countries’ pledges on protection and inclusion. Matching demonstrates burden- and responsibility-sharing in action, enabling pledging entities to combine their efforts to make a tangible impact and advance progress where more support is needed. For example, in Uganda, Denmark matched Uganda’s pledge for refugee inclusion in the national education system with 35 million kroner. And the LEGO Foundation, as part of its pledge in the Play to Learn partnership, matched Bangladesh’s pledge to “design innovative refugee solutions” in developing a telecommunication model, to reach children and caregivers affected by COVID-19 in Rohingya camps and Bangladesh host communities. Key initiatives launched at the Forum also progressed. The three Support Platforms worked collaboratively to strengthen regional responses to forced displacement, increasing and diversifying their membership to include host and donor countries and other strategic partners. Support from the European Union significantly contributed to advancing these regional arrangements—an example of how cooperation with development partners is already catalyzing the implementation of the GCR by broadening the base of support. By mobilizing its global pledge, the Inter- Parliamentary Union—in partnership with UNHCR—brought together Members of the European Parliament and parliamentarians in the IGAD region to identify strategic priorities for forced displacement in the region, including through cross-regional solidarity around GRF pledges and the IGAD Support Platform and parliamentary diplomacy. The Asylum Capacity Support Group also made advances in matching requests from host countries with donor support in Africa and the Americas, in areas such as strengthening registration, use of country of origin information and processing modalities. The Global Academic Interdisciplinary Network’s secretariat was established in 2020, enforcing a network of scholarship and research on refugee issues, forced displacement and statelessness, and will be chaired by the University of Essex until 2023. As part of its activities and the Carta de Santiago pledge, the Brazilian model of the Rede Virada do Mestiço Academic Chairs is being expanded to different regions, with universities promoting refugee inclusion by providing services ranging from legal aid to health care. The early signs of progress, despite significant challenges faced in 2020, are a testament to the willingness of governments and other actors to uphold commitments made at the Forum, continuing the global effort to build a better future for people forced to flee. Find out more at the Global Compact on Refugees website.

Reimagining refugee camps and transforming livelihoods in Ethiopia

In 2019, Oxford University’s Refugee Studies Centre evaluated UNHCR and IKEA Foundation’s livelihoods programme in Dale Ab, Ethiopia, which focuses on agriculture, horticulture, energy, and income generation through a cooperative model. The programme’s positive impact includes greater cooperation between refugees and host community members, reported income increases, expansion of markets and the provision of electricity. In line with the Global Compact on Refugees, this strategic partnership has successfully created innovative and sustainable solutions for refugees. In 2020, the programme was recognized for its success by the International Finance Corporation and Financial Times at their Transformational Business Awards.
Decentralization and regionalization

UNHCR’s new organizational model came into effect in January 2020, when seven newly created regional bureaux became operational in their respective regions. With this realization of one of the major transformational streams initiated by the High Commissioner, these new bureaux replaced existing regional management and support structures, such as bureaux at Headquarters, regional offices, support centres, units and hubs. UNHCR has also significantly strengthened the regional bureaux to perform a wide range of functions: protection and operational support, programme planning and resource management, monitoring, internal control and risk management, amongst others. Bringing these functions and capabilities closer to field operations enables better and faster support, which was put to the test in the organization’s response to the COVID-19 pandemic.

Unlike in past initiatives, the transformation was accompanied by significant delegation of authorities. Unlike in past initiatives, the transformation was accompanied by significant delegation of authorities. Revised internal delegation frameworks moved decision making away from Headquarters and closer to the point of delivery. The new Resource Allocation Framework enhanced the level of delegation of authority to better embrace decentralization and regionalization. Policy changes in budget management resulted in 69% of decisions being made at the regional or field level, releasing some 44% of the additional resources, helping ensure timely allocation of resources to address protection and assistance needs. Regional bureau directors have significantly expanded authorities to re-allocate resources and manage staffing through clearer, streamlined and more flexible authorities. Heads of sub-office have new authorities for budget allocation and human resources, within established parameters. Headquarters, bureaux and operations were supported to implement these changes in the frameworks.

Another significant change at country level was the introduction of incentive-based local fundraising, which enables country operations to expand their approved spending envelopes without approval from Headquarters. Funds raised from UN administered pooled funds such as CERF and country-based pooled funds increased 64% to $151 million in 2020, compared with $91.8 million in 2019. This increase was partly due to the delegated authority to the field as these funds are uniquely managed at country level, combined with increased funding from pooled funds for the COVID-19 response.

Moving the regional bureaux from Geneva (with the exception of the bureau for Europe) aligned UNHCR’s structures more closely with other UN agencies and international NGO partners, significantly strengthening the Office’s ability to engage with them at the regional level. For example, NGO consultations organized by UNHCR’s regional bureaux allowed for more focused discussions on regional contexts and brought local civil society into the conversation. The newly-decentralized bureaux in Europe, the Americas and Africa also engaged with the issue-Based Coalitions, regional groupings of UN bodies tackling cross-cutting issues such as the challenges posed by human mobility. UNHCR’s new regional presence also enabled greater engagement with regional intergovernmental organizations and mechanisms. UNHCR supported the IGAD platform to implement a regional refugee framework focusing on inclusion and assisting member states in East Africa, and also signed a memorandum of understanding with the African Development Bank to mobilize and direct resources to the Sahel to support the primary health response and the resilience of vulnerable communities in Burkina Faso, Chad, Mali, Mauritania, and Niger. The creation of dedicated external engagement capacity in the bureaus has repositioned UNHCR, paving the way for long-term engagement and collaboration with key regional actors. United Nations development system reform

Regionalization enhanced UNHCR’s active engagement in the roll-out of the United Nations development system reform, including in the new regional collaborative platforms. The Office co-chaired Issue-Based Coalitions on human mobility, displacement and resilience across Africa, in Europe, and in Latin America and the Caribbean, and aligned itself with the United Nations country-level management and accountability framework, including linkages to performance appraisal of its country representatives.

UNHCR also supported the United Nations framework for the immediate socioeconomic response to COVID-19 offering guidance to Resident Coordinators on including refugees, forcibly displaced and stateless people in the socioeconomic impact assessments. With no specific funding window created for this response, UNHCR pivoted its learning curriculum to virtual delivery. This shift online unlocked greater opportunities for learning, regardless of location, and programmes were made available in more languages for broader access.

There was considerable focus on the importance of dialogue, learning and communication in how to manage teams and people. Managers received targeted support such as webinars to strengthen their ability to work and engage remotely with their teams. UNHCR also offered managers development tools and spaces for reflection in recognition of their role in creating and promoting safe, inclusive and respectful work environments. Over the year, 15,000 staff participated in at least one learning activity, with over 1,000 e-learnings and 300 learning programmes made available in English and French.

Global Strategic Priorities

See p. 9 for GSP results
Over 4,000 staff took part in 80 career webinars, 400 signed up for coaching or mentoring, and 400 managers took part in Reflective Leadership Dialogues on inclusivity and creating enabling work environments.

A review of the performance management system was launched to re-evaluate existing practice and examine culture, policies and processes so as to build a new, more modern approach. This will be a key element in developing a positive employee experience and a workplace culture where UNHCR’s a workforce thrives.

UNHCR’s business continuity plans mitigated COVID-19’s impact on human resources (HR) matters. Assignments continued to be managed without disruption, albeit remotely. Managers and HR staff globally were able to access lists of candidates in various talent pool profiles. This improved UNHCR’s ability to identify local staffing strengths, and managers and HR staff could define best matches with their requirements. Screening and processing remained at Headquarters, providing for consistent oversight in accordance with rules and procedures. Over the year, 1,700 job inter-agency efforts on health and safety matters throughout 2020 and was an active contributor to the UN System-Wide Task Force on Medical Evacuations, the inter-agency efforts to strengthen the medical first line of defence, and medical support by phone was made available in several languages for persons and families.

UNHCR recognized how COVID-19 could create mental health stressors, as staff faced isolation, separation, multiple roles at home, and the difficulty of travelling for rest and recuperation. Psychosocial capacity was strengthened through the network of peer advisors and regional staff counsellors, and additional mental health support was provided. UNHCR continued to be a leader in operational data review, data collection and methodology, including a new Statistical Quality Assurance Framework. UNHCR co-led the Common Good Data Initiatives aimed at strengthening data to gather, access and manage strategic information and to improve analysis and communication of data as evidence.

The Office worked across the UN to develop the Secretary-General’s Data Strategy and make more use of the UN’s data. UNHCR helped to put the WFP-UNHCR Joint Programme Evidence and Targeting Hub into operation, creating a joint targeting capability and supporting UNHCR’s occupational health and safety. Over by forced displacement and led the technical assessments for two reports on the inclusion of people with disabilities by the UN Special Rapporteurs on the rights of persons with disabilities and on the human rights of IDPs. UNHCR also developed a demographic model to estimate sex- and age-disaggregated data at global and regional level to strengthen evidence-based programming and advocacy. UNHCR led inter-agency processes to develop monitoring frameworks, including a global inter-agency multi-sectoral COVID-19 monitoring framework in collaboration with IOM, OCHA, UNESCO, UNICEF, UNWFP, WFP and WHO among others. As part of the UNICEF-UNHCR Blueprint, UNHCR established 15 data projects to improve data interoperability and data sharing, and to support the objectives of the Blueprint for the inclusion of refugees in UNICEF and government data systems. There were improvements to UNHCR’s statistical reporting, data collection and methodology, including a new Statistical Quality Assurance Framework. UNHCR co-led the Common Good Data Initiatives aimed at strengthening data to gather, access and manage strategic information and to improve analysis and communication of data as evidence. The Office worked across the UN to develop the Secretary-General’s Data Strategy and make more use of the UN’s data. UNHCR helped to put the WFP-UNHCR Joint Programme Evidence and Targeting Hub into operation, creating a joint targeting capability and supporting UNHCR’s 33

Risk management and integrity

The pandemic posed risks unlike any faced by UNHCR in its history, compelling UNHCR to increase its response whilst minimizing its physical footprint. From the start of the COVID-19 outbreak, risk management colleagues across the organization contributed to COVID-19 preparedness, ensuring that pandemic-related risks were rapidly identified, managed and monitored.

Risk registers were developed to identify and manage risks associated with COVID-19. These registers were shared with stakeholders to promote a coordinated response. By the end of 2020, each of the seven regional bureaux and 12 high-risk country operations had developed COVID-19 risk registers, giving an overview of the risks faced by refugees and UNHCR. These registers included organization-wide risks to business continuity, identifying risks to supply chain management, and pointing towards solutions, the register aimed to minimize operational disruption. To support early action and coordination with broader UN coordination, from contingency planning to procurement. By elaborating the risks linked to COVID-19 and pointing towards solutions, the register aimed to minimize operational disruption. Providing a framework for action, and support the organization’s effort to stay and deliver in extraordinary circumstances.

When physical distancing threatened to interrupt protection and support services, operations actively sought to remain engaged and responsive to the needs of people of concern. UNHCR expanded cash assistance, increasing contactless and mobile money payments. To address new challenges posed by COVID-19, anti-fraud training was conducted in Greece, Somalia and South Sudan, whilst the accountability chain of the cash assistance programme in Yemen and in other operations was strengthened.

Increased reports of gender-based violence and risks of sexual exploitation and abuse prompted operations to increase focus on communicating with communities, providing ways for people in need to continue to seek support from UNHCR or its partners. Inside UNHCR, the crisis drove innovation and change, with heightened attention to duty of care to the workforce and use of digital technology to communicate. Following a risk assessment in Bangladesh, and to mitigate immediate risks to the health of personnel, the operation converted part of the office to a field hospital. In parallel, internal dialogue and mental wellbeing services were put in place. As the pandemic evolves, robust risk management will help UNHCR prepare for potential new waves whilst keeping longer term challenges in sight.

Supporting operations through the risk network and building for the future

The year saw the conclusion of UNHCR’s Risk Management 2.0 initiative, in which the organization invested in people, tools and processes to better manage uncertainties. The initiative brought a noticeable improvement in the quality of risk analysis and mitigation measures, which in turn has increased transparency, data-driven decision-making and accountability.

By the end of 2020, each of the seven regional bureaux and 12 high-risk countries had a senior risk adviser in place. Despite travel restrictions, the network of risk advisers provided learning and support to more than 1,800 colleagues, increasing overall use of risk management tools and processes to better manage risks. As with other parts of UNHCR, the pandemic has brought new challenges that required us to adapt and innovate, ensuring our mandate remains a priority for the organization. Whilst good progress was made with the Risk Management 2.0 initiative, work needs to continue to strengthen UNHCR’s risk culture in all operational and management areas.

Integrity and oversight

As with other parts of UNHCR, the pandemic presented UNHCR’s independent oversight providers with a unique set of challenges that had to be overcome. By adapting and innovating, a revised plan and new working methods were in place by the end of March 2020, ensuring oversight could continue.
The response to the COVID-19 emergency included deferring a number of reviews; moving to remote auditing and reviews; providing advisory and thematic audit and review work; ensuring COVID-related questions were embedded into their work; and reporting in a more agile, short-form format to provide ongoing feedback and response to UNHCR management. Towards the end of 2020, coordinated planning conversations between the key oversight providers were undertaken to ensure a well-balanced and coherent overall oversight plan was in place for 2021.

There was also oversight of UNHCR’s pandemic response, including reviews of supply chain and procurement activities; partner selection and management; distribution of cash assistance and core relief items; vendor and emergency procurement fraud risk; controls over implementing partners; and remote programme and protection monitoring. Those were undertaken through a mixture of advisory and audit modalities.

In the past five years, misconduct complaints grew from 399 in 2016 to 664 in 2017, 1,186 in 2018 and 1,226 in 2019. In 2020, the pandemic hampered reporting of misconduct complaints, which declined 7% to 1,146. For 2021, based on increasing numbers of complaints at the end of 2020, a return to pre-pandemic levels of 1,200 per annum is predicted. During 2020, UNHCR opened investigations implicating 142 individuals and finalized 130 investigation reports, of which 55% (71 out of 130) were substantiated. UNHCR continues to invest in measures to enhance oversight. The office of the newly-appointed Inspector General (IGO) updated its strategy and thoroughly reviewed its operations, resulting in further realignment of IGO staff to regional locations and a comprehensive change to the IGO’s strategic oversight function. It introduced improved standard operating procedures relating to complaints intake assessment processes, and for applying a victim-centred approach to investigations, and its digital capability was enhanced with new forensic tools and an upgrade of the complaints case management system.

SPOTLIGHT: Preventing fraud committed by people of concern
As part of decentralization and regionalization, regional anti-fraud focal points were supported in enhancing capacity in their respective operations to improve the detection and response to fraud by people of concern. This led to the identification of evidence-based gaps and the subsequent development of context-specific anti-fraud tools and materials. An internal data visualization tool was developed to monitor performance in fraud management, trends analysis and reporting. The tool allows for easy reporting instances of fraud based on real-time proGres v4 data, thereby facilitating management and operational responses. In operations using proGres v4, there were 105 cases detected in 2020 (up from 79 in 2019), with about 40% of detected cases resolved during the year. More than 90% of operations conducting individual processing of people of concern’s information now have designated personnel and, with over 300 staff having received dedicated anti-fraud training, UNHCR’s ability to detect fraud by people of concern has increased significantly, as have more structured responses.

The High Commissioner’s role as IASC Champion on Protection from Sexual Exploitation and Abuse and Sexual Harassment
Tackling sexual misconduct, within UNHCR and in the wider humanitarian sector, is critical to UNHCR’s vision of a trusted, respectful and inclusive environment where the people it serves and those who support them feel safe, heard, equipped and empowered.

In 2020, the High Commissioner brought this commitment forward by taking on the role of IASC Champion on Protection from Sexual Exploitation and Abuse and Sexual Harassment, launching several initiatives to further his three main priority areas of bolstering prevention, expanding safe spaces and promoting respectful use of authority.

These initiatives included learning packages, communications materials, and best practice guidance, some of it aimed at capacity building and awareness-raising amongst humanitarian personnel and affected communities.

Other aspects supported humanitarian leadership in building respectful and inclusive working environments and a speak-up culture, and some initiatives proved particularly relevant in the context of the COVID-19 pandemic.

Examples included a learning package for NGO partners—“Saying NO to sexual misconduct”—which was jointly developed with IOM, WFP and others. It fostered creative engagement and dialogue and works through the implications of power differentials and people’s responsibilities as humanitarian workers. The package includes video, case studies and testimonies, is easily tailored for different audiences and contexts, and is currently available in English, French, Spanish, Arabic and Portuguese.

Another initiative was the PSEA Community Outreach and Communication Fund, launched by UNHCR and IOM in April 2020 at a time when COVID-19 and related restrictions challenged efforts to prevent and respond to sexual exploitation and abuse. The Fund provides small-scale grants to NGO
projects supporting community-led efforts to raise awareness of prevention of sexual exploitation and abuse. Of 1,600 applications received, 15 grants were awarded to organizations across all regions. A range of projects developed targeted multimedia awareness-raising tools, such as that of the NGO Lotus Flower Iraq. The NGO launched campaigns for IDPs which prioritized strengthening reporting channels in IDP camps and engagement with women and girls at heightened risk of sexual exploitation and abuse.

A communications package was made available in English and French to guide IASC Principals in meaningful discussions with staff on sexual misconduct. The tool uses impactful videos to facilitate often uncomfortable discussions and aims to promote a speak-up culture and, although designed for face-to-face engagement, the package lends itself to online use.

The High Commissioner closed his tenure as IASC Champion by hosting a session with all IASC Principals on values, attitudes, and organizational culture, providing a forum for reflection on the underlying factors in organizational attitudes, and organizational culture, providing a forum for reflection on the underlying factors in organizational environment dictated by the pandemic, even with the constraints of the virtual environment.

In many places around the world, internal displacement has become chronic. At the end of 2020, the global number of internally displaced people due to violence and conflict reached an estimated 48.6 million, the highest ever recorded and 5.1 million more than in 2019. In 2020, major drivers of forced displacement were escalating conflict and violence, massive human rights abuses ranging from forced recruitment to torture and rape, and the impact of climate change, including depleted natural resources, diminished crop yields and livestock shortages. The pandemic itself was also a cause of flight, with recorded instances of people moving from crowded urban locations to rural settings in an attempt to avoid contagion, including in Somalia and Yemen.

Within this context, UNHCR continued its stepped-up engagement in situations of internal displacement. Spending on IDP programmes under Pillar 4 rose 9%, with an additional $21.5 million transferred from the Operational Reserve for emergency response to nine operations (in the Central African Republic, Honduras, Mali, Mozambique, Myanmar, Nigeria, the Panama multi-country office, the Syrian Arab Republic and Ukraine). Notably, decentralization empowered regional bureaux and representatives to quickly redeploy funds to meet IDP emergency response needs.

UNHCR combined coordination leadership with field operations, bringing delivery closer to people of concern, enhancing credibility with cluster partners and strengthening relations with governments, especially at local level. Engagement via community-based protection networks, telephone hotlines, and other virtual means helped to make up for the physical distancing introduced during the pandemic.
to fight COVID-19. UNHCR Yemen in particular established best practices in this regard, helping to guide engagement in other locations.

UNHCR moved during the year towards integrated programming inclusive of all population groups in an operational context, including host communities. In Colombia, the Casa de los Derechos project was an example of an area-based approach that brings legal assistance and other benefits to co-located IDPs, refugees, returnees and local communities experiencing similar protection needs and risks. In Afghanistan, UNHCR applied an area-based, whole of community approach aimed at mitigating protection risks and vulnerabilities of all affected communities while facilitating sustainable solutions including reintegration of refugee returnees and IDPs. Investments in solutions underpinned UNHCR’s IDP work. Solutions can be achieved where local communities are resilient, and this requires investments in national capacity, including through international financial institutions.

UNHCR’s IDP policy identifies solutions as integral to all IDP engagement, be it through support to local authorities and communities or enhancing partnerships beyond the traditional humanitarian stakeholders and including development actors. Advocacy and related interventions for the inclusion of IDPs in national services and pandemic-related safety nets established by States remain central to the approach.

UNHCR closely engaged with the High-Level Panel on Internal Displacement by sharing experiences and supporting the global and national discourse on IDP solutions, contributing to dialogue with IDPs and with experts. UNHCR’s contributions to the Panel were through written communications and written submissions based on its extensive experience in advancing solutions in refugee and IDP settings.

Global Protection Cluster

The GPC and national protection clusters advocated for the rights of 78.3 million people in need of protection, of which 31.9 million people received assistance in 23 operations. UNHCR led 29 of 32 field protection clusters and cluster-like mechanisms. The GPC Coordinator undertook field missions to Burkina Faso and Iraq while GPC Operations Cell members undertook field missions to Ethiopia and Sudan and provided remote technical support and sharing of good practices to field protection clusters. This saw the GPC working with over 1,000 diverse partners around the world.

The 2020 Global Protection Forum, hosted by the GPC’s Strategic Advisory Group and the four GPC areas of responsibility, gathered the Child Protection, Gender-Based Violence, Housing Land and Property and Mine Action Areas of Responsibility brought together over 3,000 humanitarian, peace and development partners, academics, UN Member States and donors to discuss contemporary protection challenges and gaps, exchange lessons learned and provide strategic direction.

Global Camp Coordination and Camp Management Cluster (co-led with IOM)

The global CCCM cluster supported 23 country-level clusters and cluster-like structures in 2020, with UNHCR leading or co-leading 19. The UNHCR CCCM Global Cluster Team developed “Camp site management informs operational guidance for COVID-19 readiness and response”, containing key considerations to incorporate into pandemic preparedness and operational planning. The Team also provided input and support for the IASC’s interim guidance on “Scaling up COVID-19 outbreak readiness and response operations in humanitarian situations, including camps and camp-like settings”, which guidance was jointly produced with IFRC, IOM, WHO and UNHCR.

The team delivered virtual COVID-19-related capacity-building workshops for Cameroon, Chad, the Democratic Republic of the Congo (DRC), Mali, Pakistan, Mexico, Yemen and the Latin America sub-region. A virtual mission to Sudan supported the establishment of a COVID-19 IDP camp coordination task force, and the roll-out of a survey on preparedness gaps and services. Continuous consultations with stakeholders improved CCCM delivery in Burkina Faso, the Central African Republic, DRC, Ethiopia, Iraq, Mozambique, Myanmar, Somalia and Sudan. This was done through a combination of scaling up staff, resource mobilization and advocacy, capacity building, and coordination and operational support missions.

Global Shelter Cluster (co-led with IFRC)

UNHCR led 16 of the 30 country-level shelter clusters and 19 of the 37 shelter coordination mechanisms, with one newly activated in 2020 in the DRC. The UNHCR-led clusters provided shelter and core relief items to over 12 million IDPs through 535 partners in conflict situations, representing 81.6% of all displaced people assisted with shelter globally. Some 2.2 million people were reached with COVID-19-specific shelter activities in 12 out of the 16 UNHCR-led clusters with activities such as shelter and core relief items for medical, quarantine or isolation facilities, or to reduce overcrowded living conditions.
In 2020, the cluster launched **rental market guidance**, updated the **co-ordination toolkit**, and delivered the **annual meeting** and **co-ordinators’ workshop** online, consisting of 99 events, including thematic sessions, country cluster briefings and regional events with over 1,000 participants. In addition, the GSC hosted monthly **webinars** in shelter response to COVID-19 with coordinators and operational staff.

The UNHCR GSC team provided 132 days of field mission support in Burkina Faso, the Democratic Republic of the Congo, Sudan and the Syrian Arab Republic, in addition to 274 days of remote support. Specifically on COVID-19, the UNHCR-led GSC team supported countries in adapting their response and in providing resources through a specific **COVID-19, shelter library**.

In conclusion, important progress was made towards the UNHCR objective of a more decisive and predictable engagement in situations of internal displacement. An acceleration of efforts ensured a strengthened organizational response, as required by the revised IDP Policy, encompassing UNHCR’s co-ordination and operational delivery interventions, and covering the full spectrum of response, including preparedness and solutions.

Climate change increases the risk of displacement, makes it harder for displaced people to return home, and poses a multitude of risks and protection concerns during displacement. Approximately 20% of the world’s population lives in a highly climate-vulnerable country, but refugees and IDPs are particularly at risk with nearly 90% of refugees under UNHCR’s mandate coming from a highly vulnerable country. These same countries host over 40% of refugees and nearly 70% of IDPs displaced by conflict.

Climate change is already a threat to UNHCR’s preparedness, response and solutions work. In 2020, droughts, flooding, storms and hurricanes posed challenges to UNHCR operations from Bangladesh to the Sahel to Central America, and globally there were 30.7 million new displacements due to disasters. This was the highest figure in a decade, and over three times higher than the 9.8 million displaced by conflict.

As the world continues to heat rapidly, and as the risks of displacement only increase, UNHCR has stepped up its commitment and ambition to tackle the humanitarian and protection challenges of the climate emergency. The office of the Special Advisor on Climate Action was established in January 2020 to provide strategic guidance, oversight and expertise in shaping UNHCR’s climate action agenda and responding to growing protection concerns.

The **Strategic Framework for Climate Action (SFCA)** was developed, setting out the parameters of UNHCR’s response under three pillars:

- **Law and policy**: legal and normative guidance and policy engagement to better protect people of concern in the context of climate change and disasters.

© UNHCR/YWU

Forcedly displaced Mozambican families recover from heavy rain and flooding at an IDP site in Cabo Delgado, northern Mozambique.
• Operations: strengthening the resilience of displaced populations to climate and environmental risks, enhancing preparedness and response to displacement in disaster situations, and protecting the environment in displacement settings.

• UNHCR’s environmental footprint: reducing its greenhouse gas emissions and minimizing its environmental impact.

As part of the law and policy pillar, UNHCR released “Legal considerations regarding claims for international protection made in the context of the adverse effects of climate change and disasters”. This provided guidance for States, legal practitioners and other actors in applying international refugee and human rights law to protect people displaced across borders in the context of climate change and disasters. UNHCR also continued cooperation with academics, legal experts and practitioners in the area, providing technical support to research papers and interventions upon invitation at conferences and other events, and thus widening the network of partners. A key example of such an opportunity was afforded by “COVID-19 and climate change: what can we learn?” at the High Commissioner’s annual Dialogue on Protection under the theme “Protection challenges during pandemics”.

UNHCR’s long-standing support to the Nansen Initiative Protection Agenda continued as part of the State-led Platform on Disaster Displacement, along with IOM, was formalized through a memorandum of understanding. As a member of the Warsaw International Mechanism for Loss and Damage’s Task Force on Displacement under the UN Framework Convention on Climate Change, UNHCR supported Parties’ consideration of policy and measures to avert, minimize and address climate-related displacement. At the regional level, UNHCR contributed to inter-agency dialogue with the European Union on human mobility related to climate change and the development of policy and guidance on adaptation and preparedness.

As part of the operations pillar of the SFCA, climate and environmental risk related to supply were integrated in a new procurement policy, including greener procurement of core relief items, and efforts are underway to move towards greener packaging. There was also a review of the impact of cash assistance, and the use of core relief item donations, on the environment.

In the first year of its 10-year ambition, the Clean Energy Challenge (CEC) graduated from an aspiration to a mechanism for implementation, a further step towards the goal of bringing affordable, reliable and sustainable energy to all settlements of forcibly displaced people and nearby host communities by 2030. In line with the Global Compact on Refugees, UNHCR plays a catalytic role, building partnerships and advocating greater engagement of business actors, governments, development actors, NGOs, and experts to support the CEC.

Recognizing the need to increase preparedness for situations where UNHCR is called upon to respond in non-conflict-related emergencies, operational guidance was developed on “IDP protection responses in the context of disasters and the adverse effects of climate change”. This focuses on key protection issues and priorities during the preparedness and emergency response phase.

Lastly, under the third pillar, UNHCR is reducing its own environmental footprint and greenhouse gas emissions in line with Greening the Blue, the UN system-wide commitment to improve environmental sustainability. In 2020, UNHCR achieved climate neutrality for the second year running through offsets and developed a greening and sustainability strategy focusing on four areas:

• The Green Box initiative uses energy meters in UNHCR offices to measure global energy consumption. In 2020, 225 offices in 115 countries enrolled in the initiative.

• The Green Dot initiative creates a data warehouse that helps identify opportunities to transition to renewable energy.

• The Green Fund is an innovative financing mechanism to power field offices with renewable energy, with pilots planned in Ethiopia, Kenya and Uganda.

• Promoting energy efficient practices and eco-conscious behaviours throughout UNHCR. For example, a carpentry project in Lebanon involving UNHCR and UNICEF will contribute to financial efficiencies, reduced emissions and optimized fleet sizes.

The SFCA recognizes that the magnitude of the climate emergency requires unprecedented collaboration to meet the growing protection challenges and achieve impact at scale. In this spirit, UNHCR led the development of an interagency predictive analytics project addressing the interconnected risks in the Sahel and how climate change will affect the humanitarian, development, and peace and security sectors.
East and Horn of Africa and the Great Lakes

These children are the next generation coming up. Some will be doctors, teachers, pilots. I don’t just dream for them… Teaching plays a role in building a generation.”

—Ngesti Gudamadhen, volunteer refugee teacher

OVERVIEW AND KEY DATA IN THE EAST AND HORN OF AFRICA AND THE GREAT LAKES IN 2020

Decades of civil war and instability have created UNHCR's longest refugee crisis, with more than 800,000 Somali refugees residing in Ethiopia, Kenya, Yemen and elsewhere. In 2020, three Somalis were displaced with the country by the end of 2020. With COVID-19 as well as insecurity hovering, comprehensive support was extended to Somali refugees who returned home. UNHCR assisted 600,000 Somali refugees for whom others returned on their own. Cumulatively, 6,915,583 Somali refugees have been assisted to return since 2014. Avail ongoing state-building and funding shortfalls, returns, IDPs and the 800,000 asylum seekers hosted in Somalia faced insecurity and living conditions shocks such as floods, droughts and outbreaks. In line with the Comprehensive Refugee Response Framework and the Global Refugee Forum, Somaliland continued to support and assist over 1.5 million South Sudanese IDPs displaced by protracted conflict, environmental disasters and outbreaks of inter-communal violence.

SOMALIA

$7,686,766 distributed in cash relief. 60,544 households reached with core relief items. 23,539 people of concern provided South Sudanese refugees with protection and basic assistance, in line with the Comprehensive Refugee Response Framework, which brought together 58 partners, with gender-based violence and child protection as priorities. UNHCR provided the refugee initiative in COVID-19 protection and response measures. Support to the International Task Force led to an agreement to provide access to refugees in the relevant countries programmes.

ETHIOPIA (TIGRAY)

$73,000,000 distributed in cash assistance. 69,621 households reached with core relief items. 284,641 people of concern received hygiene supplies. In response to the Tigray, communication blackouts and lack of access precluded any immediate response. UNHCR joined the Humanitarian Response Plan, which brought together 35 partners, UNHCR provided protection, assistance and access to aid for an estimated 313,000 Burundian refugees, mainly in Rwanda, the Democratic Republic of the Congo and the United Republic of Tanzania. UNHCR pressured for their inclusion in national COVID-19 responses. Food shortages grew, leading to negative coping mechanisms, including increased violence and premature returns. COVID-19 disrupted schools, reduced healthcare services and constrained access to registration, asylum and voluntary repatriation. Although food screenings, isolation facilities and protective equipment, lending and social distancing added unplanned costs to the repatriation movements. UNHCR helped 40,000 refugees to return from Burundi, the United Republic of Tanzania, bringing the total returns to Burundi to close to 120,500 since voluntary repatriation agreements began in 2017. UNHCR did not promote returns but continued to support those who expressed an interest in returning home voluntarily.

SOUTH SUDAN

$5,240,211 distributed in cash assistance. 69,621 households reached with core relief items. 204,651 people of concern received hygiene supplies. After Burundi's 2020 elections, the Government strengthened engagement with the international community including humanitarian actors. The overall working environment and the political and security situation improved, although reports of human rights abuses continued. In line with the New Partnership for Africa's Development, UNHCR provided refuge, protection, assistance and access to aid for an estimated 313,000 Burundian refugees, mainly in Rwanda, the Democratic Republic of the Congo and the United Republic of Tanzania. UNHCR pressured for their inclusion in national COVID-19 responses. Food shortages grew, leading to negative coping mechanisms, including increased violence and premature returns. COVID-19 disrupted schools, reduced healthcare services and constrained access to registration, asylum and voluntary repatriation. Although food screenings, isolation facilities and protective equipment, lending and social distancing added unplanned costs to the repatriation movements. UNHCR helped 40,000 refugees to return from Burundi, the United Republic of Tanzania, bringing the total returns to Burundi to close to 120,500 since voluntary repatriation agreements began in 2017. UNHCR did not promote returns but continued to support those who expressed an interest in returning home voluntarily.

BURUNDI

$5,240,211 distributed in cash assistance. 69,621 households reached with core relief items. 204,651 people of concern received hygiene supplies. After Burundi's 2020 elections, the Government strengthened engagement with the international community including humanitarian actors. The overall working environment and the political and security situation improved, although reports of human rights abuses continued. In line with the New Partnership for Africa's Development, UNHCR provided refuge, protection, assistance and access to aid for an estimated 313,000 Burundian refugees, mainly in Rwanda, the Democratic Republic of the Congo and the United Republic of Tanzania. UNHCR pressured for their inclusion in national COVID-19 responses. Food shortages grew, leading to negative coping mechanisms, including increased violence and premature returns. COVID-19 disrupted schools, reduced healthcare services and constrained access to registration, asylum and voluntary repatriation. Although food screenings, isolation facilities and protective equipment, lending and social distancing added unplanned costs to the repatriation movements. UNHCR helped 40,000 refugees to return from Burundi, the United Republic of Tanzania, bringing the total returns to Burundi to close to 120,500 since voluntary repatriation agreements began in 2017. UNHCR did not promote returns but continued to support those who expressed an interest in returning home voluntarily.

SOUTH SUDAN

Over 2.2 million South Sudanese refugees were hosted in the Democratic Republic of the Congo. Ethiopia, Kenya, Sudan and Uganda at the end of 2020, the largest refugee crisis in Africa since independence. In 2020, 1.3 million new displacements, 70% due to flooding. Most remained in need of urgent humanitarian assistance. As well as providing direct support for protection, assistance and solutions for the most vulnerable, UNHCR and partners helped build the Government's capacity to implement comprehensive protection and solutions for 3.3 million people of concern.

SOUTH SUDAN

Over 2.2 million South Sudanese refugees were hosted in the Democratic Republic of the Congo. Ethiopia, Kenya, Sudan and Uganda at the end of 2020, the largest refugee crisis in Africa since independence. In 2020, 1.3 million new displacements, 70% due to flooding. **GLOBAL REPORT 2020**

**UNHCR'S PROGRAMMATIC RESPONSE**

### CHILD PROTECTION

26,345 unaccompanied or separated children had a best interests assessment initiated or completed.

### GENDER-BASED VIOLENCE

12,577 gender-based violence incidents reported for which survivors received psychosocial counselling.

### CORE RELIEF ITEMS

861,752 households provided with core relief items.

### HEALTH

0.96 under-5 mortality rate (per 1,000 under-5s per month) in refugee camps.

### SHELTER

48% of households lived in adequate dwellings.

### WASH

19 litres of portable water available on average per person per day in refugee camps.

### EDUCATION*

742,944 children enrolled in primary education.

### VOLUNTARY RETURNS

62,339 people of concern assisted to return voluntarily.

### RESSETTLEMENT

1,023,717 refugees, IDPs and other people of concern received cash assistance related to the impact of COVID-19.

**GLOBAL REPORT 2020**
Safeguarding access to protection and asylum

UNHCR urged countries in the region to uphold the right to seek asylum as pandemic-related border closures hampered access to both territory and asylum procedures. UNHCR appealed for special measures to allow asylum-seekers to be screened, quarantined and admitted, and for UNHCR to be granted access to areas where new refugees arrived. As a result, most countries in the region, including Kenya, South Sudan, Sudan and Uganda, kept borders open to refugees or exceptionally allowed them access to their territory.

COVID-19 mitigation measures, particularly restrictions on staff presence in offices, disrupted activities aimed at strengthening the capacity of State asylum systems and delayed individual refugee status determination (RSD) procedures. However, some RSD processing continued thanks to desk-based casework, the installation of plexiglass interview room-dividers, and the adaptation of case processing to allow remote interviewing and virtual status determination committee meetings.

UNHCR prioritized gender-based violence and child protection, including raising awareness and preventing and responding to specific gender-based violence risks, as well as scaling up existing helplines, increasing investment in community-based structures, training refugee workers to safely report and refer cases, and adjusting individual case management monitoring. In total, some 12,600 survivors reporting incidents of gender-based violence received psychosocial counseling.

Responding with life-saving assistance

UNHCR supported host governments, providing life-saving assistance and ensuring access to services for all refugees, with attention to the most vulnerable, and particularly those affected by the Tigray emergency in Sudan and Ethiopia, as well as new arrivals from the Democratic Republic of the Congo in Burundi and Uganda and new arrivals from South Sudan in Ethiopia, Sudan and Uganda. This included basic measures to prevent the spread of COVID-19 in all refugee camps and settlements: improving health facilities and water and sanitation services and investing in risk communication and community engagement. Over 6 million people of concern to UNHCR accessed essential health care services in the East and Horn of Africa and the Great Lakes.

All countries in the region organized information campaigns about COVID-19 in areas inhabited by refugees, IDPs and others of concern. When schools closed, UNHCR supported remote education approaches, including broadcasting lessons over the radio. It installed handwashing facilities in schools and supported other measures to help them eventually reopen safely. A total of 323,770 children and youth across the region were supported with distance/home-based learning by the end of the year.

Life-saving interventions targeted those most adversely impacted by the COVID-19 pandemic, particularly people whose livelihoods, well-being and dignity were affected. Refugees and IDPs in several countries in the region including Djibouti, Ethiopia, Kenya, South Sudan, the United Republic of Tanzania, and Uganda were seriously affected by WFP food ration cuts.

Cash assistance to urban refugees represented a lifeline for those who had suffered income loss, gender-based violence, food insecurity including malnutrition, or mental health issues. UNHCR disbursed $30.2 million in cash assistance across the region, and 1 million refugees, IDPs and other people of concern received COVID-19-specific cash assistance.

Seeking durable solutions for protracted refugee situations

With the exception of Burundi, most facilitated refugee returns were suspended as a result of the pandemic. Returns in other locations such as Somalia and South Sudan slowly resumed in the second half of the year, with COVID-19 preventive measures in place. In total, some 165,000 refugees returned to their countries of origin during the year, including over 40,900 facilitated returns to Burundi and almost 122,000 self-organized returns recorded in South Sudan. Some 600 Somalis were assisted to return, while the rest who returned on their own did so spontaneously.

The Solutions Initiative for South Sudan and Sudan, involving both Governments, led by the Intergovernmental Authority on Development (IGAD) and supported by UNHCR, was launched at the end of 2020 to advance comprehensive solutions for both countries’ forcibly displaced populations and to seek international solidarity on early recovery needs. The pandemic also severely disrupted resettlement processes. Movement restrictions and remote-working arrangements resulted in a decrease in the identification, interviews and submissions of refugees in need of resettlement. COVID-19 also forced the suspension of departures for several months, with only 4,831 refugee departures facilitated by UNHCR in the region in 2020, a 74% decrease.

UNHCR also submitted 9,179 resettlement cases from the region for resettlement consideration to third countries, 62% fewer than in 2019.

Ensuring protection and durable solutions for IDPs

The 2019 *Policy on UNHCR’s engagement in situations of internal displacement* continued to guide UNHCR’s coordination responsibilities and operational response for IDPs in Burundi, Eritrea, Somalia, South Sudan and Sudan. UNHCR’s protection monitoring was, however, significantly hampered by the pandemic.

In Burundi, broad-based consultations undertaken by the UNHCR-led Protection Cluster informed a new road map for strengthening IDP protection. In Ethiopia, UNHCR extended its leadership role in the protection and other clusters to the Tigray region, in response to displacements following the outbreak of conflict in November 2020. In Somalia, UNHCR’s IDP response focused on remote protection monitoring, community engagement and risk communication.

In South Sudan, UNHCR significantly scaled up shelter and other support for IDPs affected by local violence, flooding and COVID-19. In Sudan, UNHCR increased its information management capacity to support the Protection Cluster with protection monitoring and operational responses, as well as in the Durable Solutions Working Group.

In Ethiopia, while there was minimal progress in gaining access to the displaced populations affected by the conflict in Tigray despite coordinated advocacy by UNHCR, humanitarian partners and donors, UNHCR provided protection and assistance to 400,000 IDPs across other parts of Ethiopia.
Reducing and preventing statelessness
The pandemic forced UNHCR to reorient its efforts linked to the eradication of statelessness in the region. A significant achievement was, however, realized in December 2020 when, following extensive advocacy efforts by UNHCR, Kenya announced a landmark decision to grant citizenship to 1,670 stateless Shona and 1,300 stateless persons of Rwandan descent. Other significant achievements included the adoption of national action plans to end statelessness in Rwanda and South Sudan, and the creation of a national statelessness taskforce in Rwanda. Furthermore, the International Conference on the Great Lakes Region (ICGLR) member States endorsed a consolidated action plan on the eradication of statelessness in the Great Lakes in November 2020. The implementation of this action plan will bring positive dividends for ICGLR member States and support the implementation of member States’ pledges made at the High-Level Segment on Statelessness and the Global Refugee Forum.

Lack of reliable estimates of the number of stateless persons in the region, particularly those with undetermined nationality, remained a challenge in 2020. Regional studies highlight serious gaps in domestic nationality laws leading to statelessness, and specific qualitative profiles of groups at risk of statelessness are known in Eastern Africa.

Implementing pledges made at the Global Refugee Forum
While the COVID-19 pandemic has limited multi-stakeholder consultations and slowed the implementation of many Global Refugee Forum pledges in the region, a number of countries including Ethiopia, Kenya, Rwanda, Somalia and Uganda have made progress by developing country-level action plans and roadmaps.

In Burundi, the Agence Universitaire de la Francophonie provided scholarships to 20 refugee students in Ngozi Province. Uganda’s Ministry of Health worked with stakeholders to support refugees’ inclusion in national health services, accrediting about 70% of facilities in refugee-hosting districts by year-end. The Government of Uganda also included refugees in the resource allocation formula for refugee-hosting districts.

New partner TECNO supports COVID response and education in Kenya
In 2020, TECNO, a premium smartphone brand of TRANSSION Holdings, became UNHCR’s first Chinese corporate partner. It supported education in the难提1地块 camp in Kenya, as part of the joint Educate A Child programme from UNHCR and Education Above All Foundation. In the context of COVID-19, TECNO also donated surgical masks to UNHCR in Kenya to support the COVID-19 response, as well as tablets to support refugee children in Kenya’s refugee camps with connected learning.

Consequences of underfunding
UNHCR’s financial requirements in the East and Horn of Africa and the Great Lakes region were 47% funded in 2020. The impact of underfunding compounded with COVID-19 seriously affected the delivery of protection and assistance to people of concern. Operations were forced to divert precious resources away from regular programmes to respond to the pandemic. While funding for the rollout of the new gender-based violence policy was secured, gender-based violence and child protection activities remained underfunded across operations, despite a reported increase in incidents of gender-based violence across the region during the pandemic.

Funding constraints also affected the provision of food to refugees, with WFP food ration cuts affecting over 3.3 million (72% of the total refugee population) including in Djibouti, Ethiopia, Kenya, South Sudan, the United Republic of Tanzania and Uganda. Ration cuts worsened the food security and nutrition situation of refugees, causing increased malnutrition in children and other vulnerable groups. Negative coping strategies such as skipping or reducing meals, taking high-interest loans, selling assets, child labour, and increased domestic violence were also reported as a result of food ration and cash cuts. Limited support for livelihood activities also affected refugees’ self-reliance, leading to harmful coping mechanisms and compounding protection risks.

Previous gains made in relation to the self-reliance of people of concern in the region were also negatively impacted by the economic toll of the pandemic on host countries. Funding shortfalls meant that only 27% of refugees in the region were able to access distance learning programmes during the prolonged school closures. When schools reopened, refugee students were slow to return due to limited classrooms and a shortage of teachers as a result of social distancing protocols. Lack of water, sanitation and hygiene facilities in schools continued to hinder school reopenings and the safe return of refugee students. Despite new emergencies in the region, including in the Democratic Republic of the Congo, Ethiopia and South Sudan, Refugee Response Plans across the region remained poorly funded.

MOJAR SITUATIONS IN 2020

THE DEMOCRATIC REPUBLIC OF THE CONGO

66,429 IDP households received cash grants for basic and domestic items.
118,467 people of concern reached with core relief items.
The humanitarian situation in the Democratic Republic of the Congo remained complex in 2020, particularly in eastern provinces. 5.2 million people remained internally displaced, while more than 861,000 Congolese refugees and asylum seekers were hosted in neighbouring countries. UNHCR strengthened its emergency support in North Kivu, South Kivu and Ituri provinces, in line with UNHCR’s IDP policy. 44,429 IDP households received cash grants for basic and domestic items. The situation was characterized by the large number of IDPs, a complex security situation that caused repeated internal displacement, and limited resources for humanitarian actors to provide protection and assistance to IDPs. These factors contributed to onward displacement to neighbouring countries.
Under the 2020 Regional Refugee Response Plan for the Democratic Republic of the Congo, UNHCR led 66 partners in seven neighbouring countries of asylum to provide multisectoral assistance, protection and solutions.
While humanitarian assistance was an essential component of UNHCR’s response, promotion of sustainable livelihoods and inclusion of refugees into national development plans were also prioritized, reflecting the whole-of-society approach of the Global Compact on Refugees.

66 partners in seven neighbouring countries of asylum to provide multisectoral assistance, protection

and solutions.

66 partners in seven neighbouring countries of asylum to provide multisectoral assistance,
protection and solutions.

While humanitarian assistance was an essential component of UNHCR’s response, promotion of sustainable livelihoods and inclusion of refugees into national development plans were also prioritized, reflecting the whole-of-society approach of the Global Compact on Refugees.
### Key Results and Trends in 2020

#### UNHCR’s Programmatic Response

**Child Protection**
- 1,651 unaccompanied or separated children had a best interests assessment initiated or completed.
- 2.3% increase.

**Gender-Based Violence**
- 3,390 gender-based violence incidents reported for which survivors received psychosocial counselling.
- 128% increase.

**Core Relief Items**
- 124,164 households provided with core relief items.
- 8% increase.

**Health**
- 1,05 under-5 mortality rate (per 1,000 under-5s per month) in refugee camps.
- 8% increase.

**Health**
- 68,020 women received sanitary materials.
- 94% increase.

**Wash**
- 19 litres of potable water available on average per person per day in refugee camps.
- 19% increase.

**Safeguarding Fundamental Rights**
- 63,374 children enrolled in primary education.
- 7% increase.

**Mental Health**
- 9,494 students enrolled in secondary education.
- 12% decrease.

**Self-Reliance**
- 236 people of concern enrolled in vocational training.
- 92% decrease.

**Voluntary Returns**
- 4,675 refugees assisted to return voluntarily.
- 57% increase.

**Reintegration**
- 76,547 people of concern received emergency shelter.
- 6% increase.

- 62% of households lived in adequate dwellings.
- 12% increase.

**Voluntary Returns**
- 1,371 reintegration submissions.
- 94% increase.

**Education**
- 63,374 children enrolled in primary education.
- 7% increase.

**Voluntary Returns**
- 1,342 people of concern were reached by CO teams.
- 7.6% increase.

**Wash**
- 62% of households had a drop-hole latrine or drop-hole toilet.
- 1.1% decrease.

**Safeguarding Fundamental Rights**
- 1,162 people of concern received tertiary education scholarships.
- 33% decrease.

**Voluntary Returns**
- 228 children had a best interests assessment.
- 69% increase.

**Wash**
- 6,734 people of concern accessed services.
- 94% increase.

**Safeguarding Fundamental Rights**
- 13,690 people of concern provided with mental health and psychosocial support services.
- 96% decrease.

**Wash**
- 5,603,951 people of concern received essential health care services.
- 4% increase.

**Safeguarding Fundamental Rights**
- 8,129 refugees and other people of concern provided with mental health and psychosocial support services.
- 33% decrease.

Safeguarding access to protection and asylum

UNHCR’s multi-year, multi-partner protection and solutions strategy for Southern Africa provided a strategic framework in the region to ensure access to protection and asylum. National migration and asylum systems remained underdeveloped and in need of strengthening to manage mixed movements of refugees, asylum-seekers and migrants originating from over 90 countries. To address this, UNHCR strengthened the quality and integrity of registration and refugee status determination procedures by providing technical and financial support. As the pandemic restricted access to territory, UNHCR successfully advocated for keeping asylum open. The number of people biometrically registered in the region fell 10% due to the verification exercise of South Sudanese refugees, voluntary repatriation, spontaneous returns, resettlement departures to third countries and movements outside the region. The pandemic also slowed biometric registration.

UNHCR and the Southern African Development Community (SADC) established a five-year joint action plan to support ratification of key instruments by SADC member States, strengthen research, harmonize processes and help develop appropriate policies. In the Republic of the Congo, a national asylum law was under consideration by the Government, while the Seychelles requested technical support in drafting a national legal asylum framework. Mauritius and UNHCR agreed on standard operating procedures to prevent refoulement, facilitate refugee status determination and identify solutions, while the Comoros expressed its intention to ratify the 1951 Convention relating to the Status of Refugees and the 1969 OAU Convention Governing the Specific Aspects of Refugee Problems in Africa. In line with its strategy to address mixed movements in Africa, UNHCR implemented the first year of a four-year joint project with the ILO, IOM and UNODC to support SADC member States in strengthening institutional mechanisms for asylum and migration management.

Responding with life-saving assistance

UNHCR provided protection and multisectoral assistance to people of concern and host communities affected by new emergencies and protracted displacement. Some 1.4 million refugees, IDPs and other people of concern received protection services. UNHCR’s response was anchored in national systems and development plans, with cash assistance as an integral element. Cash assistance was introduced for urban refugees in South Africa who could no longer access socioeconomic opportunities and for camp-based refugees in Zambia whose livelihood opportunities were severely affected by COVID-19. Increased cash assistance helped offset WFP food rations cuts, which were seriously affecting people of concern in Angola, the Democratic Republic of the Congo, Malawi, Mozambique and Zambia. 261,400 people of concern received cash assistance to mitigate the impact of COVID-19, which caused over 1.2 million confirmed cases in Southern Africa in 2020. UNHCR programmes were adapted to observe physical distancing, with health protocols at registration and food distribution points, and hotlines and community protection structures to report protection issues and assistance needs. UNHCR’s response focused on communicating about prevention measures, strengthening health systems, reinforcing water, sanitation and hygiene services, and supporting isolation and quarantine units, particularly in refugee camps and settlements.

Seeking durable solutions for protracted refugee situations

6,275 people were assisted to return home in 2020, although border closures prompted by COVID-19 forced UNHCR to suspend voluntary repatriation operations from March onwards. Tripartite consultations continued between UNHCR, the Government of the Democratic Republic of the Congo and relevant countries of asylum regarding the voluntary repatriation of Congolese refugees and asylum-seekers. The Governments of Namibia and Burundi and UNHCR initiated discussions on repatriation of Burundian refugees from Osire camp, with “go and see” visits and intentional surveys planned for early 2021.

In Zambia, UNHCR continued its efforts to help integrate former Angolan and Rwandan refugees by supporting self-reliance and socioeconomic inclusion and moving away from encampment approaches. In Zimbabwe, the African Development Bank funded a UNHCR scheme to expand self-reliance opportunities through agricultural activities. In Namibia, some Angolan refugees received legal assistance to acquire permanent residence. Resettlement in Southern Africa was severely constrained by the COVID-19 pandemic, with third-country resettlement decreasing from around 3,800 submissions in 2019 to 1,371 submissions in 2020. In line with UNHCR’s three-year, global strategy on resettlement and complementary pathways (2019-2021), UNHCR conducted training for resettlement and protection staff, including on family reunification, educational opportunities, employment opportunities, humanitarian pathways and private sponsors.

Ensuring protection and durable solutions for IDPs

By the end of 2020, the Southern Africa region hosted around 6 million IDPs, mainly in the Democratic Republic of the Congo and Mozambique. Violence in eastern Democratic Republic of the Congo pushed the number of IDPs to 5.2 million by the start of 2021. UNHCR allocated additional funding for shelter in the Democratic Republic of the Congo, improving the lives of over 175,000 people, having identified vulnerable families and durable solutions thanks to close cooperation between Shelter Protection and Camp Coordination and Camp Management Clusters. UNHCR also sought to reinforce host families by providing support for additional rooms and housing on their land, and by improving living conditions for families who have been residing at overcrowded sites for years by using a villagization approach. A deteriorating security situation in Cabo Delgado Province in north-eastern Mozambique displaced 53,000 people in Cabo Delgado. Over 90% remained in the province and others fled to the neighbouring Nampula (9%) and Niassa Provinces. UNHCR led the Protection Cluster and actively participated in the Shelter Cluster and Camp Coordination and Camp Management Cluster. UNHCR scaled up operations in northern
provinces and worked with partners and the Government to increase protection services and promote humanitarian access. UNHCR also prioritized gender-based violence prevention and response activities.

Reducing and preventing statelessness

Positive steps were taken towards reducing and preventing statelessness in Southern Africa, although the pandemic slowed progress. The Republic of the Congo, the Democratic Republic of the Congo, Namibia and Zambia made progress towards accession to the Statelessness Conventions with support from UNHCR. Furthermore, UNHCR provided technical support to the Republic of the Congo and Eswatini, following their adoption of national action plans to end statelessness. Areas of focus included reforming nationality laws and enhancing civil registration systems. National plans were awaiting formal endorsement by Angola, the Democratic Republic of the Congo, Madagascar, Namibia and Zambia. Data collection efforts on the risk of statelessness, profiles and size of affected populations in a number of countries were initiated and supported by UNHCR. Legal aid was provided to some 2,000 people of concern in Madagascar, Mozambique and South Africa, with a view to providing access to documentation or to confirming nationality. Approximately 500 people of concern had their nationalities confirmed.

Implementing pledges made at the Global Refugee Forum

During the 2019 Global Refugee Forum, the region demonstrated extraordinary political will to support the Global Compact on Refugees, with 69 pledges covering refugee integration, registration and access to identity cards, agricultural land and work permits, higher education, asylum procedures and legal frameworks. States submitted additional pledges at the Forum and the High-Level Segment on Statelessness. Twelve States and four organizations in Southern Africa provided 65 pledges, the second highest among UNHCR’s seven regions. 70% of pledges reported are at the implementation or planning stage.

In Zambia, 1,054 refugee and host community farmers were included in national agriculture input support programmes. More than 2,300 people of concern in Madagascar, Mozambique and South Africa had their nationalities confirmed. Approximately 500 people of concern had their nationalities confirmed.

Consequences of underfunding

COVID-19 compounded difficulties in the region and obliged UNHCR to reallocate from a chronically underfunded budget, providing pandemic-related cash assistance to 261,359 people of concern. The unmet needs were often acute: in the Democratic Republic of the Congo, only 29% of survivors of gender-based violence received medical aid, 15% got legal aid, and 1 in 200 got livelihoods support. Across the country, UNHCR’s assistance reached fewer than half of those identified as having specific needs. In the north-west, a shortfall in resources undermined standards of health care for Central African refugees. Underfunding also affected UNHCR’s ability to meet basic needs in Dzaleka refugee camp in Malawi, where 46,000 mainly Burundian, Congolese and Rwandan refugees and asylum-seekers occupied a site meant for 10,000. Access to clean water increased from 8.6 litres per day per person in 2019 to 12 litres, still barely above half the minimum standard of 20 litres. The congested camp, relying on a health centre serving 80,000 people, was unable to provide assistance to the growing number of people in need of services. Across the region, COVID-19 kept 83,000 children out of school, but UNHCR could only support 2,405 with distance learning. In the Republic of the Congo, there was too little funding to build classrooms, pay volunteer teachers and buy school supplies for children, leaving overcrowded primary schools at risk of COVID-19 and unable to provide quality education. In Angola, UNHCR had planned an employment initiative for vulnerable urban refugees whose undocumented status made it hard to find work and access basic services, as well as putting them at risk of detention and exploitation. However, COVID-19 made it impossible for UNHCR to cover the needs of extremely vulnerable families, forcing it to halt the jobs scheme. Under-investment in agriculture and livelihoods in Eswatini and Namibia delayed refugees self-reliance and UNHCR’s planned phase-out of operations. In Zambia, most refugees lived in dilapidated or inadequate shelters, and reception facilities were below minimum standards for humanitarian and psychosocial needs.

GLOBAL REPORT 2020
Aishetu fled her village in north-east Nigeria with her eight children after her husband was murdered by an armed group that threatened to kill her as well. Now she lives in Bakassi IDP camp where she runs her own small shop selling snacks and sodas. She not only provides for her own family, but also cares for 16 IDP children orphaned by the same violence that left her a widow. She hopes that through education, her children can grow and help those around them.

“I don’t need anything except education for my children.”

—Aishetu, Nigerian IDP

with a 10% rise in IDP-refugee and a 22% increase in Cameroonian refugees in Nigeria, where UNHCR assisted more than 500,000 Cameroonian, providing food assistance to refugees and IDPs and coordinating out-of-camp approaches with local authorities to strengthen national services and support displaced populations and their hosts in south-east Nigeria. UNHCR distributed pre-refugee items to 71,625 households in Cameroon and Nigeria, in addition to Government efforts to provide documentation to IDPs and returning populations, ensuring that 2,874 IDPs received identity documents. UNHCR undertook protection monitoring and set up a gender-based violence response adapted to COVID-19 and security risks.

UNHCR undertook protection monitoring and set up a gender-based violence response adapted to COVID-19 and security risks.
KEY RESULTS AND TRENDS IN 2020

UNHCR’S PROGRAMMATIC RESPONSE

**CHILD PROTECTION**
- 2,021 unaccompanied or separated children had a best interests assessment initiated or completed.
- 1,286 gender-based violence incidents reported for which survivors received psychosocial counselling.

**CORE RELIEF ITEMS**
- 65,227 households provided with core relief items.
- 39,919 women received sanitary materials.

**HEALTH**
- 0.39 under-5 mortality rate (per 1,000 under-5s per month) in refugee camps.
- 96% of births in refugee camps were attended by skilled personnel.

**SHELTER**
- 159,111 people of concern received emergency shelter.
- 37% of households lived in adequate dwellings.

**WASH**
- 16.3 litres of portable water available on average per person per day in refugee camps.
- 24% of households had a drop-tank or drop-hole toilet.

**EDUCATION**
- 165,024 children enrolled in primary education.
- 30,493 students enrolled in secondary education.

**SELF-RELIANCE**
- 8,990 people of concern enrolled in vocational training.
- 9,493 people of concern assisted to return voluntarily.

**RESETTLEMENT**
- 1,858 resettlement submissions.

**VoLUNTEERED RETURNS**
- 45,951 children and youth supported with distance/home-based learning.

**UNHCR’S COVID-19 RESPONSE**
- 4,550,163 refugees, IDPs, and other people of concern accessed protection services.
- 1,051,337 refugees and other people of concern accessed emergency health care services.
- 113,481 refugees and other people of concern provided with mental health and psychosocial support services.

*Two countries reporting in 2020; compared to three countries reporting in 2019.
**While enrolment rates for the school year were high, a majority of those enrolled did not attend school due to COVID-19 restrictions.*
In 2020, UNHCR worked to maintain access to asylum in all countries in West and Central Africa and across the globe, including in Chad and Niger. A new asylum law was adopted in Chad that aimed to strengthen protection of the 483,000 refugees and asylum-seekers currently residing in the country. It would also guide the establishment of an efficient national asylum system, pursued under the Asylum Capacity Support Group mechanism, and a fair refugee status determination process. A new technical committee to reform the institutional and normative asylum system in Niger was established.

**Responding with life-saving assistance**

In 2020, UNHCR mobilized to respond to the pandemic across West and Central Africa. UNHCR supported the construction of over 50 isolation and quarantine centres and the rehabilitation or construction of 60 health facilities, including in Cameroon, Chad, Nigeria and Niger. It also helped to train over 500 community health workers and over 300,000 people received emergency relief items. UNHCR was able to reach over 1.5 million people across the region. The agency also strengthened its support to UNHCR’s 2,000 teachers to ensure safe practices. The return to school was also supported through community messaging, grants and cash assistance, transportation allowances and distribution of school kits.

In response to the situation in the central Sahel, UNHCR and partners provided some 115,000 people with essential health care services and almost 14,000 people (including children, parents and primary caregivers) with mental health and psychosocial support. Around 11,400 households found to be most vulnerable and affected by COVID-19 were provided with livelihoods support. In addition, around 40,000 people of concern received shelter support and some 15,900 households were provided with core relief items and unrestricted cash grants, while over 850,000 people benefited from protection services.

UNHCR’s renewed engagement in IDP responses is expected to help in addressing critical needs, particularly where there is a surplus in internal displacement, and to engage more States on durable solutions where there are protracted IDP situations.

**Finding durable solutions for protracted refugee situations**

Finding durable solutions remained a priority across the region. Despite security challenges, the Government of Niger and UNHCR were able to close Malian refugee camps in early 2020 as refugees integrated in host communities. This initiative was supported through partnerships with development and humanitarian actors. The multi-year Refugees and Host Communities Support Project programme, financed by the World Bank and supported by UNHCR, benefited over 160,000 refugees and host community members in Niger by funding livelihoods opportunities and strengthening access to basic public services. A total of 6,800 refugees in Chad received similar support from the World Bank and the Government of Chad, and similar projects were underway in Burkina Faso and Cameroon. UNHCR continued implementing its “alternatives to camp” initiative, which works to sustainably integrate new arrivals into host villages and aims to convert 30% of refugee camps into villages by 2024. In Ghana, nearly 2,000 former Liberian refugees had their five-year residency permits renewed thanks to UNHCR’s continued advocacy, allowing them to continue to work legally. Although voluntary repatriation efforts were severely impacted due to COVID-related border closures and post-electoral violence forced UNHCR to suspend its return programmes in the region, UNHCR assisted almost 5,000 Central African refugees and around 330 Ivorian refugees to return home in the first half of 2020. Additionally, more than 5,000 Malian refugees decided to return to Mali due to the dire security situation in Burkina Faso, and were assisted by UNHCR through documentation, a cash grant for transportation, and a reintegration grant upon arrival.

Despite travel restrictions linked to the COVID-19 pandemic, over 590 of the most vulnerable refugees in the region were able to depart for resettlement in 2020. This achievement was made possible by the rapid rollout of COVID-19 prevention measures and remote interview procedures. Focused information sharing and counselling efforts targeted those affected by resettlement departure delays. Reinforcement of anti-fraud prevention, detection and response mechanisms, in line with UNHCR’s policy addressing fraud, ensured robust levels of integrity within resettlement activities across key resettlement operations.
Reducing and preventing statelessness

Efforts to address statelessness continued to bear tangible results in terms of data collection, legal reforms and research. A 2019 mapping exercise in Côte d’Ivoire revealed that over 954,000 persons were stateless or at immediate risk of statelessness, highlighting the severity of the issue. In September 2020, Côte d’Ivoire became the first African country to establish statelessness determination procedures. This will allow stateless individuals to access the rights enshrined in the 1954 Statelessness Convention. The Governments of Nigeria and Sierra Leone also adopted national action plans to address statelessness.

In Mali, recommendations from the final report of the study on statelessness will help inform the country’s national action plan. In December 2020, a stocktaking event was convened by the Economic Community of West African States (ECOWAS), the Economic and Monetary Community of Central Africa (CEMAC) and UNHCR, during which a regional roadmap was adopted to guide the implementation of the pledges made at the High-Level Segment on Statelessness.

In 2020, 60 trainees from 30 countries participated in the second statelessness and nationality course in French, which was organized by the Catholic University of Central Africa and UNHCR in Cameroon. Implementing pledges made at the Global Refugee Forum.

Of the 133 pledges relating to West and Central Africa made at the High-Level Segment on Statelessness in October 2019 and at the Global Refugee Forum in December 2019, one was fulfilled in 2020 and six are in progress.

Chad’s asylum law made it one of the first countries in the region to fulfill a pledge made during the 2019 Global Refugee Forum. The law ensures fundamental protections for refugees and asylum-seekers, including freedom of movement, the right to work and access to health care, education, and justice, and conforms to international standards enshrined in the 1951 Refugee Convention and its Protocol and the 1969 OAU Convention on Refugees. The Asylum Capacity Support Group reinforced the capacities of Chad and Niger’s asylum systems, with the support of France.

Consequences of underfunding

The effects of underfunding were reflected in the response to the COVID-19 emergency. Throughout the region, operations struggled to mobilise resources to respond to the secondary effects of the health crisis: an increase in incidence of gender-based violence, a rapid reduction in livelihoods opportunities, and thousands of displaced children out of school due to the pandemic.

In 2020, underfunding in the Central African Republic meant that two out of every three IDPs (more than 400,000 people) were not able to receive important core relief items and shelter support. Cameroon hosted more than 316,000 Central African refugees by the end of 2020, but over 60% did not receive food assistance, 30% did not have access to safe drinking water, and 34% of refugees still lived in substandard emergency shelters due to a lack of funding. Despite increased health needs due to the COVID-19 pandemic, there were 40 health centres in Cameroon that UNHCR was not able to financially support.

The effects of underfunding were also significant in the Nigeria situation. An estimated 36,000 IDPs in Nigeria’s Diffa region were not registered due to lack of funding. In Nigeria, of nearly 210,000 IDP households surveyed, more than 20% were living in damaged or makeshift shelters.

The repercussions of underfunding were profoundly felt in the Sahel. While violence and the COVID-19 pandemic kept thousands of displaced children out of school in the region, 80% did not have access to distance learning programmes. In Mali, UNHCR was only able to address the shelter and core relief item needs of 30% of the displaced population.

In May 2020, Venezuelan asylum-seeker José Domingo Díaz and his family had no family income, after José’s new job opportunity in Santiago, Chile, disappeared because of the COVID-19 emergency. UNHCR’s e-vouchers are helping families affected by the pandemic.

© UNHCR/Hugo Fuentes

“We were making great progress towards integration in Chile, but the pandemic has changed our lives again.”

—José Domingo Díaz, Venezuelan asylum-seeker in Chile
MAJOR SITUATIONS IN 2020

VENEZUELA SITUATION

The outflow of over 5 million refugees and migrants from the Bolivarian Republic of Venezuela represents the world’s second-largest external displacement crisis. The COVID-19 pandemic, exacerbated risks, and many displaced Venezuelans lost their jobs and could not afford food or shelter. Facing eviction, exploitation and abuse, with limited or no access to healthcare and social protection, around 150,000 saw no option but to return when the pandemic struck, but increasing numbers left again as restrictions on movement eased. With borders still closed, movements were mostly irregular, adding to the risks. Within the country, UNHCR assisted 600,000 people at risk of displacement, on the move or returning in 2020.

UNHCR and IOM led the Regional Inter-Agency Coordination Platform, coordinating the response for 3.18 million refugees and migrants from the Bolivarian Republic of Venezuela and communities in 17 Latin American and Caribbean countries. UNHCR also boosted the Quick process and the organization of a donor conference that pledged $2.8 billion in loans and donations for host governments and humanitarian partners.

VENEZUELA

1,502 individuals and 54 community leaders were provided with legal assistance. Conducting protection monitoring. Collaboration with the Ombudsperson, local authorities and communities allowed the legalization of 18 informal settlements hosting IDPs and refugees and migrants from the Bolivarian Republic of Venezuela.

COLOMBIA

32,000 IDPs and host communities assisted with documentation. COVID-19, new internal displacement and violence by irregular armed groups limited progress on solutions for IDPs. COVID-19 related restrictions continued humanitarian access, as did irregular armed groups, who worked control over communities and restricted the mobility of 61,450 people. Indigenous and Afro-Colombian communities along the Pacific and border areas were particularly affected. Despite national efforts to implement the Peace Agreement, the UN verification mission in Colombia reported 378 community leaders were killed since 2016. Also, according to OCHA, 185 people were victims of anti-personnel mines in 2020.

UNHCR complemented Colombia’s institutional response, providing life-saving assistance and conducting protection monitoring. Collaboration with the Ombudsperson, local authorities and communities allowed the legalization of 18 informal settlements hosting IDPs and refugees and migrants from the Bolivarian Republic of Venezuela.

EL SALVADOR, GUATEMALA AND HONDURAS

$13.1 million distributed in cash assistance. Economic, political, humanitarian, social and climatic factors—combined with chronic gang violence, human rights violations and food insecurity—promoted large mixed movements and a steady exodus of individuals, families and unaccompanied children. Nicaragua registered 45,930 asylum claims in 2020. 58% of the 2019 figure, but substantially higher than in 2018 when the Mexican Commission for Refugee Assistance registered 20,000 claims. With border displacement increasing, UNHCR provided critical protection and asylum systems regionally, the Comprehensive Regional Protection and Solutions Framework (known as MRPS or the Spanish acronym) sought to expand the operational capacity of Belize, Costa Rica, El Salvador, Guatemala, Honduras, Mexico and Panama to respond and find solutions. During El Salvador’s rotating presidency, as part of the Global Refugee Forum commitments, a MRPS Support Platform was created, with Spain currently holding the presidency.

NIGERIA

With borders closed, the number of Nigerians seeking international protection grew slightly in 2020, despite COVID-19 and tropical storms compounded with a complex political and socioeconomic situation. In Costa Rica, UNHCR helped 5,327 Nicaraguan households with cash assistance. COVID-19 related border restrictions added risks to the use of irregular routes and limited the possibility to access asylum. Despite the efforts of most governments, the economic distortions caused by the pandemic prompted return movements in adverse conditions to Nicaragua.

UNHCR and partners sought to strengthen asylum systems in host countries, with cash assistance and Nigerians’ inclusion in public health systems helping to facilitate their socioeconomic integration.
KEY RESULTS AND TRENDS IN 2020

UNHCR’S PROGRAMMATIC RESPONSE

REGISTRATION

Evolution compared to 2019

- 1 million individual registration records in PRIMES proGres v4.
- 143,418 individuals (5 years and above) with biometric records in PRIMES.

PROTECTION

- 246,449 people of concern received legal assistance.
- 1,111 border monitoring visits conducted and recorded.

GENDER-BASED VIOLENCE

- 10,744 gender-based violence incidents reported for which survivors received psychosocial counselling.

CHILD PROTECTION

- 5,499 partner and government staff received training on child protection and children’s rights.

CASH ASSISTANCE

- 116,389 households supported with cash to meet basic needs.

CORE RELIEF ITEMS

- 113,644 households received core relief items, including seasonal support.

SHELTER

Evolution compared to 2019

- 246,490 individuals supported with reception conditions, including accommodation in reception/transit centres, emergency, transitional and long-term/permanent shelter.
- 652 shelters or settlement infrastructure supported by UNHCR (constructed, rehabilitated, improved, maintained or established).

COMMUNITY-BASED PROTECTION

- 352 community-based committees, groups or other structures supported or strengthened.

SELF-RELIEANCE

- 36,144 people of concern advised on financial management.

RESETTLEMENT

- 16,460 resettlement submissions.

GLOBAL REPORT

2020

Table of content

OVERVIEW OF 2020

3 Foreword by the High Commissioner and the Special Envoy’s message
4 UNHCR in 2020
5 Key data and achievements
6 Map of populations of concern
7 Global Strategic Priorities
8 Priority areas of concern for UNHCR in 2020
9 UNHCR’s engagement in situations of internal displacement
10 Climate action
UNHCR implemented community-based initiatives to prevent displacement and protect those at heightened risk, such as children, youth, and community leaders. In El Salvador, the Active Families initiative helped 120 families of eight high-risk communities to gain awareness on rights of the displaced population, protection of children and prevention of gender-based violence. The Office rapidly responded to the needs of those suffering the devastating impact of Tropical Storm Eta and Hurricane Iota in Honduras, many of whom were IDPs or at risk due to the deteriorating security situation and violence in their communities. In Colombia, progress in legalizing informal settlements—inhabited by Colombian IDPs and returnees and Venezuelan refugees and migrants—represented important steps towards solutions. Colombia’s Victims and Land Restitution Law was also extended until 2031.

Reducing and preventing statelessness
UNHCR strengthened its partnership with the Organization of American States’ Universal Civil Identity Program in the Americas, and the Latin American and Caribbean Council for Civil Registration, Identity and Vital Statistics. This partnership helped towards achieving full access to documentation and civil registry services by people of concern and enhancing the capacity of national civil registries for the prevention and reduction of statelessness. As part of this collaboration, two joint reports were published: “Emergency response of civil registry and identification offices during the COVID-19 pandemic: good practices, mechanisms and facilities implemented in the Americas”, and “Regional study on late birth registration, issuance of nationality documentation and statelessness”.

In Argentina, the adoption of a new law allowed administrative procedures for late birth registration and the admission of evidence to prove the place of birth. In Colombia, 50,791 children born in Colombia to Venezuelan parents acquired Colombian nationality by December 2020. Through the “Primeros Niños” project, Mexico modified its constitution to allow the transfer of nationality by law to children of naturalized parents.

Implementing pledges made at the Global Refugee Forum
UNHCR furthered States and other actors in the implementation of the pledges submitted at the Global Refugee Forum and the High-Level Segment on Statelessness in the areas of asylum capacity-building, education, civil registration, jobs and livelihoods, infrastructure, access to services and inclusion on national systems and solutions and statelessness. As such, the Mexican national system for children and adolescents harmonized child, migration, and asylum legislation to eliminate child detention. Under the UNICEF-UNHCR blueprint, joint action plans were drafted in Ecuador and Peru. The Office rapidly responded to the needs of those suffering the devastating impact of Tropical Storm Eta and Hurricane Iota in Honduras, many of whom were IDPs or at risk due to the deteriorating security situation and violence in their communities. In Colombia, progress in legalizing informal settlements—inhabited by Colombian IDPs and returnees and Venezuelan refugees and migrants—represented important steps towards solutions. Colombia’s Victims and Land Restitution Law was also extended until 2031.

Reducing and preventing statelessness
UNHCR strengthened its partnership with the Organization of American States’ Universal Civil Identity Program in the Americas, and the Latin American and Caribbean Council for Civil Registration, Identity and Vital Statistics. This partnership helped towards achieving full access to documentation and civil registry services by people of concern and enhancing the capacity of national civil registries for the prevention and reduction of statelessness. As part of this collaboration, two joint reports were published: “emergency response of civil registry and identification offices during the COVID-19 pandemic: good practices, mechanisms and facilities implemented in the Americas”, and “regional study on late birth registration, issuance of nationality documentation and statelessness”.

In Argentina, the adoption of a new law allowed administrative procedures for late birth registration and the admission of evidence to prove the place of birth. In Colombia, 50,791 children born in Colombia to Venezuelan parents acquired Colombian nationality by December 2020. Through the “Primeros Niños” project, Mexico modified its constitution to allow the transfer of nationality by law to children of naturalized parents.

Implementing pledges made at the Global Refugee Forum
UNHCR furthered States and other actors in the implementation of the pledges submitted at the Global Refugee Forum and the High-Level Segment on Statelessness in the areas of asylum capacity-building, education, civil registration, jobs and livelihoods, infrastructure, access to services and inclusion on national systems and solutions and statelessness. As such, the Mexican national system for children and adolescents harmonized child, migration, and asylum legislation to eliminate child detention. Under the UNICEF-UNHCR blueprint, joint action plans were drafted in Ecuador and Peru. In Colombia, a three-month pilot with a professional service provider was launched in the border city of Cúcuta, though the lack of funds prevented its expansion to other locations.

As countries struggled to make civil registration Covid-19-compliant, UNHCR’s technical and material support might have reduced the potential for statelessness for new-borns of refugee and migrant parents, particularly in the Bolivarian Republic of Venezuela, but also for children of Venezuelan parents in other countries.

UNHCR sought to support safe houses for persons at heightened risk in El Salvador, Guatemala and Honduras, but the challenge of Covid-19 prevention meant some struggled to stay open, and there was no funding for new ones. Although indigenous people, Afro-Colombian people, women, LGBTQI+ persons and youth were...
disproportionately affected by the armed conflict in Colombia, UNHCR had limited capacity to maintain solutions-oriented programmes for them. Cases of gender-based violence spiked in countries with existing high incidence such as El Salvador and Guatemala, where more funds would have allowed UNHCR to strengthen its national response. In Ecuador, UNHCR was unable to provide specialized gender-based services in areas where sexual exploitation operates, like Guayas or Manta.

Most countries in the region imposed lockdowns and school suspensions to prevent COVID-19. UNHCR's assistance helped the most vulnerable families access remote schooling with tablets or Internet access. Others may have had similar help if funds had been available.

In 2020, one of the key priorities at UNHCR was to improve emergency health services to ensure access to health facilities, especially for COVID-19, for both Rohingya refugees and host communities in Bangladesh. Huge strides were made in the establishment of two COVID-19 hospitals in Cox’s Bazar. One of these hospitals is the Government-run hospital and the other is a UNHCR-supported hospital.

“This infrastructure has been a great support for the people of Cox’s Bazar, but also the people of this entire region. This is the only ICU unit for the entire district—not only for COVID-19, but also for any other medical emergencies.”

—Dr. Kafi Uddin Abbas, head of the ICU in Cox’s Bazar, Bangladesh
GLOBAL REPORT 2020

OVERVIEW AND KEY DATA IN ASIA AND THE PACIFIC IN 2020

Afghanistan

- 2.8 million Afghans distributed in cash assistance.
- 13,223 persons at high or medium risk received support (non-cash).
- 174 health facilities equipped, constructed or rehabilitated.

Despite escalating violence, intra-Afghan peace negotiations presented an opportunity to progress towards peace, stability, and voluntary repatriation of refugees. The Core Group of the Solutions Strategy for Afghan Refugees (SSAR) Support Platform was formed, with 17 members aiming to mobilize political, financial, technical and strategic support for implementing the SSAR. UNHCR and its partners assisted over 900,000 people of concern in priority areas for return and reintegration (PARRs).

In the Islamic Republics of Iran and Pakistan, together hosting 2.2 million registered Afghan refugees, UNHCR supported inclusive Government policies by channeling investment into the national public service delivery systems and by securing documentation for refugees. This helped make protection and assistance more effective and better targeted investments led to sustainable return and reintegration in the PARRs in Afghanistan. During the year, UNHCR facilitated 2,341,000 Afghan returns.

Myanmar

- 2.9 million Burmese and other people of concern in Myanmar.
- $808.2 million required.
- 49% of the required funding available.

UNHCR pursued comprehensive approaches to solutions for the displaced and states of Myanmar and sought to create conditions conducive to voluntary repatriation of refugees. UNHCR and UNAMSPI implemented community-based projects in Rakhine State to expand all communities’ access to education, livelihoods and health care. UNHCR advocated for implementing the 2017 recommendations of the Advisory Commission on Rakhine State, particularly lifting discriminatory restrictions on freedom of movement and citizenship for the 805,000 Rohingya who remain in Rakhine State. Outside of Myanmar, UNHCR led efforts to protect and assist Rohingya refugees across the region. Humanitarian organizations worked closely with the Government of Bangladesh to implement COVID-19 mitigation measures for the 867,000 Rohingya refugees in Bangladesh. A total of 15,423 individuals were registered during the year.

As the situation becomes protracted, however, a range of challenges have risen, including security challenges in Rakhine State, particularly lifting discriminatory restrictions on freedom of movement and citizenship for the 805,000 Rohingya who remain in Rakhine State. Outside of Myanmar, UNHCR led efforts to protect and assist Rohingya refugees across the region. Humanitarian organizations worked closely with the Government of Bangladesh to implement COVID-19 mitigation measures for the 867,000 Rohingya refugees in Bangladesh. A total of 15,423 individuals were registered during the year.

KEY RESULTS AND TRENDS IN 2020

UNHCR’S PROGRAMMATIC RESPONSE

**REGISTRATION**
- 2.2 million individual registration records were added to PRIMES records, +58%
- 1.2 million individuals (5 years and above) with biometric records in PRIMES, +1%

**STATELESSNESS**
- 13,506 persons with undetermined nationality assisted with confirmation of nationality, -35%

**CASH ASSISTANCE**
- $26.0 million distributed in cash assistance, +68%

**CORE RELIEF ITEMS**
- 150,090 households received core relief items, -10%

**HEALTH**
- 100,000 vulnerable refugees benefited from the Islamic Republic of Iran’s Universal Public Health Insurance programme, -15%

**SHELTER**
- 90,000 people benefited from 76 community infrastructure projects, -35%

**VOLUNTARY RETURNS**
- 2,314 Afghan returnees assisted by UNHCR, -7%

**RESETTLEMENT**
- 2,654 resettlement submissions from the region, -5%
- 3,311 UNHCR-facilitated departures, -59%

**UNHCR’S COVID-19 RESPONSE**

- 1,376,608 refugees, IDPs and other people of concern accessed protection services.
- 1,475,393 refugees and other people of concern received essential healthcare services.
- 797,561 refugees, IDPs and other people of concern received cash assistance related to the impact of COVID-19.
- 49,163 women and girls accessed sexual and reproductive health services.
- 214,008 refugees and other people of concern provided with mental health and psychosocial support services.
- 17,203 children (6-59 months) admitted for treatment of severe acute malnutrition.
- 2,860 children (6-59 months) admitted for treatment of severe acute malnutrition.

TRENDS IN RESPONSE

Cash assistance by sector | 2015-2020
- Basic needs: $160.9 millions USD
- Seasonal grants: $26.0 millions USD
- Life-saving support: $18.5 millions USD

Persons with undetermined nationality assisted with confirmation of nationality | 2015-2020
- 13,506

Verified Afghan returnees | 2015-2020
- 372,577

**Figures represent Afghan whose return was facilitated by UNHCR and processed at encashment centers in Afghanistan.**
KEY ACHIEVEMENTS AND IMPACT

Safeguarding access to protection and asylum

In Asia and the Pacific, most countries were quick to include refugees and asylum-seekers in their COVID-19 responses, while working with UNHCR on prevention measures and equal access to testing and treatment. Sweeping restrictions on movement and the significant socioeconomic impact of the pandemic exacerbated refugees’ plight. However, often excluded from education, livelihoods, and social safety nets, they faced protection risks such as xenophobic hate speech, limited access to asylum, pushbacks at sea, stringent detention measures, increased domestic violence, child protection concerns and mental health issues.

UNHCR, partners and people of concern adapted their means of responding to protection needs during lockdowns. To maintain access to asylum and essential protection services, UNHCR’s operations in Asia and the Pacific adopted remote tools for community outreach, registration, status determination and resettlement processing. With support and training from UNHCR and its partners, refugees themselves continued to lead community-based protection initiatives, serving as front-line responders not only for COVID-19 but also for broader protection matters and in natural disaster preparation.

Access to territory and asylum remained a challenge. In Asia and the Pacific, only 20 of the 45 countries and territories have acceded to the 1951 Refugee Convention relating to the Status of Refugees, and many asylum seekers seek access to territory by air, an option curtailed by COVID-19-related travel restrictions. When individuals sought asylum by sea in 2020, as was the case for an estimated 2,400 Rohingya refugees, the lack of predictable and equitable regional mechanisms for disembarkation resulted in vessels being stranded at sea for months, repeated abuses by smugglers and traffickers, and the loss of as many as 200 lives.

In 2020, progress was made towards developing national asylum systems. Thailand established a national screening mechanism, although implementation was delayed partly due to the pandemic. UNHCR provided capacity-building and technical support for asylum systems across the region.

UNHCR strengthened documentation securing refugees’ rights, including legal stay, and broadened their inclusion in national systems while in exile and upon return home. In the Islamic Republic of Iran, for example, UNHCR supported the Amayesh XV exercise, which expanded the eligibility criteria for identity document renewal to include Afghan refugees who missed previous rounds of registration.

Across the region, UNHCR implemented activities to prevent and respond to risks of child protection and gender-based violence, including sexual exploitation and abuse. In Bangladesh, Malaysia and Thailand, UNHCR’s extended support to community-based organizations reinforced community networks amidst COVID-19-related restrictions. An additional 173 female refugee outreach volunteers strengthened support for vulnerable refugees, particularly young women and girls, in India.

Seeking durable solutions for protracted refugee situations

The pandemic stalled the limited opportunities for solutions in Asia and the Pacific. COVID-19 had a severe impact: hindering resettlement case identification, processing and departures; temporarily suspending facilitated voluntary repatriation to Afghanistan, Myanmar and Sri Lanka; and, in some cases, triggering premature returns or onward movements as individuals faced difficulties in host countries.

In 2020, UNHCR facilitated the return of 2,436 individuals, primarily to Afghanistan, significantly lower than 8,647 in 2019. Nevertheless, to prevent processing modalities established by UNHCR allowed some refugees in the region to access third-country solutions, including over 3,000 refugees who departed for resettlement. UNHCR’s advocacy added to momentum towards complementary pathways in the region, including the potential for small pilot programmes in the Philippines and the Republic of Korea.

UNHCR pursued comprehensive approaches for Afghan refugees and displaced and stateless Rohingya from Myanmar, and continued to seek solutions, including voluntary repatriation, for the 9,200 refugees from Myanmar encamped in Thailand. UNHCR also worked with the Governments of India and Sri Lanka towards finding a dignified and sustainable resolution of the situation of over 93,000 Sri Lankan refugees who have resided in India for decades.

This has included renewed focus on supporting voluntary repatriation as well as exploring opportunities for local inclusion for those who may qualify in India.

Ensuring protection and durable solutions for IDPs

With conflict-related internal displacement in Afghanistan, Myanmar and the Philippines, UNHCR advanced data-driven protection and solutions for IDPs in line with its policy on engagement in situations of internal displacement. Afghanistan’s IDP population grew by over 300,000 to 2.9 million. Increased violence and the global health situation drove up needs exponentially. UNHCR took an area-based approach to solutions for IDPs, consistent with its mobilization of investments in the priority areas for return and reintegration, while strengthening community-based protection mechanisms within displaced communities. This ensures support for returnees and the communities to which they return.

In Myanmar, UNHCR was part of wider United Nations efforts to support the 2019 national strategy on resettlement of IDPs and closure of IDP camps, particularly in areas where IDP solutions were achievable, such as in Kachin and northern Shan States, which have 104,000 IDPs. UNHCR advocated for over 140,000 Rohingya IDPs in Rakhine State to be allowed back to their places of origin and delivered humanitarian assistance to 106,000 others displaced in Rakhine and Chin States since 2018.

In the Philippines, UNHCR nationalized its office as it transitioned from leading the protection cluster in Mindanao. In coordination with the Government and other partners, UNHCR delivered core relief items to over 60,000 individuals and implemented some 40 quick impact projects.
Reducing and preventing statelessness

In addition to its efforts to protect the region’s largest stateless group, the 1.6 million Rohingya denied citizenship in Myanmar, UNHCR worked to reduce and prevent statelessness throughout Asia and the Pacific, supporting legal and policy reforms that resolved thousands of cases of statelessness, particularly in Central Asia, where an estimated 80,000 individuals’ nationality issues have been resolved since the #IBelong campaign began in 2014. Kyrgyzstan’s more inclusive civil registration law made it the first State in the region to completely resolve statelessness, while authorities in Uzbekistan estimate that a new citizenship law will allow 50,000 stateless residents to acquire citizenship. In 2020, some 28,400 stateless persons received citizenship in Uzbekistan and 4,200 stateless persons acquired nationality in Tajikistan. Kazakhstan adopted statelessness determination procedures and strengthened the legal basis for comprehensive birth registration. In the Islamic Republic of Iran, an amendment to the nationality law enabled and strengthened the legal basis for statelessness determination procedures, the Philippines passed legislation on the welfare of foundlings and Thailand reduced administrative requirements for civil registration and naturalization. Civil registration assessment studies were started in Pakistan, Thailand and Viet Nam to identify legal and administrative gaps that increase the risk of statelessness.

Implementing pledges made at the Global Refugee Forum

At the 2019 Global Refugee Forum, States and other entities in Asia and the Pacific made 120 pledges and other commitments towards the objectives of the Global Compact on Refugees. Despite the pandemic, progress has been made in the areas of jobs and livelihoods, protection and solutions. In 2020, UNHCR supported the convening of a business forum to facilitate refugee employment, the organization of a conference on women and peace, and the provision of pro bono legal assistance to refugee organizations. UNHCR built on the full range of pledges made at the Global Refugee Forum in the region, pursuing comprehensive approaches to solutions, expanding its evidence base through more rigorous and systematic data collection and analysis, and expanding its network of partners. Malaysia expedited its naturalization procedures, the Philippines passed legislation on the welfare of foundlings and Thailand reduced administrative requirements for civil registration and naturalization. Civil registration assessment studies were started in Pakistan, Thailand and Viet Nam to identify legal and administrative gaps that increase the risk of statelessness.

Consequences of underfunding

In 2020, operations reprioritized interventions and programme delivery to respond to critical needs arising from the pandemic. However, underfunding hampered UNHCR’s ability to meet the needs of vulnerable people of concern, most of whom were not covered by national social protection systems. In Afghanistan, despite efforts to support reintegration in priority areas, return and reintegration were hindered by a lack of livelihood opportunities and access to basic services, particularly land, shelter, education and health services. UNHCR could not provide improved access to education, health, and community infrastructure to some 280,000 individuals due to lack of funds.

In the Islamic Republic of Iran, while UNHCR made important progress in ensuring refugee access to secondary and tertiary health care, only 100,000 extremely vulnerable refugees were enrolled into the universal public health insurance, leaving many refugees uncovered. An estimated 95% of refugees in the five most refugee-populated provinces experienced a decrease in income and 45% could not find their basic needs. Twice as many vulnerable refugees approached UNHCR for unrestricted cash assistance in 2020 as in 2019, but UNHCR could support only 10% of refugees.

In Myanmar, some 8,000 IDP families experienced long-term displacement continued residing in shelters in need of construction or rehabilitation in the camps in central Rakhine State. In Kachin and northern Shan States, programmes for persons at heightened risk targeted only the extremely vulnerable, leaving many without any form of support. Shelter activities were also affected, with a shortfall of approximately 6,000 units in camps and 669 units in durable solutions sites. In Bangladesh, UNHCR’s interventions aimed to benefit both refugees and host communities. Nevertheless, gaps remained, most notably in water, sanitation and hygiene, including latrines, bathing areas, and faecal sludge treatment. The water supply in Teknaf could not be upgraded due to lack of funding. In India, Indonesia, Malaysia, Nepal and Thailand, UNHCR was able to provide cash assistance only to a limited number of people of concern requiring life-saving emergency assistance. The vulnerability of people of concern grew significantly as the pandemic made it harder to find work, children needed extra support and equipment to study, and health needs increased.

---

**Fujio Optical continues to bring clear vision to displaced communities**

Despite COVID-19, Fujio Optical continued to support refugees and host communities in 2020, including via funding to UNHCR. Although the annual Fujio Optical Vision Aid Mission had to be cancelled for the first time in 38 years, 1,500 eyeglasses were delivered to refugees in Afghanistan. Fujio Optical’s long-term commitment to refugees earned them a special award from the Japanese government as a leading Japanese private sector contributor to the achievement of the SDGs. Dr. Aki Kawa, CEO of Fujio Optical, optimist and 2026 Nansen Award Winner, is determined to continue supporting even as he approaches the age of 80.
“I feel like we have been reborn. I want to build a new, dignified life.”
—Samer, Syrian refugee
OVERVIEW AND KEY DATA IN EUROPE IN 2020

**Regional summaries**

- **Europe**

**Major situations and operations in 2020**

- **Ukraine**
  - 1,529 IDPs and conflict-affected individuals received long-term, permanent shelter.
  - 642 IDPs received cash grants, while 851 IDPs received in-kind support.
  - 11,614 IDPs and conflict-affected individuals received temporary accommodation.

**Mediterranean routes**

- 25,700 applicants provided with information on refugee status determination procedures in Cyprus, Greece and Spain.
- 9,000 asylum-seekers received legal assistance through ESTIA programme.

**Turkey**

- 2,274 arrivals funded.
- 2,366 arrivals required.
- 734,000 people of concern in Turkey.
- 1.62 million people of concern in Turkey.

**Europe**

- 72,778 arrivals in Greece.
- 636,000 arrivals in Italy.
- 10,000 arrivals in Spain.

KEY RESULTS AND TRENDS IN 2020

UNHCR’S PROGRAMMATIC RESPONSE

CHILD PROTECTION

16,700 (18%) arrivals to Europe (Bulgaria, Cyprus, Greece, Italy, Malta and Spain) were children.

10,000 child arrivals to Europe (Bulgaria, Cyprus, Greece, Italy, Malta and Spain) were unaccompanied or separated children.

1,534 children were relocated from Greece to other European countries, of whom 574 were unaccompanied.

LEGAL AID

64,747 people of concern received legal assistance.

CASH ASSISTANCE

$142.3 million distributed in cash assistance.

RECEPTION CONDITIONS

130,622 people of concern across Europe benefited from improved reception conditions.

RESETTLEMENT

55% (21,737) of global resettlement submissions were made to countries in Europe.

11,590 individuals were resettled (departed) to European countries.

50% of global resettlement departures were to countries in Europe.

52% of resettlement submissions to Europe included children.

COMMUNITY-BASED PROTECTION

80 refugee-led and community-based organizations supported.

UNHCR’S COVID-19 RESPONSE

381,152 refugees, IDPs and other people of concern accessed psychosocial support services.

510,876 refugees, IDPs and other people of concern received cash assistance related to the impact of COVID-19.

84% of countries had gender-based violence services maintained or expanded in response to COVID-19.

36,995 refugees and other people of concern provided with mental health and psychosocial support services.

1,205,113 medical masks (surgical and N95/FFP2) procured.

43 country operations reported all geographic areas inhabited by people of concern were reached by COVID-19 information campaigns.

*Beneficiaries of protection services related to the impact of COVID-19 may also have accessed specialized psychosocial services, such as mental health and psychosocial support services, in UNHCR’s regular protection services and therefore should not be considered as additional beneficiaries.

**Beneficiaries of cash assistance related to the impact of COVID-19 may also have received cash assistance within the context of UNHCR’s regular cash assistance programmes and therefore should not be considered as additional beneficiaries.
Safeguarding access to protection and asylum

When European countries began imposing restrictions to slow the spread of COVID-19, adjustments were made to asylum systems and procedures to mitigate the effects of the pandemic on access to territory. UNHCR compiled and offered States across the continent a set of practical considerations and concrete advice to enable an effective response to the pandemic, while respecting international refugee law and standards. Between the onset of the pandemic and the end of the year, the share of countries ensuring access to territory for people in need of international protection, either by law or in practice, rose significantly. Overall, 66,154 people of concern were provided with information on access to and quality of status determination procedures while 64,747 people of concern received legal assistance.

In September 2020, the European Commission proposed the new EU Pact on Migration and Asylum, which UNHCR welcomed as an opportunity to forge common ground on asylum in Europe. To support the negotiations and help find workable solutions, UNHCR issued some practical considerations on fair and fast procedures while 64,747 people of concern received legal assistance.

KEY ACHIEVEMENTS AND IMPACT

EUROPE

 Safeguarding access to protection and asylum in regions experiencing mixed population challenges in asylum systems, particularly in North Africa and the Western Mediterranean. This has been driven by uneven development of predictable search and rescue mechanisms.

Integration and accommodation programme (ESTIA) made progress with 86% of apartments transferred to the Government by the end of 2020.

When a fire at the Moria reception centre on Lesvos, UNHCR supported emergency assistance and shelter, for 12,000 of those affected.

In Georgia, following several months of hardship resulting from the closure of the administrative border line, linked to COVID-19 prevention measures, joint efforts facilitated access of some 2,300 pensioners from Gali to pensions and essential medicines by way of a humanitarian corridor across the Engrisi bridge.

COVID-19 restrictions disproportionately affected education for refugee children and youth. Across Europe, UNHCR supported distance learning and facilitated access to electronic devices, connectivity and study space. In the Russian Federation, for example, UNHCR worked with private sector partners to supply 130 mobile phones to children in asylum centres to allow them to follow lessons online.

At the end of 2020, operational engagement in Armenia and Azerbaijan, in support of government responses to the humanitarian needs of displaced people, was scaled up in response to renewed conflict with non-food items supply 130 mobile phones to children in asylum centres to allow them to follow lessons online.
adventures online. Across the region, 80 refuge-led and community-based organizations were supported—up from 50 in 2019, including a child-led network in Bulgaria. Seven European countries called for foreign-born doctors and nurses to help with the national response, and many refugees came forward. UNHCR worked closely with the Council of Europe and national recognition boards to identify refugee health workers and have their qualifications assessed through the European Qualifications Passport for Refugees initiative. This process resulted in refugees with health sector qualifications being recruited into positions matching their qualifications, while also facilitating access to higher education.

Seeking durable solutions for refugees and IDPs

In November, the European Commission released its Action Plan on Integration and Inclusion 2021-2027, an important opportunity for systematic engagement of refugees in meaningful integration and innovative housing solutions in Europe, with stronger access to decent work, health services and education. In support, UNHCR shared its recommendations during the broad-based public consultations, which included refugees and migrants. Working with partners in Ukraine, UNHCR facilitated long-term housing solutions for 1,338 IDPs and conflict-affected individuals, while a new compensation scheme for housing destroyed by the armed conflict facilitated UNHCR’s disengagement from shelter assistance in government-controlled areas. In south-eastern Europe, the Regional Housing Programme continued with UNHCR’s support, providing housing to over 1,522 vulnerable households, with a total of 7,805 households assisted since its inception.

The pandemic significantly reduced resettlement to the European Union in 2020, with only 11,150 departures recorded against the 29,500 admissions pledged. Nonetheless, certain member States adopted new ways of working to resume resettlement in the second half of the year. 52% of resettlement submissions to Europe included children. Following the European Commission’s call on EU member States to help relocate unaccompanied children living in precarious conditions on the Greek islands, 16 countries pledged 1,587 places for unaccompanied children and 3,288 places for other vulnerable persons. By December, UNHCR, with the Greek Government, the European Asylum Support Office, IOM and UNICEF, relocated 574 unaccompanied children and 1,636 vulnerable individuals. Relocation following search and rescue operations also led to 860 places being pledged and 241 transfers from Cyprus, Italy and Malta.

Reducing and preventing statelessness

Of the 40 pledges made by European States at the High-Level Segment on Statelessness in October 2019, six were fulfilled by the end of 2020. Notably, Malta and North Macedonia acceded to the 1954 and 1961 Statelessness Conventions as pledged. Albania reformed its nationality law, providing for an unrestricted safeguard to statelessness, while also facilitating access to higher education.

In 2020, the budget for UNHCR’s activities in Europe amounted to $831.7 million, of which UNHCR received 65%, with some 55% of funding tightly earmarked to country operations. Given the scale of the pandemic, additional funds were needed in 2020 to urgently support COVID-19 preparedness and response activities and meet the unforeseen additional needs of some 12 million refugees, asylum-seekers, IDPs and stateless persons hosted in Europe. Regional and country offices demonstrated flexibility and reallocated available resources to implement the activities identified as the most critical, which impacted UNHCR’s ability in some countries, to carry out its regular programmes. Nevertheless, and while programmes backed by earmarked funding continued, UNHCR continued to rely on flexible funding to respond effectively to emerging and protracted needs in the region. Flexible funding proved critical for implementation of UNHCR’s regular programmes.

UNHCR'S PROGRAMMATIC RESPONSE

REGISTRATION
2.2 million individual registration records in PRIMES ProGres v4.
3.1 million individuals (5 years and above) with biometric records in PRIMES.

CHILD PROTECTION
12,474 unaccompanied or separated children had a best interests assessment initiated or completed.

GENDER-BASED VIOLENCE
27,910 gender-based violence incidents reported for which survivors received psychosocial counseling.
1,749 gender-based violence survivors received legal assistance.
2,436 gender-based violence survivors received medical assistance.

CASH ASSISTANCE
$422.5 million distributed in cash assistance.
4,607,472 people of concern received cash assistance.

CORE RELIEF ITEMS
2,446,140 people of concern reached with core relief items.
$67.9 million in core relief items distributed.

EDUCATION
429,256 children enrolled in primary education.
35,648 students enrolled in secondary education.
4,988 people of concern received tertiary education scholarships.

SELF-RELIANCE
12% of refugees had their own business or were self-employed for more than 12 months.

RESSETLEMENT
22,566 resettlement submissions from the region.
12,394 UNHCR-facilitated departures.

TRENDS IN RESPONSE

Education enrolment | 2015-2020

Reintegration

UNHCR’S COVID-19 RESPONSE

4,047,340 refugees, IDPs and other people of concern accessed protection services.

725,896 refugees and other people of concern received essential health care services.

4,158,255 refugees, IDPs and other people of concern received cash assistance related to the impact of COVID-19.

45,153 women and girls accessed sexual and reproductive health services.

137,012 refugees and other people of concern provided with mental health and psychosocial support services.

109,765 refugee children and youth out of school due to mandatory school closures.

61,084 children and youth supported with distance/home-based learning.
Safeguarding access to protection and asylum

As COVID-19 hit, UNHCR strengthened its efforts, its capacity and its advocacy for people of concern to have safety, dignified living conditions, and solutions. This included enhancing communication with communities and multisectoral services, and face-to-face and remote case processing and management. UNHCR sought to develop its capacity to undertake age and gender approaches, and to sensitively identify international protection needs in mixed movements, trafficking and smuggling. In registering individuals, it enhanced identity management and data protection despite the need to work remotely. In 2020, there were almost 2.2 million individual registration records in PRIMES proGres v4, 19% fewer than in 2019, while 31 million individuals were biometrically registered, 10% higher than in 2019.

UNHCR advocated for non-refoulement, alternatives to detention, and to sensitively identify international protection needs in mixed movements, trafficking and smuggling. In registering individuals, it enhanced identity management and data protection despite the need to work remotely. In 2020, there were almost 2.2 million individual registration records in PRIMES proGres v4, 19% fewer than in 2019, while 31 million individuals were biometrically registered, 10% higher than in 2019.

In Syria, 70% of those receiving livelihood services through a network of 123 community centres were women and girls. In Tunisia, children made up 41% of the people served in the centres, followed by people with diverse sexual orientation and gender identity (11%), and persons with disabilities (6%). In the Middle East and North Africa, the humanitarian response to IDPs included protection interventions through cash assistance, targeted visits, outreach volunteers, call centres, social media, community centres and emergency food and shelter assistance. There were sustained efforts and significant progress in offering mental health and psychosocial support to IDPs.

Reducing and preventing statelessness

The Middle East and North Africa region is home to historical stateless populations. Conflict and displacement created new risks of statelessness. In line with the regional strategy on preventing and reducing statelessness, regional priorities were geared towards access to birth registration and civil status documentation, removal of gender discrimination from nationality laws, accession to the Statelessness Convention, and improving statelessness data in selected countries. States undertook reforms to close gaps leading to statelessness and resolve existing situations of statelessness. However, significant challenges remain. Issuance of birth certificates and other civil documentation to forcibly displaced populations not only provides essential protection but is instrumental in the prevention of statelessness.

Operations expanded efforts in recent years to prevent and reduce statelessness through progressive inclusion of stateless persons or those at risk of statelessness in UNHCR’s programming. There is increased recognition of the need to enhance and rebuild civil registration and vital statistics capacity in the region. In 2020, UNHCR worked with the League of Arab States on statelessness and initiated collaboration with the Organization of Islamic Cooperation, while strengthening global and regional partnerships. In the 3RP context, interventions by UNHCR and partners reduced the percentage of Syrian refugee children born in the region without any form of identity documents (either a birth certificate or medical birth notification) from 35% in 2012 to 1% in 2020. In the 3RP context, the following activities have helped improve birth registration: making birth and marriage registration procedures more accessible; strengthening legal aid and counselling; engaging with communities as agents of change and ensuring access to quality maternal health services.

Implementing pledges made at the Global Refugee Forum

Of the 58 pledges to the region, 16 were in progress, four have been fulfilled and two are in the planning stage. Examples of policy pledge implementation and progress include Mauritania’s pledge to enrol all refugees in its civil registry, issue them with national identification numbers and include them in national systems and labour markets. In December 2020, the Mauritanian Minister of Interior signed a legislative act to issue refugee cards to all refugees. However, significant challenges remain. Issuance of birth certificates and other civil documentation to forcibly displaced populations not only provides essential protection but is instrumental in the prevention of statelessness.

Operations expanded efforts in recent years to prevent and reduce statelessness through progressive inclusion of stateless persons or those at risk of statelessness in UNHCR’s programming. There is increased recognition of the need to enhance and rebuild civil registration and vital statistics capacity in the region. In 2020, UNHCR worked with the League of Arab States on statelessness and initiated collaboration with the Organization of Islamic Cooperation, while strengthening global and regional partnerships. In the 3RP context, interventions by UNHCR and partners reduced the percentage of Syrian refugee children born in the region without any form of identity documents (either a birth certificate or medical birth notification) from 35% in 2012 to 1% in 2020. In the 3RP context, the following activities have helped improve birth registration: making birth and marriage registration procedures more accessible; strengthening legal aid and counselling; engaging with communities as agents of change and ensuring access to quality maternal health services.

Consequences of underfunding

Across the region, chronic underfunding affected all operations. With the COVID-19 pandemic, humanitarian needs increased significantly for refugees and host communities as well as IDPs. UNHCR received just 51% of the $2.8 billion required which meant critical life-saving and protection needs were unmet in 2020. While some instances of underfunding were due to the new needs resulting from COVID-19, many others pre-date the pandemic.

UNHCR was unable to meet the large needs in the region, which were compounded by currency devaluations in Lebanon and Syria. UNHCR was unable to meet the large needs in the region, which were compounded by currency devaluations in Lebanon and Syria. Despite additional funding for COVID-19 prevention and response, critical infrastructure had to be deprioritized, and funding gaps became more acute in refugee camps like Tindouf in Algeria and Mbera camp in Mauritania. The pandemic amplified protection and financial challenges for urban refugees and asylum-seekers in countries with mixed movements such as Libya, Morocco and Tunisia, prompting people to resort to harmful coping mechanisms and exposing the population of concern to higher risks of exploitation and forced labour.

The pandemic amplified protection and financial challenges for urban refugees and asylum-seekers in countries with mixed movements such as Libya, Morocco and Tunisia, prompting people to resort to harmful coping mechanisms and exposing the population of concern to higher risks of exploitation and forced labour.

Yemen remained one of the operations with the most tightly earmarked funding in the region, leading to considerable challenges in responding to the emerging and increasing needs. Alongside lack of funding, the limited opportunities for durable solutions in host countries and fewer resettlement places globally further complicated the protection and operational environment.

UNHCR could not provide support through unrestricted cash assistance to approximately 800,000 individuals among the identified target population in Jordan, Lebanon and Syria. Despite additional funding for COVID-19 prevention and response, critical infrastructure had to be deprioritized, and funding gaps became more acute in refugee camps like Tindouf in Algeria and Mbera camp in Mauritania. The pandemic amplified protection and financial challenges for urban refugees and asylum-seekers in countries with mixed movements such as Libya, Morocco and Tunisia, prompting people to resort to harmful coping mechanisms and exposing the population of concern to higher risks of exploitation and forced labour.

UNHCR was unable to meet the large needs in the region, which were compounded by currency devaluations in Lebanon and Syria. Despite additional funding for COVID-19 prevention and response, critical infrastructure had to be deprioritized, and funding gaps became more acute in refugee camps like Tindouf in Algeria and Mbera camp in Mauritania. The pandemic amplified protection and financial challenges for urban refugees and asylum-seekers in countries with mixed movements such as Libya, Morocco and Tunisia, prompting people to resort to harmful coping mechanisms and exposing the population of concern to higher risks of exploitation and forced labour.

Yemen remained one of the operations with the most tightly earmarked funding in the region, leading to considerable challenges in responding to the emerging and increasing needs. Alongside lack of funding, the limited opportunities for durable solutions in host countries and fewer resettlement places globally further complicated the protection and operational environment.

UNHCR could not provide support through unrestricted cash assistance to approximately 800,000 individuals among the identified target population in Jordan, Lebanon and Syria. Despite additional funding for COVID-19 prevention and response, critical infrastructure had to be deprioritized, and funding gaps became more acute in refugee camps like Tindouf in Algeria and Mbera camp in Mauritania. The pandemic amplified protection and financial challenges for urban refugees and asylum-seekers in countries with mixed movements such as Libya, Morocco and Tunisia, prompting people to resort to harmful coping mechanisms and exposing the population of concern to higher risks of exploitation and forced labour.

**OVERVIEW OF 2020**

2020 was a year of diversification for UNHCR, as the organization responded to a multitude of humanitarian crises across the globe. The organization, in partnership with its partners, mobilized over $2.8 billion to support those in need. UNHCR’s work was marked by the innovative measures it took to ensure the safety and well-being of refugees and stateless persons, amidst the unprecedented challenges posed by the COVID-19 pandemic. UNHCR’s commitment to transforming in 2020 aimed to align its work with the Sustainable Development Goals (SDGs), and to support the implementation of the Global Compact on Refugees.

- Next page
In the year of the 70th anniversary of the adoption of UNHCR’s Statute by the UN General Assembly, the drivers of forced displacement multiplied globally, and the COVID-19 pandemic jeopardized the fundamental rights of people of concern. Nevertheless, as the first year of implementation of the Global Refugee Forum pledges, 2020 presented opportunities to further develop asylum capacity, thus supporting States to cope with challenging circumstances such as public health emergencies.

Access to international protection and safeguarding public health are not and should never be mutually exclusive. States’ obligations are not suspended in times of crisis. UNHCR continued to advocate for full respect of the non-derogable principle of non-refoulement, while increased and often violent pushbacks at the border and interceptions at sea were reported, including with returns to risks of persecution or serious human rights violations. Throughout the pandemic, access to protection and the quality of that protection have suffered from restrictive measures applied by States—with limited or no flexibility towards those in need of protection, and from the disruption of basic services, socioeconomic shocks, increased xenophobia, exacerbated protection risks and humanitarian access challenges. UNHCR upheld those countries who were steadfast to their commitments and put in place adaptive procedures to ensure their asylum systems remained accessible and operational, while simultaneously managing COVID-19 quarantine and treatment and undertaking inclusive prevention and response plans.

Greater engagement with communities—including through innovative tools introduced by UNHCR and at inter-agency level—allowed active participation of forcibly displaced people and facilitated their role as frontline responders. Age, gender and diversity considerations in all advocacy, policy and operational interventions proved their worth in responding to the COVID-19 emergency.

With a rise in risks, joint efforts were made towards more inclusive child protection systems, strengthened community-based protection and mental health and psychosocial support, as well as scaling-up best interest procedures, birth registration and strategies to address childhood statelessness. A focus on gender equality proved to be crucial for tackling gender-based violence, disturbingly higher during the pandemic. Despite the challenges of timely identification of persons with disabilities and older persons in displacement contexts, worsened by the pandemic and its disproportion effect on those at heightened risk, UNHCR advanced its commitments on inclusion, accountability, and collection and proactive use of data through critical collaboration with communities and other partners. Moreover, to support the meaningful inclusion of LGBTIQ+ displaced persons, UNHCR enhanced partnership coordination and advocacy on equal treatment, anti-discrimination, participation, and access to information and services.
**Results and achievements**

To advance the rights and legal protection of refugees and other forcibly displaced people in accordance with its supervisory responsibility, UNHCR continued to advocate for States’ accession to the 1951 Refugee Convention and its 1967 Protocol and their translation into domestic law. By December 2020, 149 States were party to either the 1951 Convention or its 1967 Protocol, 70 of which maintained reservations and declarations to one or both instruments. UNHCR provided States with guidance on interpreting and applying international and regional refugee law standards domestically. UNHCR also engaged with UN agencies and legal, judicial and academic partners and networks. In 2020, UNHCR engaged with the legislative processes of 93 countries: 23 countries adopted laws or legislative changes, nine of which represented advances in refugee rights. Although COVID-19 forced many courts to close temporarily, UNHCR intervened as a third party in 18 cases in 10 jurisdictions.

**Law and policy on internal displacement**

UNHCR supported the development of national frameworks on internal displacement by providing legal and technical advice in 14 States, including Colombia, Mali, Mexico, the Philippines, South Sudan and Ukraine. Mexico’s national legal framework, developed with UNHCR’s support, was submitted to the Senate as a draft law after unanimous approval by the Chamber of Deputies. At the regional level, Mozambique and Somalia ratified the Kampala Convention, with UNHCR helping translate it into domestic law. In Somalia, a draft federal IDP Act was presented in a validation workshop ahead of review by the Attorney General.

**Promoting and protecting human rights**

To strengthen its engagement with human rights mechanisms, UNHCR adopted a "human rights engagement strategy" in October 2020, underpinned by a learning programme to give staff the knowledge and practical skills on human rights tools to protect people of concern. Guidance on UNHCR’s engagement with national human rights institutions provided a blueprint for leveraging partnerships with national human rights institutions to support UNHCR’s mandate and its protection and advocacy work. UNHCR complemented this with Guidance on addressing racism and xenophobia, focusing on responding to discrimination against people of concern.

**Operational highlights**

Chad, hosting 483,000 refugees and asylum-seekers, adopted its first ever asylum law, guaranteeing fundamental rights including freedom of movement, the right to work, and access to health care, education and justice. The law makes Chad one of the first countries in the region to fulfil a pledge made during the 2019 Global Refugee Forum to strengthen legal, physical and material protection of refugees and asylum-seekers. UNHCR supported the Government of Chad in developing the law, providing technical advice and written observations throughout the legislative process. In the Philippines, UNHCR provided technical assistance for the development of a regional legal framework for IDP protection in the Bangsamoro Autonomous Region of Muslim Mindanao, in partnership with local organizations and key UN and government agencies.

UNHCR formed a technical working group and organized webinars for policymakers and protection actors, with the support of the Special Rapporteur on the human rights of IDPs, key parliamentarians and the national Commission on Human Rights.

**Challenges and unmet needs**

Many countries hosting large refugee populations are not States parties to the 1951 Convention or its 1967 Protocol and do not have domestic refugees or asylum legislation. While States often solicited UNHCR’s views on proposed legislative changes, those views were not always followed, leading to legislation with reduced protection safeguards, or provisions at variance with the country’s international or regional legal obligations. For instance, of the 23 countries which saw the adoption of laws and legislative changes to their domestic refugee protection framework, nine involved some restrictions to refugee rights. In many countries, legislative sessions were also suspended because of the COVID-19 pandemic, causing delays including for processes UNHCR was supporting.

Changes in government authorities and institutions represented a key challenge for adopting and implementing national laws and policies on IDPs in various countries, including Mali and South Sudan. Lack of capacity to respond to IDPs’ legal needs and access to justice, due to inadequate implementation of international, regional and national frameworks and standards, was also a key challenge.
Results and achievements

Registration establishes unique identities for people of concern and is the basis for delivery of protection and assistance and for access to services. It also contributes to identifying trends and patterns in population movements.

Registration protects against refoulement, arbitrary arrest and detention, and helps to reunify families and trace separated children. In 2020 however, the pandemic and consequent restrictions on movement constituted a major obstacle. In response, UNHCR adapted its policies and guidance, instituting remote registration arrangements across 41 country operations. New methods included technologies that facilitated refugees’ self-service, remote training and simulations, and contactless data collection. Biometric devices were remodeled to enable contactless biometric capture and identification. Registration interviews were held via video calls. Plexiglass dividers were installed in registration facilities.

Despite the pandemic, in 2020 UNHCR continued to strengthen its registration, profiling and identity management capabilities. At the centre of this work was UNHCR’s Population Registration and Identity Management Ecosystem (PRIMES), which includes proGres v4, a global, web-based source of information about registered individuals, the Biometric Identity Management System (BIMS)/IrisGuard and the Global Distribution Tool (GDT).

By the end of 2020, 100 operations were using proGres v4, 10 more than originally planned and 27 more than in 2019, covering 15 million individuals, a 44% rise. UNHCR achieved its Grand Bargain commitment to roll out BIMS to a total of 75 operations, adding six in 2020.

Individual biometric records in BIMS reached 9.2 million, up from 8.8 million. The GDT was deployed in 20 operations by year-end, up from 14 in 2019. Employing such biometric tools means aid goes to the right recipient swiftly and simply, reducing the risk of fraud.

UNHCR made enhancements to PRIMES, enabling its offline tool (RApp) to consolidate inputs from multiple data sources, allowing decentralized user management, and launching a mobile app, Verify Plus, for authenticating identity. These developments helped extend data collection and electronic verification to remote locations, while new French and Spanish versions of the software and training materials strengthened the tool usage and the quality of data in non-English speaking operations.

The emergency registration capacities of eight operations were enhanced thanks to the deployment of nine graduates of the Training on Emergency Registration. Additionally, 12 Danish Refugee Council-managed registration roster members were deployed to 10 operations to conduct continuous registration, population verification and/or prepare for PRIMES deployment.

Operational highlights

In Jordan, to mitigate the risk of COVID-19 disrupting access to documentation, UNHCR launched its first continuous remote registration procedures in the region. Data was collected in phone interviews, with “know your customer” standards to authenticate identities remotely, instead of the biometric information usually taken at registration. A unique caller ID and a one-time password, used during the phone interview and for scheduling purposes, further strengthened the integrity of the process. Records were efficiently processed, efficiently capturing information on new arrivals, births and updated family compositions. In parallel, a hybrid asylum-seeker’s certificate distribution mechanism—developed to complement these remote registration procedures—ensured the delivery of certificates to 266,586 individuals in 2020.

Challenges and unmet needs

The number of individuals newly registered in PRIMES fell 28% between 2019 and 2020 because of prolonged restrictions on movement. Without remote registration arrangements, including technologies to facilitate refugees’ self-service, remote training and simulations, and contactless biographic and biometric data collection, the gap would have been three times as large.

Support for developing a refugee self-service platform, known as MyUNHCR, was not provided as planned to UNHCR’s Middle East and North Africa bureau and Asia and the Pacific bureau, because more time had to be invested during the technical discovery and design phase, resulting in development, piloting and deployment delays.

UNHCR’s policy on registration and identity management was not released in 2020, as COVID-19 raised many new issues, particularly for self-service and remote registration, which must inform the policy going forward. The policy will be prioritized for publication in 2021 to reflect these new registration and identity management methods.
Identifying international protection needs

The same year that the implementation of Global Refugee Forum pledges started, due to the pandemic, States and partners had to mobilize resources to adapt their systems to ensure the continued identification of people with international protection needs. As part of its global COVID-19 response, UNHCR issued guidance on remote interviewing of asylum applicants, enabling States and partners to introduce adaptations in national asylum systems, while taking into consideration key protection issues, as highlighted by UNHCR’s protection dashboard. Of the approximately 130 States applying a national asylum/refugee status determination (RSD) system, 98 adapted part of their procedures at the onset of the pandemic. By the end of the year, 123 States had adapted their national asylum procedures in response to COVID-19. Such measures helped address public health concerns while maintaining access to asylum and preventing backlogs building up in national systems. In parallel, UNHCR issued revised and updated RSD procedural standards to ensure accurate, timely and consistent decision-making for operations engaged in mandate RSD activities. Following the issuance of guidance on working modalities of the Asylum Capacity Support Group (ACSG), UNHCR facilitated the launch of pilot projects within the ACSG framework. Such projects aim to assist the asylum authorities of the countries concerned to assess gaps in their process. They then can draw up an action plan to address any lack of capacity in the national asylum system, implement simplified and accelerated asylum processes, revise and improve the national legal framework, and set up professionalized country of origin information units. These pilot projects laid the groundwork for improvements in the fairness, efficiency, integrity and adaptability of national asylum systems.

Results and achievements

As a result of the pandemic, certain adaptive measures for national asylum systems required States such as Azerbaijan, Ecuador, Kenya, South Sudan, Austria and Estonia and several other European Union member States to increasingly use physical distancing or technology to issue new documents, conduct remote asylum interviews and court hearings. States such as Ghana, the Russian Federation, Luxembourg and certain other European Union member States also extended by law, or practice, the validity of expired or soon to expire asylum documents. Portugal extended the validity of documents and provided access to health care, employment, social benefits and financial services. These adaptive measures effectively ensured asylum-seekers’ access to protection, despite a reduction in-person services. While many States continued to adapt national asylum processes in the context of COVID-19, others took additional measures, including using group-based procedures to strengthen the fairness, efficiency and adaptability of the protection response to large-scale movements. One such example was Sudan’s pra so far the first year of the implementation of Global Refugee Forum pledges, 2020 also presented new opportunities, in particular a renewed focus on the importance of asylum system adaptability and the ability of such systems to respond to similar or different challenges in the future. Political support and investment in innovation, including the provision of RSD services through remote arrangements and technology, will be key in enabling asylum systems to effectively respond. Within the framework of the ACSG, additional offers of support will be important in ensuring that the needs of States improving their asylum systems are met.

Operational highlights

While the impact of COVID-19 is not yet fully understood, the complete suspension or only partial functioning of certain national asylum systems in 2020 impaired people’s ability to access international protection, thereby increasing their exposure to protection risks. Globally, the number of new asylum-seekers registered at first instance dropped by 45% in 2020, from 2 million to 1 million. This represented the biggest single year drop in new individual asylum applications over the last two decades. Likewise, despite this significant drop in
Refugee protection and migration: including responses to mixed movements

Results and achievements

In 2020, UNHCR continued efforts to prevent violations and abuses towards people under UNHCR’s mandate moving in mixed flows, and to provide them with adequate protection and assistance. Given the multisectoral response, UNHCR developed and strengthened inter-agency engagement, leading to co-leading virtual Mixed Migration Working Groups and Task Forces at country and regional levels.

It engaged with the European Union and African Union, supporting key protection and solutions objectives under the Khartoum Process and the Global Compact for Safe, Orderly and Regular Migration. In particular, UNHCR strengthened its role as co-chair of the UN Migration Network’s workstreams and regional coordinating teams, and as co-lead of the Working Group on Alternatives to Detention.

UNHCR proposed route-based protection frameworks in Africa, including evacuating through the Central Mediterranean Route and in the Mediterranean and Andaman Seas. Too many people were compelled to take precarious sea journeys in overcrowded and unseaworthy vessels, facing pushbacks at sea and denied disembarkation in a place of safety. Strengthening search and rescue capacity is fundamental and necessary to save lives at sea, although not sufficient to prevent recurring tragedies. Predictable disembarkation in line with international standards is needed to ensure that survivors are promptly delivered to a place of safety. Strengthened international cooperation and responsibility-burden-sharing are also needed to ensure access to protection, assistance and other solutions for rescued survivors, in line with international law and standards.

UNHCR updated learning programmes on mixed movements and trafficking and smuggling and, due to COVID-19, held them online for staff in the West and Central Africa and the Middle East and North Africa regions.

UNHCR participated in the UN Network on Migration, as a member of its Executive Committee and co-leads of its Working Group on Alternatives to Detention, which issued the policy brief “COVID-19 and immigration detention: What can Governments and other stakeholders do?” Given their potential impact on asylum and international protection, UNHCR also engaged actively with other workstreams of the UN Migration Network, in particular with the Working Group on Return and Reintegration of Migrants, focusing on objective 1 of the Global Compact for Safe, Orderly and Regular Migration: “Cooperate in facilitating safe and dignified return and readmission, as well as sustainable reintegration”.

To help prevent dangers on deadly land and sea routes, UNHCR further developed communication with communities (CwC) at risk via its revised Accountability to Affected People policy and country and regional CwC strategies and its flagship initiative “Telling the Real Story”. UNHCR advocated for increased access for rescued survivors, in line with the International Refugee Assistance Project and RefugePoint, 375 children benefited from best interests procedures; 180 unaccompanied children, youth and vulnerable adults were referred for legal aid assistance; 445 individuals benefited from support to family reunification procedures; and 30 individuals departed to reunite with family members in Europe.

Challenges and unmet needs

Dangerous sea movements continued, with fatal incidents in all regions, including off the coast of the Bolivarian Republic of Venezuela, in the Atlantic and in the Mediterranean and Andaman Seas. Too many people were compelled to take precarious sea journeys in overcrowded and unseaworthy vessels, facing pushbacks at sea and denied disembarkation in a place of safety. Strengthening search and rescue capacity is fundamental and necessary to save lives at sea, although not sufficient to prevent recurring tragedies. Predictable disembarkation in line with international standards is needed to ensure that survivors are promptly delivered to a place of safety. Strengthened international cooperation and responsibility-burden-sharing are also needed to ensure access to protection, assistance and other solutions for rescued survivors, in line with international law and standards.

UNHCR Global Report 2020
Expanded the number of joint strategies to address childhood statelessness to 18. UNHCR also worked with the Peter McMullen Centre on Statelessness in Australia and the Catholic University of Central Africa in Cameroon to deliver dedicated statelessness courses virtually. Joint activities were undertaken with the Inter-Parliamentary Union, including an advocacy event to bolster parliamentary action to end statelessness.

Operational highlights

Notable progress was made in the area of resolving protracted situations of statelessness. In December, following extensive advocacy efforts by UNHCR, the President of Kenya announced a landmark decision to grant citizenship to 1,670 stateless Shona and 1,300 stateless persons of Rwandan descent. In Central Asia, UNHCR continued its statelessness identification and reduction programme in Kazakhstan, Tajikistan and Turkmenistan, where UNHCR’s legal partners conducted outreach activities and provided legal counselling to identify persons to acquire nationality or have it confirmed. As a result of joint efforts by the Governments, UNHCR and civil society, 34,600 stateless persons reported. A number of initiatives also continued to be a challenge. Current lack of reliable data on statelessness are underway to tackle this problem, including the joint development of international standards. Targets: 2021 marks the 60

Challenges and unmet needs

Despite these positive developments, the COVID-19 pandemic caused a setback in statelessness prevention efforts and had a disproportionate impact on stateless populations. Many stateless persons were barred from accessing testing and treatment due to lack of legal status, were excluded from social services, and faced significant socioeconomic impacts as a result of the crisis. In May 2020, UNHCR issued guidance on policy and good practice to help protect stateless people and ensure their access to services.

2020 saw a lower number of States acceding to the UN Statelessness Conventions than anticipated, however 2021 marks the 60th anniversary of the adoption of the 1961 Convention on the Reduction of Statelessness and advocacy efforts to commemorate the anniversary are expected to accelerate the number of accessions. The lack of reliable data on statelessness also continued to be a challenge. Current statistics cover only 94 countries with a total number of 4.2 million stateless persons reported. A number of initiatives are underway to tackle this problem, including the joint development of International Recommendations on Statelessness Statistics by UNHCR, the Expert Group on Refugees and Internally Displaced Persons Statistics, and UNHPPA. The recommendations are likely to be adopted in 2023.

Results and achievements

Despite the challenges posed by the COVID-19 pandemic, notable progress was made in raising awareness of the plight of stateless persons and in achieving concrete results to prevent and resolve statelessness. Pledges submitted at the 2019 High-Level Segment on Statelessness and Global Refugee Forum helped accelerate these efforts. Of the 270 pledges to address statelessness submitted by States at the High-Level Segment and the Forum, more than 30 pledges were either fully or partially implemented by the end of 2020.

With technical support from UNHCR, 19 countries reformed their nationality laws, policies and procedures to close gaps leading to statelessness during the year. Particularly important were legislative changes introducing legal safeguards to prevent statelessness. Albania, for instance, adopted a new nationality law which includes an unrestricted safeguard to grant nationality to stateless children born in its territory if they would otherwise be stateless. A large number of States with significant populations of persons at risk of statelessness removed barriers to birth registration. In Turkmenistan, a new civil registration law entered into force which guarantees birth registration to all children born in the country. The Republic of Congo removed fees associated with birth registration and established auxiliary civil status centres in health facilities. A number of States also made arrangements to mitigate the impact of the pandemic on birth registration rates. In March, the Government of Jordan suspended deadlines for birth registration and waived fees for late birth registration. In an effort to identify and protect stateless persons, Côte d’Ivoire, Kazakhstan and Ukraine established statelessness determination procedures.

In 2020, UNHCR strengthened its existing partnerships to address statelessness. UNHCR and UNICEF continued their joint efforts as part of the Coalition on Every Child’s Right to a Nationality and
Community-based protection

Communities are often the first responders in situations that humanitarian actors have difficulties reaching, a fact made all the more evident with the onset of the COVID-19 pandemic. Country operations where UNHCR and partners had invested time and resources in fostering strong partnerships with communities prior to the pandemic were able to adapt to new realities faster, with people of concern experiencing fewer interruptions in access to, delivery of, protection and other key services, often managed by refugees themselves.

Examples of refugee frontline responders in 2020 were numerous: in Dohuk, Iraq, community members were trained remotely in psychological first aid in response to the growing mental health needs produced by the COVID-19 pandemic. In Nepal, UNHCR increased the number of female community workers to ensure a safe and trusted channel for gender-based violence case referral and to provide confidential 24/7 access to UNHCR’s protection hotline. IDPs in Ukraine were also actively involved in the COVID-19 response, including by taking part in coordinating committees led by local authorities, running counselling hotlines, and conducting psychological support and art therapy classes for adolescents. In Lebanon, more than 450 refugees with a medical background were mobilised as community health volunteers, focusing on COVID-19 awareness, hygiene promotion, surveillance and initial advice. To strengthen its support of community structures and frontline refugee responders, UNHCR offered guidance on partnership modalities and followed up on pledges made at the Global Refugee Forum in relation to meaningful participation.

UNHCR continued to equip staff with relevant knowledge, skills and practical resources. Since its launch in September 2019, the community-based protection online course benefitted over 1,200 staff. To support regionalization, UNHCR invested in building regional capacity to design and deliver training to community-based protection officers. In the East and Horn of Africa and the Great Lakes region, a tailored learning programme focusing on community-based protection in the context of COVID-19 was rolled out. UNHCR’s global online community of practice was revamped and re-launched in 2020, with specific guidance and tools to address challenges related to COVID-19, facilitate peer learning, and identify and document promising practices in the region.

Participatory approaches remained a critical component of UNHCR’s age, gender and diversity (AGD) and community-based protection approaches; however COVID-19 physical distancing guidance limited humanitarian access and forced country operations to adapt their participatory methodologies. Successful examples emerged from a number of operations where digital solutions, working through refugee volunteers and UNHCR-led participatory approaches for data collection proved successful. Globally, despite the challenges related to COVID-19, 289 UNHCR-led participatory assessments, inclusive of all people of concern, were reported across operations in 2020, compared to 510 in 2019.

Operational highlights

As part of the larger community structures that UNHCR invested in setting up in Dada refugee camp in South Sudan, representatives from the camp’s youth committee ensured that key information on COVID-19, including good hygiene practices, was communicated and disseminated in each of the eight local dialects. Youth committee members composed eight songs on COVID-19, translated into the local languages and broadcasted on community radio stations. The songs are sung by community members and are part of the camp’s “community radio forum”, and distributed to the local community through community radio stations. In addition, UNHCR supported the construction and renovation of health facilities, medical staff accommodation quarters, and COVID-19 testing and isolation centres. These projects benefited both the Cameroonian refugees and the local communities hosting them in urban areas and settlements as well as rural areas.

In the Democratic Republic of the Congo, in response to increasing tension linked to competition over basic social services and resources, UNHCR supported 583 awareness-raising sessions on peace and nonviolence. Activities were carried out through 36 focus groups, 36 open sessions, 34 participatory theatre sessions and 133 door-to-door campaigns. In total, 24,732 individuals were reached through face-to-face sessions and messages on peace and peaceful coexistence were recorded in the form of spotlights (432) and broadcasted on partner community radio stations in the territories of Kalenye, Mabola, Mbolu, Nyizu and Ptewo, reaching an estimated population of around 738,803 listeners.
At the onset of 2020, BUILDING BETTER FUTURES - Key data and achievements

GLOBAL REPORT 2020

OVERVIEW OF 2020

UNHCR IN 2020

Global Strategic Priorities

Pillars of Change:

Transformative Initiatives

Global Strategic Priorities

Map of populations of concern

OVERVIEW OF 2020

UNHCR IN 2020

Results and achievements

Open and transparent two-way communication and access to information are key to ensuring the participation of people of concern and UNHCR’s accountability to affected people; this was never more apparent than in the face of the COVID-19 pandemic.

Despite movement restrictions and limited access to affected communities, UNHCR had to ensure that consistent, trusted and accessible information on the pandemic was made available to people of concern. It also had to ensure continued access to trusted feedback and complaint mechanisms so that programmes and interventions could be adapted to ensure everyone, regardless of their age, gender, disability, race, religion, sexual orientation and/or gender identity, could safely access services and opportunities on an equal footing.

To help operations ensure accountability to affected people, UNHCR produced guidance on risk communication and community engagement at the onset of the pandemic; guidance on how to establish WhatsApp and other instant messaging trees; the accountability to affected people (AAP) operational guidance; the senior managers’ compact guide on AAP, and a guide for using social media in community-based protection.

UNHCR continued to co-chair the IASC Results Group 2 on Accountability and Inclusion to support coordination and collaboration on AAP in humanitarian responses and co-chaired a sub-group in the Global Collective Service for Risk Communication and Community Engagement focused on refugees, migrants and IDPs. As a result of this engagement, inter-agency guidance was produced and UNHCR organized four global webinars to disseminate best practice on risk communication and community engagement. In addition, UNHCR engaged with community-led organizations and partners to maintain channels of two-way communication, using new technological approaches.

A number of country offices for instance turned to messaging apps to keep refugee communication channels open during times of physical distancing. These provided critical life-saving information, linked people of concern to online services, and created spaces for feedback and referral to other service providers. UNHCR worked across operations to build on existing initiatives and trial a more systematic and scalable approach for engaging communities on WhatsApp through a pilot project covering four countries, beginning in Ecuador.

In Ecuador, UNHCR launched the first of these WhatsApp pilot projects, using a communication channel trusted by many in the community. The pilot allowed people of concern to access information on COVID-19 and enabled them to share information with UNHCR and partners, such as reporting incidents of violence or abuse. UNHCR ensured a human-centred design approach, engaging with communities to test features and functionalities as the pilot moved forward. In Ecuador, during the initial three-month trial phase, over 200,000 messages were sent between UNHCR, partners and around 12,000 users. UNHCR proactively sought ways to keep two-way communication channels open despite lockdowns and physical distancing requirements. In Jordan, Morocco, and South Africa, it conducted online focus group discussions to listen to the needs and priorities of people of concern and provide feedback on adaptive arrangements. In Kenya, the UNHCR-supported call centre became a trusted source of information about the COVID-19 pandemic. In Lebanon, WhatsApp communication trees allowed information to be provided and shared between UNHCR and people of concern.

Challenges and unmet needs

While face-to-face communication and traditional channels like radio remain important, people of concern’s preferences are diverging to include increased use of multi-channel contact centres, digital platforms and social media channels. The pandemic amplified this trend and UNHCR’s response has shone a bright light on the Office’s innovative work to ensure that UNHCR remains accountable to people of concern. It has also highlighted challenging areas in UNHCR’s response.

For instance, despite the adoption of new communication channels to share information and/or to receive and provide feedback, UNHCR needed to ensure that opportunities were securely, systematically and sustainably leveraged, without deprioritizing traditional face-to-face channels. For example, the increasing adoption of social media as a communication channel was not without its challenges: the variety and velocity of information being shared, and the expectations for an “immediate response”, strained existing operational resources at all levels and exposed policy and expertise gaps.
Child protection, youth engagement, and empowerment

Results and achievements

Children make up 31% of the world population, with 40% of referred and 50% of refugees. COVID-19 restricted education and youth opportunities while increasing poverty, isolation, and violence against children. The most common child protection issues in 2020 were related to unaccompanied and separated children, lack of access to birth certificates, abuse or violence outside the home or school, child labour, child marriage, access to birth registration, and non-child-friendly asylum procedures. UNHCR focused on strengthening access to child protection systems, providing best interests and child-friendly refugee procedures, supporting families and communities, and providing opportunities for youth engagement and empowerment.

Progress was made on the inclusion of children in national child protection systems, scaling up best interests procedures, registering births, and strengthening community-based protection, mental health, and psychosocial support. Despite UNHCR’s work to improve access to quality of child-friendly procedures, there were fewest fewer best interests assessments in 2020 but more children at risk, unaccompanied or separated, and COVID-19 restrictions made it harder to identify and help many children. Many organizations introduced remote case management, provided for child protection case managers and social services to be considered essential expertise, and worked with community outreach workers, volunteers and health professionals to strengthen identification and referral. Community-based child protection mechanisms such as youth clubs, child protection committees, and social services for refugees and IDPs accessed.

Child-friendly procedures were strengthened, and non-child-friendly asylum procedures. UNHCR focused on strengthening access to child protection systems, providing best interests and child-friendly refugee procedures, supporting families and communities, and providing opportunities for youth engagement and empowerment.

Operational highlights

In India, UNHCR’s child-friendly COVID-19 information guided parents and helped manage children’s anxiety. UNHCR and partners scaled up a child helpline and referral to remote best interests procedures. Over 5,000 parents, caregivers, and children benefited from communication material and online dialogue on child protection issues, including e-safety and online abuse.

In Ethiopia, UNHCR increased staffing and enhanced case management and scaled up family-like care arrangements for unaccompanied and separated children. Before the pandemic, UNHCR and partners had identified additional foster families and increased the child protection workforce to bolster quality case management. Initiatives paid to foster families, unchanged in five years, rose after a market assessment. Only 300 unaccompanied or separated children remained in community care when armed conflict broke out in November, a reduction of over 85% within a year and the fewest since community care began in 2010. UNHCR prioritized cash assistance for unaccompanied and separated children in family-based care centers and shelter repairs for those in community care centers. Most importantly, it enhanced the capacity of guardians and receiving families, crucial when the conflict blocked humanitarian assistance.

Challenges and unmet needs

A multi-year analysis found the most frequent child protection challenges were government policies and/or capacities, funding, partner capacity, awareness among people of concern about child protection issues and services, and UNHCR staff capacity. Systematic underfunding of child protection, which is currently at a 47% funded compared to 67% for global humanitarian appeals, worsened in the pandemic. A survey of over 100 UNHCR and partner staff working on inter-agency child protection mechanisms picked funding as the top challenge in refugee settings, followed by shortages of child protection actors and technical capacity, low visibility of the child protection response, limited capacity to scale up and absorb funding, and lack of humanitarian access. No youth-disaggregated data exists across humanitarian agencies, including UNHCR. Nor is there a system to track progress and ensure accountability for the implementation of the "Core actions for refugee youth".
Gender equality and women’s empowerment

UNHCR released its Gender Equality Toolkit in 2020 and provided operational support towards the institutionalization of gender equality and women’s empowerment initiatives. Thanks to an adapted virtual gender equality learning programme, staff in UNHCR’s Asia and the Pacific bureau honed technical skills to identify and address gender gaps. To facilitate cross-operational learning and seize opportunities to advance gender equality, UNHCR and partners documented emerging and promising practices in sub-Saharan Africa.

UNHCR also continued to promote and advocate for gender equality in humanitarian action by building on initiatives such as gender audits of global processes around the Global Refugee Forum and the Global Compact on Refugees, becoming a board member of the Compact on Women, Peace and Security and Humanitarian Action. A core action outcome of the “2020 UNHCR Policy on the prevention of, risk mitigation, and response to gender-based violence” is to prevent gender-based violence by gender inequality, discrimination and unequal power relations.

Operational highlights

The highest percentage of women’s participation in community leadership structures was achieved in the operations in Cameroon (49%), Rwanda (50.9%) and the United Republic of Tanzania (49.3%). In Cameroon, women were trained by UNHCR and partners in prevention and response to gender-based violence, child protection, and services for persons at heightened risk. In Rwanda, women refugees led strengthening their advocacy skills and created a forum to address women refugees’ leadership within camp management structures. In the United Republic of Tanzania, elections were organized for vacant positions in three camps shortly after COVID-19 restrictions were lifted, with UNHCR and partners successfully mobilizing women, including those at heightened risk, to stand for election.

In Chad, UNHCR and partners engaged in emergency protection services during lockdowns. The closure of schools, workplaces and safe spaces for women and girls increased the risk of protecting women and girls from sexual exploitation and abuse. UNHCR reported a lower level of participation for disadvantaged groups. Entities does not guarantee meaningful participation for boys and men are provided with equal access to decision-making, education and health services. Community-led initiatives such as gender audits of global processes around the Global Refugee Forum and the Global Compact on Refugees, and the establishment of the “2020 UNHCR Policy on the prevention of, risk mitigation, and response to gender-based violence” were developed with women returnee leaders, with a particular focus on members of refugee women’s organizations.

Protecting persons with disabilities and older persons

An internally displaced woman attends a session in Balkh Province, Afghanistan.

Results and achievements

An estimated 12 million persons with disabilities and 3.2 million older persons were among those forcibly displaced by persecution, violence and human rights violations.

Despite the challenges of identifying persons with disabilities and older persons, made worse by the COVID-19 pandemic, UNHCR’s operations provided targeted services for at least 55,672 adults with disabilities, 7,048 children with disabilities and 9,739 older persons. 3,749 households with older persons received targeted cash assistance, COVID-19 prevention items, food packages, medication and disability-related items (including solar lotion for persons with blindness). UNHCR organized over 11,000 targeted home visits and almost 10,000 rehabilitation sessions respecting COVID-19 protective measures. Tele-counseling sessions were held to ensure continuity of services for households with persons with disabilities, including protection, rehabilitation, access to assistive devices, and home-based education. In addition, at least 3,474 children with disabilities were helped to access education through financial support, adapted learning podcasts, WhatsApp channels, and home-based education.

In Zimbabwe, for instance, four female and three male pre-school refugee learners with a hearing impairment began sign language lessons. Women with disabilities received accessible information on gender-based violence prevention and response in the Americas, Kenya and Zimbabwe and training in business management and entrepreneurship in Djibouti. Over 1,150 shelter and water, hygiene and sanitation facilities were upgraded in Brazil, Ethiopia, Iraq, Jordan, Sudan and Zimbabwe to ensure accessibility for persons with disabilities. Following advocacy efforts from UNHCR, Cameroon and Tunisia provided disability card services to refugees and asylum-seekers, guaranteeing their access to national protection systems and services for persons with disabilities.

In support of this continued operational disability inclusion work, UNHCR developed a baseline report on the UN Disability Inclusion Strategy and accountability framework and a cross-divisinal five-year action plan on disability inclusion to advance the rights of persons with disabilities across its workforce and operations. The action plan will be implemented in collaboration with the International Disability Alliance (IDA), a global network of organizations of persons with disabilities, through a new partnership developed in 2020. Three regional consultations were organized to ensure the active engagement of IDA’s regional and board members and additional consultations and joint collaborations with organizations of persons with disabilities took place in Ecuador, Ethiopia, Mexico and Spain.

UNHCR also updated its guidance on working with older persons in forced displacement and developed guidance to enhance identification and registration of persons with disabilities and other data collection initiatives.

Operational highlights

Persons with disabilities and their representative organizations were actively engaged in the development of accessible materials and awareness sessions on COVID-19 and gender-based violence prevention and response, using visual storytelling, photos, banners and radio announcements and producing accessible videos in sign language.

In Ecuador, UNHCR adapted its information materials and communication channels to ensure accessibility for persons with disabilities, developing printed materials in braille as well as easy to read leaflets. Furthermore, UNHCR and the Latin American Network of Non-Governmental Organizations of Persons with Disabilities and their Families (RIADIS) conducted a regional assessment on the situation of refugees and asylum-seekers with disabilities in the Americas.

In Ethiopia, UNHCR supported three organizations of persons with disabilities in Aw-barre, Shabelle and Kebribeyah camps to conduct sensitization sessions on COVID-19 prevention and response and engage in income-generating activities.

Challenges and unmet needs

Beyond the disproportionately deadly effect of the COVID-19 pandemic on older persons and persons with disabilities, related job losses, school dropouts and rising poverty rates also had a greater impact. The disruption or closure of key services such as medical support for chronic conditions, rehabilitation services and access to assistive devices limited their autonomy and impacted their wellbeing. School closures and the increasing use of the digital space to access education and job opportunities, as well as basic information and services, increased the risk of exclusion of persons with disabilities and older persons living in refugee settings as evidenced by previous research conducted by UNHCR and partners. To respond to this reality, UNHCR launched a call for proposals to strengthen digital inclusion of refugees with disabilities as of 2021.

Operational highlights

In the Americas, UNHCR supported national and local NGOs to establish a regional network for the protection of LGBTIQ+ refugees, asylum-seekers and IDPs. Across the region, 126 support spaces offered by more than 17 organizations were set up along routes out of the Bolivarian Republic of Venezuela and into Brazil, Chile, Colombia, Ecuador and Peru. In these support spaces, LGBTIQ+ persons received information, orientation, wireless connectivity, psychological first aid, health assistance, safe access to water, sanitation and hygiene services, and found safe spaces for women and children.

In Ecuador, UNHCR supported LGBTIQ+ organizations and community groups. Fundación Equidad, a safe shelter and community centre for LGBTIQ+ persons at risk, reached over 1,735 people with UNHCR financial and technical support. Together with Organización Dialógo Diverso, an organization supporting LGBTIQ+ rights, and in coordination with the local government, UNHCR strengthened institutional capacity to work with LGBTIQ+ people and to provide psychosocial assistance to LGBTIQ+ persons at risk.

Challenges and unmet needs

Despite significant progress, LGBTIQ+ persons of concern face violence and discrimination in many parts of the world and remain a largely under-identified population, with few targeted programmes and interventions. The pandemic exacerbated their protection needs and limited the ability of humanitarian actors to identify and refer them to existing services. UNHCR continued to invest in partnerships with LGBTIQ+ supported organizations and collaborated with them to establish safe and effective referral pathways; however building such partnerships with national and international actors requires further investment. Building the capacity of UNHCR staff, partners, service providers and asylum adjudicators in this area also requires significant investment. While identified LGBTIQ+ refugees must at risk are prioritized for refugee status determination and resettlement, shrinking resettlement opportunities means more effort must be dedicated to identifying alternatives, including complementary pathways and carefully crafted integration strategies. Lack of sustainable livelihoods for LGBTIQ+ people remains an obstacle.

Results and achievements

LGBTIQ+ persons continued to experience discrimination and abuse on a daily basis in 2020. This discrimination—often exacerbated by displacement and by age, gender, disability, race and other characteristics that intersect with sexual orientation and gender identity—was aggravated by the pandemic, with LGBTIQ+ persons often lacking access to information and basic support services. The psychological impact of isolation and the socioeconomic consequences of COVID-19 added to the already difficult reality for forcibly displaced LGBTIQ+ persons.

In response, UNHCR collaborated with LGBTIQ+ led organizations to reach out to LGBTIQ+ displaced persons and ensure their access to accurate information and feedback mechanisms. In Bangladesh, UNHCR partnered with organizations trusted by LGBTIQ+ communities to help LGBTIQ+ people living in Cox’s Bazar safely access protection and health services. In Turkey, UNHCR partners regularly reach out to LGBTIQ+ refugees and asylum-seekers, providing legal advice on their asylum applications, extend psychosocial support networks and conduct confidential referrals to vetted landlords, health care providers and targeted financial support mechanisms. Counsellors are also made available through phones, e-mail and SMS, ensuring regular access to accurate information and ways to raise concerns and obtain feedback.

To support meaningful inclusion of LGBTIQ+ displaced people in national systems, UNHCR engaged in coordination and advocacy with various stakeholders. In Europe, UNHCR worked with the European Asylum Support Office (EASO) to raise awareness on challenges facing LGBTIQ+ persons seeking asylum in Europe. In West and Central Africa, UNHCR and OHCHR worked with the African Union and the Economic Community of West African States to ensure the needs of LGBTIQ+ people of concern were included in the COVID-19 response.

UNHCR encouraged the participation of LGBTIQ+ persons in decision-making by creating safe and welcoming spaces and open dialogue with LGBTIQ+ groups. In Lebanon, an LGBTIQ+ youth group was created and provided peer-to-peer support, building life skills and greater access to protection assistance and solutions.

UNHCR organized a Training of Trainers and developed an online course on working with LGBTIQ+ persons in forced displacement. In Côte d’Ivoire, UNHCR trained authorities on working with asylum claims linked to sexual orientation and gender identity.

UNHCR also organized three regional and global consultations to map protection stakeholders, analyze gaps and identify promising practices. These consultations brought together stakeholders from the humanitarian and development sectors, civil society and LGBTIQ+ led organizations. The results will inform a global roundtable event on “Protection and solutions for LGBTIQ+ persons in forced displacement”, to be co-convened with OHCHR in the second half of 2021.

Innovative LGBTIQ+ refugee practice using UNHCR’s new WhatsApp channel during a workshop in Lima, Ecuador.
Responding with life-saving support

In 2020, the pandemic exacerbated existing humanitarian challenges. More than 85% of refugees were hosted in low- and middle-income countries. COVID-19 preparedness and response dominated UNHCR’s activities. The High Commissioner declared a global Level 2 Emergency, activating emergency procedures and providing more flexibility to country teams on procurement, partnership and staffing issues. The Inter-Agency Standing Committee adopted system-wide scale-up protocols. UNHCR faced multiple challenges: refugees and IDPs, in both camp and urban settings, often have inadequate housing, crowded living conditions, lack of access to clean water, and weak health infrastructure. COVID-19 increased their vulnerability as many lost jobs, adding to health and protection risks, including gender-based violence.

UNHCR built up the capacity of government and partner staff to conduct surveillance, contact tracing and case management, and provided personal protective equipment (PPE), medicines, oxygen, rapid testing kits and other supplies. It procured $186.1 million worth of PPE, critical items and services to assist and protect people in need, while taking into account access constraints, climate risks, security considerations and impact of the pandemic. These activities were closely coordinated with other UN agencies and NGOs via Inter-Agency Emergency, activating emergency procedures and providing more flexibility to country teams on procurement, partnership and staffing issues. The Inter-Agency Standing Committee adopted system-wide scale-up protocols. UNHCR continued to respond to major emergencies in a complex, multi-hazard environment, ensuring operational capacity to assist and protect people in need, while taking into account access constraints, climate risks, security considerations and impact of the pandemic. These activities were closely coordinated with other UN agencies and NGOs via Inter-Agency

Despite unprecedented global restrictions on travel and transportation of goods and additional staff safety and health risks, UNHCR continued to respond to major displacement emergencies such as those in Côte d’Ivoire, Ethiopia, Mozambique, Nagorno-Karabakh and the Sahel. Its timely, field-oriented support included over 300 emergency deployments of UNHCR and partner staff and shipment of more than $36 million worth of core relief items and other critical goods from global stockpiles. UNHCR continued systematic efforts to prepare for conflict-induced emergencies in a complex, multi-hazard environment, ensuring operational capacity to assist and protect people in need, while taking into account access constraints, climate risks, security considerations and impact of the pandemic. These activities were closely coordinated with other UN agencies and NGOs via Inter-Agency
Emergency preparedness and response

Results and achievements

During 2020, UNHCR activated 10 new emergency situations at L3, L2 and L1 level, affecting 26 countries. In addition, the Office declared a L2 global emergency for the COVID-19 pandemic. The COVID-19 pandemic significantly impacted UNHCR’s ability to deploy staff to new emergencies. However, the pace of emergency deployments increased in the second half of the year, when staff movements were hampered by pre-COVID-19 testing, quarantine requirements and reduced air transport. Some deployments started remotely until travel was possible, and standby partners were asked to identify in-country requirements and reduced air transport. Staff moved between different emergency situations at L3, L2 and L1 level, affecting 26 countries. In addition, the Office declared a L2 global emergency for the COVID-19 pandemic. The COVID-19 pandemic significantly impacted UNHCR’s ability to deploy staff to new emergencies. Staff moved between different emergency situations at L3, L2 and L1 level, affecting 26 countries. In addition, the Office declared a L2 global emergency for the COVID-19 pandemic.

UNHCR’s security workforce, made up of 88 international and more than 250 national security professionals, played an important role in UNHCR’s ability to deliver in high-risk duty stations. Security missions were undertaken in several countries including Ethiopia, Mozambique and the Sahel region. Maintaining a robust training programme remained key to field security work. In 2020, over 3,000 UNHCR and almost 500 partner staff were trained on security-related topics, including the Security Management Learning Programme and Women’s Security Awareness Training. UNHCR’s security workforce responded to 298 security incidents and supported managers and staff on 16 critical incidents in 2020, coordinating with the UN Department of Safety and Security in New York and government personnel.

Emergency procurement and responsible supply

Emergency airlifts, supplied

Safeguarding fundamental rights

Results and achievements

Efficient and agile service delivery to emergencies was paramount in 2020 as the pandemic created global supply shortages and brought transport networks to the brink of collapse. UNHCR responded to COVID-19 by procuring personal protective equipment (PPE), critical items and services worth $186.1 million and delivering such supplies to 85 operations.

UNHCR expedited and centralized procurement, ramped up logistics support at the operational and regional levels, and diversified its suppliers and delivery channels.

It participated in the creation of the UN COVID-19 Supply Chain Task Force, set up in April 2020 to streamline and expedite joint procurement of common pandemic-related supplies. It also established stockpiles in Dubai and Accra to support operations with PPE and other vital COVID-19 supplies on demand. Despite the pressures of COVID-19, UNHCR’s supply chain did not stop responding to new and ongoing emergencies, dispatching $36.2 million worth of emergency core relief items (CRIs) from its strategically located global stockpiles (GSM), serving 139 requests: 2,100 tons of CRIs were shipped by air; 2,100 tons by sea and 4,800 tons by road.

UNHCR carried out 22 airlifts (11 from GSMs for recipients in Bangladesh, Burkina Faso, Chad, the Islamic Republic of Iran, Liberia, Somalia and Sudan. Global stocks were regularly replenished to cover the urgent needs of up to 600,000 people within 72 hours. UNHCR added an eighth global stockpile in Panama to its existing seven, to enhance emergency response in the Americas.

To maximize the potential of the supply chain, UNHCR proactively engaged with sister agencies and partners, collaborating through the Logistics Cluster, the UN Procurement Network and the UN Global Marketplace. UNHCR increased piggybacking—using long-term agreements established by other UN organizations—by more than 20% compared to 2019, resulting in increased efficiency, active collaboration, better service delivery and cost-effective tendering.

UNHCR also provided contract administration for over 400 global frame agreements, while procurement value increased from $114 billion in 2019 to $137 billion in 2020, excluding cash assistance.

UNHCR prioritized the practice of secondary bidding for high-value orders and shipment of CRIs procured through global frame agreements. Secondary bidding is a solicitation exercise whereby suppliers holding already established frame agreements with set prices are invited to further bid their best and final offers for the required goods and services. This approach results in significantly lower prices, thereby freeing resources to serve more people in need. In 2020, as a secondary bidding cut the cost of centrally procured CRIs by 16% ($18 million) compared to the lowest frame agreement price.

Operational highlights

UNHCR reinforced its operational capacity with virtual supply missions, field procurement support and training. To ensure a broad range of qualified supply staff, UNHCR conducted more than 350 functional clearances (assessments, testing and interview processes) for supply positions worldwide. A compliance workshop was organized to sensitize participants from almost 20 operations to supply-related risks and jointly develop mitigating measures.

UNHCR also started the audit of factories in India, ensuring all CRI manufacturers will have been audited at least once by the first quarter of 2021.

To enhance the supply chain, UNHCR started developing a shipment tracking system, rolled out logistics frame agreements to field offices, and created data dashboards to help operations monitor their supply performance related to the COVID-19 response. To improve forecasting, the roll-out for Demantra (a demand management and supply chain management tool) was completed; the tool is used by 56 operations.

Challenges and unmet needs

COVID-19 and its associated challenges, as well as other new emergencies, further highlighted the need for sustained availability of expert supply workforce as part of global workforce planning, supported by increased capacity building and an end-to-end process on supply chain management.

Qatar Airways and UPS Foundation help deliver aid for forcibly displaced people

In 2020, UNHCR and Qatar Airways signed a two-year partnership. The company will provide free transport services to deliver humanitarian cargo under its “WeQuOte” programmes. UNHCR also has a long-standing partnership with The UPS Foundation, which provides assistance in an emergency response, logistics, transport, capacity building, as well as in areas such as health and protection. The partnerships with The UPS Foundation and Qatar Airways are key to enhancing UNHCR’s capacity to respond to emergencies.
Results and achievements

2020 marked the culmination of UNHCR’s five-year “Strategy for the Institutionalization of Cash-Based Interventions”, which aimed to make UNHCR’s operations consider cash systematically and use it as the means of transfer whenever appropriate, doubling cash assistance by 2020.

Despite the difficulties of face-to-face transactions in 2020, UNHCR achieved this goal and its Grand Bargain commitment, distributing $695 million, to 8.57 million people, a total of around $3 billion to more than 25 million people in over 100 countries since 2016.

The strategy has transformed UNHCR’s use of cash assistance. In 2016, 5% of refugees, including access to bank and or mobile money, were limited to a few countries. In 2020, refugees in 47 countries got digital payments, 32% in the form of mobile money.

The pandemic spurred UNHCR to rapidly scale up its cash assistance programmes. In collaboration with governments and other partners, more than 65 UNHCR operations launched new cash initiatives and expanded or adapted existing cash assistance. They introduced new approaches and technology and designed new cash grants and targeting criteria to assist vulnerable populations, as well as exit strategies and complaint/feedback mechanisms.

Financial and digital inclusion is a vital component of protection and fostering self-reliance and resilience, but refugees are often excluded from governments’ social assistance efforts. Cash assistance complements government support with a safety net for vulnerable refugees and others of concern. In the COVID-19 response, UNHCR aligned cash assistance (mostly transfer values but also cash in kind) with national social protection schemes.

Despite the growth of cash assistance, UNHCR will work toward achieving the UN Common Cash Assistance Program (PDM) tool. In a PDM analysis, most cash recipients reported high satisfaction with cash assistance during the pandemic, reporting that they could find what they needed in the market and that cash had alleviated the impact of COVID-19.

Operational highlights

UNHCR distributed emergency $75 grants through Pakistan’s Post Office to over 216,000 refugees, mitigating the repercussions of COVID-19 and ensuing lockdowns. UNHCR’s cash assistance was set up in close coordination with the Commissionerate for Afghan Refugees and mirrored the grants paid to vulnerable Pakistani citizens under the Government’s Ehsaas Emergency Cash Programme.

WP and UNHCR provided one-time mobile money assistance to all urban refugees in Kampala, where COVID-19 restrictions prevented casual work and triggered negative coping strategies. A POM survey showed two thirds of recipients had started using their savings. 95% said the payment had reduced their financial burden and 65% reported recent price rises for commodities such as rice and beans. The cash assistance, which 74% of refugees could withdraw within 1 km of their home, mainly went towards food, rent, health costs, utilities, fuel and hygiene items. In Ecuador, COVID-19 prompted UNHCR to switch from cash-in-hand payments to withdrawals via the national ATM network, using a code but no bank card. The codes were created by the bank, assigned to vulnerable beneficiaries by UNHCR’s partner and communicated by phone, unlocking payments without the need to meet in person or find an open bank branch.

Challenges and unmet needs

Despite the growth of cash assistance, major gaps remained in 2020. In 50% of countries, 100% of situations were covered and monitored globally, 74% of respondents said they could meet only half of their basic needs or less. In Jordan, 64% said they could not afford enough food, 27% struggled to pay their rent, and 31% could not pay health costs. 60% of refugees had borrowed money in the four weeks prior to data collection.

To address some of the main challenges in attaining system-wide efficiency in cash assistance, UNHCR will work toward achieving the UN Common Cash Assistance Statement and build upon progress made in the seven focus countries: Afghanistan, Bangladesh, the Central African Republic, the Democratic Republic of the Congo, Ecuador, Niger and Yemen. These countries have launched joint procurement for financial service providers, joint cash feasibility and risk assessments, and joint post-distribution monitoring.

UNHCR will continue using cash for urgent basic needs and to build sustainable and inclusive support for refugees, underpinned by financial inclusion and transitional safety nets, and aligned with national social protection schemes.
By the end of 2020, 27% of refugee-hosting countries included refugees in their national health insurance schemes on the same basis as nationals. While much needs to be done, an encouraging survey of 48 refugee-hosting countries found 89.6% of refugees living with HIV could get antiretroviral treatment (ART) through national health systems. UNHCR supported HIV-related activities in more than 50 countries, helping HIV services for populations of concern to continue during the pandemic. As a co-sponsor of UNAIDS, UNHCR worked with partners at national, regional and global levels to scale up services available to adolescents, to improve health and protection services for people who sail or exchange sex, and to strengthen tuberculosis programming and linkages with HIV care. UNHCR provided funds to 15 country operations while 23 country operations mobilized additional UNAIDS resources at country level to advance HIV-related services for refugees. Sexual and reproductive health services were scaled up for adolescents and young women in Malawi and harm reduction services were provided to people who inject drugs in Pakistan. In South Sudan, over 13,000 people received HIV counselling and testing and nearly 50,000 people benefited from HIV awareness-raising sessions, while in Uganda more than 1.5 million condoms were distributed, more than 180,000 people received HIV counselling and testing and 1,800 cases of TB were identified and initiated on treatment. Advocacy with national governments and international donors has increasingly given people of concern access to HIV services under the same conditions as nationals.

Operational highlights
In Europe, refugee health workers were involved in national COVID-19 responses, with increasing employment of refugee doctors and health workers. Across the Middle East and North Africa, over 24,000 outreach volunteers worked closely with UNHCR and partners and 66,000 visits were conducted to support families in remote areas and other people with specific needs.

In 20 refugee camps in Chad, a three-month supply of ART was given to refugees and host community members living with HIV through community-based distribution, using counsellors to reduce the need for monthly clinic visits. A WhatsApp group for psychosocial counsellors was created, and nearly 1,000 refugees benefited from HIV services reported from the remote communication and support.

Challenges and unmet needs
UNHCR made it a priority to ensure continuation of care and health service provision to refugees during the COVID-19 pandemic. It adapted to ensure continued access to pre- and postnatal care, delivery by skilled attendant, family planning, adolescent sexual and reproductive health, and HIV prevention, treatment and related care. Despite these additional measures, UNHCR’s Health Information System showed lower utilization of health services for refugees, with 6,219,345 outpatient consultations, 13% down from 2019. The number of measles vaccinations administered to children under 5 decreased by 9.5% to 113,780. UNHCR continues to advocate for the inclusion of refugees and other refugees of concern in national vaccination plans. By December 2020, 52% of countries that had included refugees in their national COVID-19 vaccination plans had not continued. UNHCR is a member of the Inter-Agency Standing Committee Working Group that worked with GAVI, the Vaccine Alliance, and the COVAX Facility on the allocation of vaccines as a “Humanitarian buffer” of last resort, with up to 100 million doses for populations not included in national vaccine orders.

9.89 million people of concern benefited from COVID-19 testing, vaccination and other essential health-care services in 2020.

1,235,111 women and girls received reproductive health services in 91 countries.

41,401 reported COVID-19 cases among refugees.

89.6% of refugee-hosting countries provided treatment for refugees through national programmes.

78% of refugee-hosting countries provided HIV treatment for refugees through national programmes.

97.7% of refugee-hosting countries provided antiretroviral treatment for refugees through national programmes.

9.9% of refugees hosted by refugee-hosting countries reported COVID-19 cases among refugees.
Results and achievements
COVID-19 disrupted social support systems, devastated incomes and livelihood opportunities, and heightened anxieties about falling ill. For those already dealing with the stress of being uprooted, this created an added psychological burden. Many who previously coped well were less able to cope with the multiple stressors generated by the pandemic, which abruptly raised new threats to freedom of movement, social support systems, education and social contact.

Women and children especially faced increased protection risks, including intimate partner violence, sexual abuse and exploitation. Even the overflow of information, sometimes contradictory and false, fuelled stress levels. UNHCR adapted and scaled up its response to identify and assist people of concern with mental health and psychosocial issues. In 2020, 647,068 people were supported in six overarching areas:

- Community messaging about coping with distress;
- Training first responders in psychological first aid and basic psychosocial skills;
- Providing psychosocial support through helplines;
- Increasing capacity to provide psychological therapies for refugees;
- Ensuring continuation of care for people with mental health conditions; and
- Ensuring people with severe protection risks continue to receive psychosocial support.

It is important to communicate clearly about risks and how people can protect themselves. In Bangladesh, UNHCR and Translators without Borders made audio versions of the inter-agency children’s book My Hero is You to help community outreach volunteers explain to children about COVID-19 in Rohingya, Burmese and Bangla languages. Many UNHCR operations set up or expanded helplines to keep in contact with people of concern and link those in need to available services. In Iraq, UNHCR provided training on remote psychosocial support to the helpline operators of the Iraq Information Centre, a nationwide telephone service that provides information and referral assistance to IDPs and refugees. In Nigeria, more than 300 responders (UNHCR and partners) were trained online in psychological first aid, a set of skills to provide supportive and practical help to people suffering crisis events. Where remote support was not practical or possible, wider use of community-based workers and adapted facility-based care allowed person-to-person support to continue. Physical distancing and restrictions on movement made psychotherapy difficult, and some group-based therapies had to be stopped or adapted.

In Colombia, UNHCR provided telephone and face-to-face psychosocial care, including for persons with disabilities, referring them when necessary for hospital consultations, psychiatric assessment and access to controlled medications. In Zambia, restrictions on large gatherings forced UNHCR to cancel mental health training for primary health care staff. Instead, two trainers from the National Mental Health Resources Centre in Lusaka travelled to give on-the-job supervision and training in smaller groups, while observing physical distancing.

Operational highlights
Many local UNHCR offices and partners acted to fortify the mental health of humanitarian responders during the pandemic, including refugee volunteers. In Egypt, UNHCR’s partner PISTIC offered support and appreciation to its staff, mostly refugees themselves, who ran a nightly DJ or comedy show. All psychosocial workers had regular individual online supervision and a monthly online support group.

In Greece, refugees and asylum-seekers were trained as paraprofessionals to address psychosocial needs, bridging national mental health and social services and staffing helplines in Arabic, English, Farsi and Greek, offering psychosocial support, information about COVID-19, liaising with protection services, and providing referrals to psychological or psychiatric specialists.

Challenges and unmet needs
Despite efforts to adapt to COVID-19, mental health consultations decreased everywhere except in the United Republic of Tanzania and Yemen. Overall, there were 137,880 consultations, 14% down from 2019. While innovative methods were employed to support people of concern, the inability to physically interact made it hard to provide the support required. The pandemic will continue to affect people’s mental well-being, especially if socioeconomic repercussions continue. UNHCR will keep mental health and psychosocial support at the forefront of its response.
Gender-based violence: prevention, risk mitigation and response

Results and achievements

Gender-based violence is a serious and under-reported human rights violation that disproportionately affects women and girls. COVID-19 dramatically increased the risk of gender-based violence, reversing important gains in gender equality. The pandemic put women and girls at greater risk of intimate partner violence and sexual exploitation due to lockdown measures, restrictions of movement and economic insecurity. However, it also made it harder for them to access education, information and services such as safe houses and case management facilities. In many countries, women subjected to intimate partner violence, and LGBTIQ+ people living within non-accepting households, were confined with their abusers—presenting life-threatening risks combined with a reduced ability to seek help. It was critical to increase and adapt gender-based violence programming to respond adequately.

The release of the “UNHCR policy on the prevention, risk mitigation and response to gender-based violence” in October 2020 instituted nine core actions to advance quality programming and coordination across UNHCR. The policy acknowledged that gender-based violence is rooted in the imbalance of power and recognized gender-based violence programming as life-saving. In response to COVID-19, UNHCR adapted its gender-based violence programming by strengthening its collaboration with community/women-led organizations and local partners, expanding remote case management services and updating gender-based violence referral pathways to reflect the pandemic’s impact on survivors’ needs. In Egypt, cash assistance was delivered as part of holistic gender-based violence case management programming, which is designed to respond to the full spectrum of needs survivors face during their recovery. Many operations created or expanded communication channels for survivors such as 24/7 emergency hotlines (e.g. Kenya, Pakistan, South Sudan and Zambia). UNHCR and partners assisted 2 million women and girls via 24/7 gender-based violence hotlines. In Colombia, remote case management was provided through 25 information kiosks and gender-based violence focal points. This required transitioning from in-person comprehensive case management services to phone-based services focused on one-time crisis counselling to connect survivors with services for their immediate needs and safety concerns.

In more than three quarters of the 63 countries in the Global Humanitarian Response Plan, UNHCR operations reported that they had maintained or expanded gender-based violence services in response to COVID-19. A total of 64,796 survivors received psychosocial counselling, 3,297 received legal assistance and 5,736 medical assistance. Through the Safe from the Start programming, UNHCR deployed senior gender-based violence specialist staff to 12 operations, including L2 and L3 in countries. UNHCR also worked with local partners to launch or expand legal aid and gender-based violence services, including 1,500 legal aid workers, 25 mobile legal aid groups, 150 legal aid volunteers, 10 legal aid service providers and 70 legal aid offices.

In response to COVID-19, the UNHCR policy on the prevention, risk mitigation and response to gender-based violence was updated to address the unique challenges_et of gender-based violence, such as the availability of legal and medical services for gender-based violence survivors. In October 2020, the policy was updated to reflect the new realities of COVID-19 and to ensure that gender-based violence programming was adapted to the specific needs of survivors in various contexts.

Operational highlights

In many countries, forcibly displaced women play a leading role in the response to gender-based violence. In the Syrian Arab Republic, UNHCR and its partners worked with a network of 91 women to share information on COVID-19 prevention measures and the availability of legal and medical services for gender-based violence survivors. In Pakistan, a community-based organization served as a community focal point for referral of survivors. In Kenya, UNHCR supported the creation of a gender-based violence hotline for women and girls, which provided immediate support to survivors.

Challenges and unmet needs

The pandemic limited the capacity to deliver and access gender-based violence prevention, risk mitigation and response programming. It increased the risks of experiencing intimate partner violence, sexual violence, child marriage and the sale or exchange of sex as a coping mechanism. Despite the increase in gender-based violence during COVID-19-related lockdowns, Gender-Based Violence Information Management System reports showed a general decline in the number of gender-based violence incidents reported in 2020 across the 34 countries using the system. UNHCR did not meet its target for medical assistance to be provided to survivors, mainly due to restrictions on movement. Many operations reported disruptions and significant challenges in accessing gender-based violence services, such as medical examinations required prior to admission to different shelters, or the refusal to receive additional survivors because of COVID-19 social distancing rules.

While the need for gender equality and gender-based violence interventions has never been greater, the pandemic shed further light on the chronic and severe under-funding of the gender-based violence sector. The pandemic highlighted the need for further action and the establishment of a gender-based violence focal point within UNHCR’s humanitarian strategy to better coordinate the response to gender-based violence incidents.
Nourishment and food security

When people are forced to flee their homes, access to and availability of food often becomes irregular and insecure, creating a risk of malnutrition and hunger while increasing vulnerability to exploitation and sexual abuse. COVID-19 compounded these risks and profoundly affected UNHCR’s nutrition and food security programmes in terms of quality and scale.

UNHCR normally conducts Standardized Expanded Nutrition Surveys (SENS) across 100 sites in 15 countries each year, gaining crucial data on the nutritional status of refugees. The lockdown and restrictions caused by the pandemic forced cancellation or delay of the majority of the SENS surveys planned by 54 operations in 2020.

To understand the implications of COVID-19 mitigation on nutrition and food security, UNHCR assessed how its operations were adapting food assistance, cash assistance, community management of acute malnutrition, the blanket supplementary feeding programme (BSFP), infant and young child feeding programmes (IYCF), nutrition surveys and surveillance, the school feeding programme, and nutrition support at COVID-19 quarantine and isolation centres.

Data from 12 operations in Africa and one in Asia, covering 60 sites, showed most adjustments their activities to allow continuity of services without adding to COVID-19 risks. For operations where food assistance was provided, adjustments included scheduling more distribution days, giving two months of rations instead of one, and pre-packing food or switching to cash assistance. Food distribution became quicker, less crowded and less frequent. Similar adjustments were made to BSFP, a prevention of malnutrition programme. With mass screening for acute malnutrition suspended in most places, some operations increased house-to-house screening by community health workers, and introduced new avenues for community screening, such as mother-to-mother support groups and household screening by mothers/caretakers. Nutrition clinics reworked their schedules to have fewer children visiting at once and simplified their procedures to reduce physical contact.

The figure opposite shows the number of operations that applied various adaptations to the management of acute malnutrition in response to COVID-19 pandemic. In 2020, 55,183 children aged 6-59 months with severe acute malnutrition (SAM) and 140,059 with moderate acute malnutrition (MAM) were admitted into treatment programmes for rehabilitation across 32 countries. A joint UNHCR/WFP hub was established to help operations better assess vulnerability to food insecurity, economic vulnerability and protection risks, and target or prioritize assistance to those most in need, with a longer term aim to support programming for greater refugee inclusion and self-reliance. The hub team provided support to operations in Cameroon, the Democratic Republic of the Congo, Jordan, Mauritania, Mozambique, Rwanda and Zambia.

With COVID-19 prompting school closures, in Bangladesh, Kenya and Rwanda UNHCR and WFP adopted school feeding programmes to individual contexts. In west Rwanda, school feeding rations were included in the general food distribution, in Kakuma, Kenya, students attending online school were given a snack to ensure their nutrition needs were met and to encourage e-learning enrolment. In Cox’s Bazar, Bangladesh, families with students received high energy biscuits, provided by WFP, as part of the general food distribution.

Operational highlights

In Algeria, Bangladesh, Chad, Ethiopia, Kenya, Rwanda, South Sudan and Uganda, UNHCR supplied families with tapes to measure mid-upper arm circumference (MUAC), a rapid screening tool for acute malnutrition, and provided training on their appropriate use. This allowed them to screen their children and self-referral if necessary, while reducing social contact. UNHCR operations in Chad, Rwanda and South Sudan innovated with radio and text messages to ensure uninterrupted messaging on IYCF—key for child survival, nutrition and development—and supported mothers with suspected or confirmed COVID-19 with information on respiratory hygiene during breastfeeding, as well as mental health support.

Challenges and unmet needs

Operational adaptations and innovations largely mitigated the pandemic’s impact, but the use of simplified treatment protocols, reduced frequency of follow-up visits, suspension of mass active case finding/screening of malnourished children, suspension of mass/group nutrition education, suspension of school feeding and suspension of SENS surveys were likely to have negative implications. The pandemic led to some groups such as urban refugees needing additional support. It created new operational challenges and required additional staff and more resources, such as PPE, sanitization materials and individual, not shared, nutrition measurement tools. The family MUAC roll-out meant a shortage of MUAC tapes, and there were pipeline breaks in some nutrition commodities, delays in food assistance delivery, funding cuts and inadequate staff/technical capacity.

Humanitarian food assistance for refugees decreased in many operations, leading to a sharp increase in global food insecurity. Refugees struggled to meet their food and other basic needs, engaging increasingly in negative coping strategies that put health and nutrition at risk. These changes and challenges will have undone some gains made towards reducing malnutrition and promoting optimal outcomes. Measures to mitigate the potential negative impact remain key. Further operations will need resources to bridge the various gaps.

UNHCR supports and coordinates feeding for refugees and other displaced people in global displacement settings. 2020 was a year of disruption as a result of the COVID-19 pandemic. This meant an increase in the number of refugees, displacement and the need for immediate assistance, with a resulting increase in the scale of humanitarian needs. This has had a profound impact on UNHCR’s work in 2020, in particular in the nutrition and food security field.

Adaptation and response

The initial priority was to ensure that refugees and other displaced people received adequate and nutritious food and nutrition assistance. To achieve this, UNHCR needed to rapidly increase the scale of its operations to meet the needs of those affected by the pandemic, while responding to new challenges and ensuring food access without compromising health and safety.

UNHCR and WFP, in collaboration with local and national governments, worked to ensure that refugees and other displaced people received the nutrients they needed. This included increasing the scale of food assistance, adapting delivery mechanisms and integrating nutrition and food security activities into existing programs. UNHCR also increased its focus on community nutrition education, accessible health services and hygiene promotion, to protect the health of refugees and other displaced people and the wider communities around them.

Global Strategic Priorities
Water, sanitation and hygiene
See p. 7 for GSP result

Results and achievements

The seemingly simple act of washing one’s hands is considered one of the most effective acts to stop the spread of COVID-19. In reality though, in 2020, 3 billion people lacked soap and water at home to practise good hand hygiene and 40% of healthcare facilities were not equipped with handwashing stations at points of care.

For many of the people of concern to UNHCR, particularly refugees, these dire conditions marred their daily lives and made COVID-19 prevention extremely challenging.

WASH programming is fundamentally multisectoral. All sectors and operational areas experience the impact of adequate or, more importantly, inadequate access to WASH services. UNHCR focused on strengthening and adapting WASH services in living areas, health care facilities and schools.

In emergencies, the minimum standard for daily water consumption is 15 litres per person, for drinking, personal hygiene, washing and cooking. Encouragingly, the average daily amount of potable water available increased from 21 to 25 litres per person during 2020.

Operational highlights

The Democratic Republic of the Congo hosts 490,200 refugees and 5.2 million IDPs. COVID-19 came on the heels of Ebola and measles epidemics that claimed more than 4,700 lives. To reduce the spread of COVID-19, UNHCR installed 2,122 hand-washing stations (including 61 donated to authorities and 288 to health facilities), distributed 65,000 bars of soap and disinfected 1,599 community buildings. In the Mire site and at household level, UNHCR promoted “Tippy Taps”—handwashing stations made by trained refugees with recycled materials.

South Sudan has 314,500 refugees, mostly in remote locations, and around 1.6 million IDPs scattered in hard-to-reach places. Very few have a television or internet access and disseminating urgent information on COVID-19 was a major challenge for UNHCR's operation.

It leveraged the most popular medium, radio, to respond to questions and myths about COVID-19 through call-in radio talk shows. To amplify these messages, “boda boda” or “mobile radios”—motorbikes with loudspeakers that broadcast radio shows and songs—drive through communities to reach as many people as possible.

UNHCR worked with refugees and IDPs to create culturally and linguistically appropriate public service announcements, radio shows and jingles about COVID-19. Refugees wrote, recorded and performed their own COVID-19 awareness-raising songs.

Challenges and unmet needs

Whilst the focus has been on increasing the provision of water in UNHCR operations and the various innovative solutions implemented in country operations, at the end of 2020 only 43% of people of concern had at least 20 litres of safe water per day. Further efforts are required to ensure that people of concern to UNHCR can enjoy one of their most basic rights.

Accessibility remains one of the main challenges. Many field operations are located in deeply remote areas where UNHCR is often the sole service provider for refugees. In some instances, UNHCR works with refugees in difficult operational conditions that are already impacted by conflict, climate change and extremely limited resources. Building on 2020 achievements, to respond to these challenges that were further exacerbated by COVID-19, UNHCR and the WASH partners will focus on redesigning and installing additional WASH facilities to decrease COVID-19 transmission rates; leveraging refugee voices to communicate about COVID-19; and, expanding cash assistance when COVID-related economic losses endanger hygiene practices.
Shelter and settlements

UNHCR is piloting steel-framed double-storey shelters to make better use of space in refugee camps in Cox’s Bazar, Bangladesh. The frames can be dismantled and the steel reused when they are no longer needed.

In Niger, nearly 40,000 IDPs and 60,000 refugees are often housed in overcrowded conditions. UNHCR worked with the authorities to identify overcrowded sites and initiate site planning to ensure the necessary distance between shelters. UNHCR also helped to set up isolation units and boost health care infrastructure.

With its NGO partners, UNHCR provided cash assistance to displaced and conflict-affected people with specific needs, including people stranded at checkpoints along the contact line in eastern Ukraine and prevented by COVID-19 restrictions from returning to non-government-controlled areas. Cash assistance helped them rent apartments close to the checkpoints and stay in dignified spaces while waiting for permission to cross.

Challenges and unmet needs

Restricted funding was the main obstacle in meeting widespread shelter needs. Operations consistently citedunderfunding as the reason for being unable to achieve shelter targets. In Ethiopia, for example, underfunding severely limited shelter interventions in six refugee camps for Eritrean refugees. A significant number lived in deteriorated mud brick and/or communal shelters with iron sheeting walls and roofs, with 8-10 people under one roof, not the standard five per household. COVID-19 demonstrated the risks of having limited space, especially in urban areas. In Brazil, loss of income in the pandemic greatly reduced people’s ability to host Venezuelans, making NGO-run centres vital. But UNHCR’s limited funding meant it was unable to support four centres that closed, with the loss of 47 of sites for people with special needs such as gender-based violence survivors, older persons and persons with disabilities.

To this end, UNHCR will place additional focus on cash-for-rent programmes and innovative shelter designs, as in Bangladesh, to increase living space without using more land.

Global Strategic Priorities

The data visualization also shows how UNHCR is responding to support displaced and populations must contend with extreme overcrowding and limited access to basics such as soap and water. “Space, shelter and scarce resources – coping with COVID-19,” is a data visualization that shows just how hard it is for refugees and IDPs to keep to physical distancing rules and advice on handwashing — key to controlling the spread of the virus.

“The availability to basic services such as health care, sanitation and a decent shelter to call home are essential for all human beings to live with dignity. Yet this is not the reality for millions of refugees and other displaced persons around the world,” says Raouf Mazou, UNHCR’s Assistant High Commissioner for Operations. “While COVID-19 has affected us all, refugees already living with uncertainty have been disproportionately impacted.”

The data visualization also shows how UNHCR is responding to support displaced communities all over the world to face the challenges posed by the pandemic.

UNHCR GLOBAL REPORT 2020

various sources. 2019 result: 53,607

GLOBAL REPORT 2020

OVERVIEW OF 2020

UNHCR in 2020

19,821 transitional shelters were provided to people of concern. 2019 result: 37,500.

249,000 people of concern lived in refugee housing units. Target: 260,000. 2019 result: 270,000.

51% of all shelters and transitional programmes had cash mainstreamed as a core programme approach. Target: 50%.

11.5% of all shelters and transitional programmes had cash mainstreamed as a core programme approach. Target: 50%.

120 Acronyms

RESPONDING WITH LIFE-SAVING SUPPORT

According to UNHCR, 91,782 households were protected from overcrowding in refugee accommodation. 2019 result: 66,649.

743,635 people of concern benefited from cash and shelter-related core relief items.

362,691 people of concern benefited from shelter-related core relief items.

8,800 refugee housing with biometric-quantitative physical distancing or other COVID-19 measures.

268 Isolation, quarantine and treatment centres built/ supported.
Finding durable solutions so that refugees can rebuild their lives and live in peace is fundamental to UNHCR’s work.

The traditional durable solutions include voluntary repatriation, resettlement and local integration, as well as other local solutions and complementary pathways for admission to third countries, which may provide additional opportunities. Enabling refugees’ resilience goes hand-in-hand with achieving durable solutions. Enhancing the self-reliance of refugees and other people of concern is a crucial component of the Global Compact on Refugees. Better self-reliance means refugees and host communities are better able to meet their essential needs, enjoy their human rights and live with dignity. Ensuring they have quality education, livelihoods opportunities and access to safe and sustainable energy benefits both host communities and people of concern to UNHCR.

In 2020, the resilience of refugees and their host communities was tested by the COVID-19 pandemic. Education, a lifeline for refugee children, was all but shut down by COVID-19. 95% of refugee children were affected by school closures, and online learning and virtual classrooms remained little more than a dream for most. The economic downturn damaged incomes and employment opportunities, leaving displaced populations struggling to meet their basic needs.

Solutions were significantly scarcer, mostly due to the closure of borders, and resilience was more vital, highlighting the need for innovative approaches. UNHCR worked with States and partners, including IOM, to adapt to the risks and restrictions brought by the pandemic, modifying processing and departure modalities to mitigate to the extent possible the serious impact of COVID-19 on those in the resettlement or complementary pathways process, and finding ways to support voluntary repatriation for those wishing to return home, while respecting COVID-19 measures. The pandemic also reinforced the importance of refugee inclusion in national public health responses and national and local preparedness plans, education systems, labour markets and social services.

The 2030 Agenda for Sustainable Development’s call of “leave no one behind” and the Global Compact on Refugees’ goal of predictable and equitable responsibility-sharing cannot be achieved without international cooperation.

In 2020, UNHCR continued to foster its relationships with development actors. It strengthened its relationship with the World Bank and other multilateral development banks, building the collaboration on data with the UNHCR–World Bank Joint Data Center on Forced Displacement and deepening collaboration with bilateral development partnerships.

This chapter covers UNHCR’s response at global and operational level, including innovative practices, progress made, and challenges that must be overcome to achieve comprehensive solutions for people of concern.
Engagement with development actors and processes

In line with the call in the Global Compact on Refugees (GCR), UNHCR continued to expand its collaboration with multilateral development banks and strengthen systematic engagement with bilateral development agencies and institutions. The value of these partnerships was particularly evident in the context of COVID-19, which prompted many development agencies to focus on the importance of including refugees in national responses. The World Bank showed strong leadership and support to low- and middle-income countries in fighting COVID-19, taking dedicated measures to ensure refugees and other people of concern were included in national response efforts. This included mobilizing up to $3 billion available in grants under the R4R Window for Host Communities and Refugees (HCR) in the fiscal year from 1 July 2020 and systematically including refugees in all COVID-19 vaccination campaigns supported by the World Bank. The UNHCR-World Bank partnership thrived, with close cooperation on policy and programmes development, data and analytics, and knowledge management. Collaboration on data was facilitated by the Joint Data Center on Forced Displacement launched in late 2019. Operational collaboration focused on projects in 14 low-income countries in Africa and Asia under the Bank’s HCR Sub-Window (HCRS), under its new WHF, and within the Global Concessional Financing Facility for middle-income countries. UNHCR and the World Bank worked on developing a Refugee Policy Review Framework, a tool for assessing refugee policy and institutional environments in countries eligible for the WHF.

Collaboration with other regional development banks increased. Partnership with the African Development Bank bore fruit in particular with multi-year projects including $20.5 million for the COVID-19 response in the Sahel. Such dedicated investments contributed to the inclusion of forcibly displaced people into national high frequency phone surveys in more than a dozen national populations and people of concern. The JDC publication “The pandemic raised the demand for comparable socioeconomic data to understand the impact of the crisis on both national populations and people of concern. The JDC publication “The pandemic raised the demand for comparable socioeconomic data to understand the impact of the crisis on both national populations and people of concern.” (December 2020) provided a stocktake of available evidence and highlighted a significant absence of data. To this end, UNHCR has contributed to the inclusion of forcibly displaced people into national high frequency phone surveys in more than a dozen countries, in some cases working in collaboration with the JDC. This data—made easily available to partners, governments and researchers—measures changes in employment, access to services, and behaviours, helping to inform evidence-based programming, policy and advocacy efforts. The findings from surveys are highlighted in a series of country specific briefs.

Informating solutions through data and evidence
A World Bank-UNHCR initiative launched at the end of 2019, the Joint Data Center on Forced Displacement (JDC), leverages partnerships and innovation in its focus on the collection, analysis, dissemination and use of primary socioeconomic microdata and population data to inform policymaking and programming. The JDC work programme is structured around four strategic objectives:

1. Strengthen systems and standards
2. Produce data and analysis
3. Enhance safe and responsible data access
4. Build evidence and share knowledge

It supports country- and regional-level engagement to increase the coverage of socioeconomic data on populations affected by forced displacement, as well as global systems efforts to strengthen norms and standards and tools that will improve the quality of data collected. The 2020 work programme included around 40 activities, with the largest share of the budget invested in primary data collection.

The pandemic raised the demand for comparable socioeconomic data to understand the impact of the crisis on both national populations and people of concern. The JDC publication “Highly vulnerable yet largely invisible” (December 2020) provided a stocktake of available evidence and highlighted a significant absence of data. To this end, UNHCR has contributed to the inclusion of forcibly displaced people into national high frequency phone surveys in more than a dozen countries, in some cases working in collaboration with the JDC. This data—made easily available to partners, governments and researchers—measures changes in employment, access to services, and behaviours, helping to inform evidence-based programming, policy and advocacy efforts. The findings from surveys are highlighted in a series of country specific briefs.

SPOILIGHT: Monitoring and mitigating the socioeconomic impact of COVID-19
Timely socioeconomic data on forcibly displaced populations is essential to understanding the conditions of people of concern and informing an evidence-based programmatic response. Newly collected data in a growing number of countries—available in UNHCR’s microdata library—provides insight on how the COVID-19 pandemic is affecting what are already highly vulnerable forcibly displaced populations.

Periodic polling by Kenya’s rapid response phone survey showed that in contrast to national households, people of concern were more likely to be concerned about food shortages, school closures and access to health facilities (Figure 1). Moreover, the wide gap in the employment rates of nationals and camp-based refugees was sustained during the pandemic as a result of widespread job losses (Figure 2).
**Results and achievements**

Of the approximately 10 million refugee children and youth under UNHCR care in 2020, 7.1 million were of school age. Their access to education was limited, with 3.4 million unable to attend school. At primary level, 77% of refugee children were enrolled. More displaced children were enrolled in secondary school than ever before, with enrolment up 2%, but still low at 31%. However, the gains favoured boys, and 36% of refugee boys were in secondary education, but only 27% of girls. Just 3% of refugee students were in higher education in 2020, all those enrolled in school were negatively affected by school closures, and the number of out-of-school may rise in coming years as students struggle to make up for the pandemic disruption.

UNHCR strove to increase access to education and the quality of education, despite the disruption of COVID-19. With the support of the **Educate A Child** programme of the Education Above All Foundation, 15 country operations strengthened primary education programming. UNHCR led the Accelerated Education Working Group (AEWG) and set up the Secondary Education Working Group, joining with 11 international NGOs, states and donors to promote strategic partnerships, evidence-based solutions and equitable access to education. UNHCR’s tertiary scholarship programme (DAF) helped 7,087 refugees study in 54 countries of asylum in 2020, with a new scholarship programme in the Democratic Republic of the Congo for 30 students. Only 230 new students were enrolled in 2020 due to funding constraints and COVID-19. Connected education came to the fore in 2020, and the Connected Learning in Crisis Consortium grew to 33 members, supporting 5,000 learners with tertiary bridging or professional development programmes and 3,000 degree-level based.

UNHCR helped 934,000 students in 74 countries to learn during school closures, with allowances for online classes and support for new teaching approaches—remote learning, audio and video lessons, and notes and feedback sent via WhatsApp. At tertiary level, many DAFI programme partners continued student support through remote check-ins, counselling and informational updates. As schools prepared to reopen, UNHCR disseminated resources to help learners face the challenge of COVID-19. Connected education came to the fore in 2020, and the Connected Learning in Crisis Consortium grew to 33 members, supporting 5,000 learners with tertiary bridging or professional development programmes and 3,000 degree-level based learners.

**Access to quality education**

**Educate A Child and UNHCR expand efforts to help out-of-school children a chance to learn**

In 2020, thanks to **Educate A Child** and **UNHCR**, efforts to help out-of-school children, 2019 result: 15.

**Challenges and unmet needs**

**COVID-19** had a profound impact. Closure of schools, non-formal learning programmes, after-school centres and universities disrupted education at all levels. While most governments and institutions introduced programmes to support the continuity of learning, many refugee learners lacked the required connectivity or hardware (tablets, laptops, smartphones, tablets, radios or televisions), or lived too far from broadcast signals. Specific needs of children with disabilities were often not or inadequately accommodated in home-based learning. Many refugee girls faced increased protection risks and domestic responsibilities during school closures, jeopardizing home-based learning and future educational prospects. University closures meant many refugee students lost student housing or were sent back to refugee camps.

UNHCR worked at all stages of the COVID-19 response to address emerging challenges, advocating for the inclusion of refugees in national response plans and providing guidance on connected education for low- and high-tech environments. There was an urgent need to upgrade WASH infrastructure in schools, refugee camps and settlements as facilities do not meet UNHCR standards. In some locations over 400 children used a single handwritten page.
In 2020, UNHCR stepped up livelihoods support and mobilized resources and partnerships to mitigate the socioeconomic impact of COVID-19. Advocacy was reinforced for refugees’ inclusion in national social protection, socioeconomic statistics and economic development plans. National statistics offices and the World Bank included refugees in high frequency phone surveys on the socioeconomic impact of COVID-19 in Djibouti, Ethiopia, Kenya, Morocco and Uganda. Governments included people of concern to UNHCR in COVID-19 social assistance programmes in Brazil, Colombia, the Republic of the Congo, Ecuador, Morocco, Mauritania and Uruguay.

UNHCR and ILO promoted refugees’ access to national employment services, together with the World Association of Public Employment Services. Mauritania’s National Agency for the Promotion of Youth Employment was supported to increase absorption capacity and include refugees in its services—a pilot that will inform similar moves elsewhere in the future.

In 13 of the 19 countries where UNHCR implements MADE51, a flagship brand of refugee-made products, refugees and local enterprise partners made essential personal protective equipment, including hundreds of thousands of face masks. Refugee-made products reached local and international markets, boosting income-earning opportunities and positive sentiment towards refugees, particularly following the launch of the MADE51 online shop on World Refugee Day 2020. UNHCR’s MADE51 project enabled 2,700 refugees and host-country artisans to maintain an income in 2020.

In Uganda, UNHCR’s partnership with the Swedish International Development Cooperation Agency (Sida) and the Gramene Crédit Agricole Foundation helped two microfinance institutions extend their services to over 5,000 refugees and host communities. Mexican bank BanCoppel opened up its services to refugees, while South Africa included refugees in its financial inclusion policy. Agricultural activities were supported in several countries in Africa. In Zambia, 1,054 refugee and host farmers were included in the national agriculture input support programme. In Cameroon, advocacy and partnering with national and local authorities and actors led to a 10% increase in the number of refugee-hosted households with access to agricultural land.

Since 2017, UNHCR’s partnership with Kiva, a non-profit microfinance crowdfunding platform, has unlocked over $20 million in small business loans for over 20,000 refugees and IDPs in Brazil, Colombia, Costa Rica, the Democratic Republic of the Congo, Ecuador, Jordan, Kenya, Lebanon, Mexico, Palestine, Rwanda, Uganda and the United States of America.

Challenges and unmet needs
COVID-19 had a disproportionate socioeconomic impact on the forcibly displaced. Refugee endures disruptions in livelihoods and income, faced challenges in covering basic needs, and were often forced into premature returns or negative coping mechanisms. Food and cash cuts foreseen by WFP will further weaken the protection and socioeconomic situation of the people of concern to UNHCR.

Monitoring showed that more than 60% of refugees could not meet even half of their basic needs in 2020. Disabled women and girls were particularly impacted. In the Middle East and North Africa, 84% of surveyed people of concern reported a loss of livelihoods and income. In Jordan, 35% of Syrian refugees employed before COVID-19 lost their jobs, compared to 17% of Jordanian citizens. In Costa Rica, 59% of refugee families reported steady work-related income streams at the end of July 2020, a staggering decrease from 93% before the pandemic hit.

In Uganda, UNHCR’s partnership with the Swedish International Development Cooperation Agency (Sida) and the Gramene Crédit Agricole Foundation helped two microfinance institutions extend their services to over 5,000 refugees and host communities. Mexican bank BanCoppel opened up its services to refugees, while South Africa included refugees in its financial inclusion policy. Agricultural activities were supported in several countries in Africa. In Zambia, 1,054 refugee and host farmers were included in the national agriculture input support programme. In Cameroon, advocacy and partnering with national and local authorities and actors led to a 10% increase in the number of refugee-hosted households with access to agricultural land.

Since 2017, UNHCR’s partnership with Kiva, a non-profit microfinance crowdfunding platform, has unlocked over $20 million in small business loans for over 20,000 refugees and IDPs in Brazil, Colombia, Costa Rica, the Democratic Republic of the Congo, Ecuador, Jordan, Kenya, Lebanon, Mexico, Palestine, Rwanda, Uganda and the United States of America.
Supporting the urban displaced

Seven in 10 people of concern to UNHCR live in urban settings, and the pandemic sharpened the challenge of supporting them. Refugees in urban areas were around 50% more likely than host populations to work in sectors that were hardest hit by COVID-19, such as accommodation, food services, manufacturing and retail.

UNHCR advocated for refugees to be included in national responses. Governments answered the call: among people of concern to UNHCR living in cities, 92% had access to primary health care on the same basis as nationals by the end of 2020, surpassing UNHCR’s 80% target a year ahead of schedule. A successful example was Lebanon, which hosts the highest number of refugees per capita, mainly Syrians living in extreme poverty in residential buildings. Refugees in Lebanon could get primary care, including for HIV and tuberculosis, at centres run by the Ministry of Public Health, and secondary and tertiary care in several contracted hospitals. Equitable access for the displaced population and the vulnerable host communities could get primary care through the national system on the same basis as nationals. Target: 100%.

UNHCR’s engagement in situations of internal displacement

UNHCR’s engagement in situations of internal displacement

UNHCR helped guide on the basis of assessments such as the Vulnerability Assessment for Syrian Refugees in Lebanon (VASyR), Health Access & Utilization Surveys (HAUS) and participatory assessments. While governments stepped up to shield refugees from COVID-19, UNHCR bolstered their defences by distributing PPE, extending hospitals, setting up triage and isolation areas, and building up the capacity of health workers and communities to fight the disease.

UNHCR’s cash assistance and shelter support worked in parallel with its health interventions. Cash assistance helped refugees weather the financial impact of COVID-19, which often spelled loss of jobs and income, rent areas and food insecurity. When the pandemic reached Mauritania, UNHCR immediately made a cash grant available for refugees living in urban centres, prioritizing 1,028 households without savings or social networks, at risk of eviction and far from able to meet their most urgent needs. The one-off payment approximated 40% of the minimum expenditure basket for three months.

Shelter support ranged from establishing triage and isolation areas to providing cash for rent and materials to build or extend shelters. Many cities witnessed a sharp increase in evictions as a result of COVID-19 lockdowns. To mitigate such risks, UNHCR supported 1.3 million households with cash assistance for rent and increased its support for collective shelters hosting vulnerable refugees and asylum-seekers. In Tapachula, Mexico, UNHCR and Hospitalidad y Solidaridad A.C. inaugurated a 300-space shelter, the country’s first exclusively for refugees and asylum-seekers. UNHCR financed construction of the shelter, which has solar panels, a rainwater collection system, natural ventilation and a garden producing food for residents.

UNHCR secured a pledge submitted in the 2019 Global Refugee Forum (GRF) to address xenophobia and include people of concern in national systems. The Government of the Philippines issued local government units with a new instruction to promote an inclusive approach towards refugees, asylum-seekers, and stateless persons in the pandemic, aiming for equal treatment, physical and legal safety, and inclusion in education, livelihood and self-reliance programmes.

In Cameroon, UNHCR launched one-time unrestricted cash assistance in four urban locations for over 11,000 refugees reliant on wages from the informal sector, and facing immense challenges to pay for rent, food and other basic needs because of COVID-19. The cash assistance, which also helped them comply with COVID-19 mitigation rules, was distributed as mobile money in collaboration with financial service provider MTN.

Challenges and unmet needs

Refugees, asylum-seekers, IDPs, returnees and stateless persons often find themselves living in poor shelters where health, WASH, and education services are overstretched or inaccessible and national social safety nets, including cash transfers, are not fully accessible. Overall, refugees in urban areas—even where the legal framework is enabling—often face numerous obstacles to access national services. The needs remain vast and UNHCR will continue to work with governments and partners to support and facilitate the inclusion of refugees whenever possible in national systems.
Results and achievements
Access to clean, affordable, and reliable energy services is integral to humanitarian response and essential for sustainable economic development. Sustainable energy services enable people of concern to UNHCR to meet their energy needs in a safe, sustainable and affordable way.

In 2020 UNHCR started applying its “Global strategy for sustainable energy 2019–2024”, aiming to ensure that energy needs for cooking, lighting and heating are safely and sustainably met, supporting both refugees and host communities.

Cleaner energy sources meant UNHCR’s operations cut their CO2 emissions by an estimated 500,000 tons, according to a revised methodology, far above the 6,000-ton target.

COVID-19 prevention required reliable and adequate water supplies and thus increased energy demand. That was a challenge in many operations since only 43% of people of concern had access to at least 20 liters of safe water per day. To this end, UNHCR expanded the use of solarized boreholes and water pumps which are cash-efficient in the long run and require less maintenance. 25 boreholes switched from diesel to hybrid or full solar power. To the extent possible, health centres and isolation areas, including six in Bangladesh and 17 in Uganda, were connected to photovoltaic systems. COVID-19 also spurred distance learning, and children required power and light to study. UNHCR mobilized funds and resources to provide sustainable and renewable energy to health centres and schools in priority countries.

The Clean Energy Challenge, led by UNHCR and UNITAR, increased its membership from 30 to 250 stakeholders in 2020. Partners and private donors enabled the first phase of the Energy Solutions for Displacement Settings programme to go ahead, improving access to renewable energy in Ethiopia, Kenya and Uganda for refugees and host communities. Initiatives in these countries included connecting health facilities to photovoltaic systems, techno-economic feasibility studies, and mobilization of local actors to roll out more sustainable energy programmes. The Renewable Energy for Refugees (ReER) programme enabled the delivery of modern energy services in Jordan and Rwanda.

UNHCR is striving to shrink its environmental footprint, including by improving waste management and reducing field operations’ CO2 emissions. Improvements in the packaging of kitchen sets in 2020 reduced annual plastic and cardboard waste by 47 and 43 tons per year respectively. It established a $4 million “green fund” to shift the energy source of field operations including Ethiopia, Kenya and Uganda from diesel to renewables. UNHCR also initiated partnerships with several international organizations and implementing partners to address deforestation and land degradation in refugee settings. For instance, Land Life implemented a reforestation project around Minawao camp in Cameroon, achieving an 85% tree survival rate, above the country’s 55% average. In Bangladesh, the Center for Natural Resource Studies (CNRS) worked with UNHCR to enhance environmental protection and natural hazard risk mitigation around the Rohingya camps.

Operational highlights
As of December 2020, the RE4R programme had installed solar water heater systems in 571 shelters and energy efficiency upgrades in 117 shelters in Jordan. It upgraded energy efficiency and solar power systems in 14 schools in 16 refugee settings, and 5,779 students attended awareness-raising sessions on renewable energy and energy efficiency principles.

Training sessions were carried out for 50 engineers from the Ministry of Education and 15 youth were given 400 hours of vocational training on renewable energy. Training topics included design software packages (SketchUp, PVsyst and AutoCAD) and technical knowledge about the components and installation of solar power and heating systems.

Challenges and unmet needs
COVID-19 highlighted the urgency of increased access to sustainable energy for displaced populations and host communities. Nevertheless, sustainable energy sources such as solar are costly at their inception. Given limited funding, operations understandably prioritize immediate life-saving needs over technology. Conscious of the substantial return on investment from reduced costs over an asset life of 25 years or more, UNHCR is working to leverage private sector partnerships to expand the use of sustainable energy. This is particularly important in protracted situations where funding is diminishing and continued dependency on fuel is no longer affordable.

The COVID-19 situation and budget reallocation to other priority activities hampered environmental protection program refusals, with unmet needs in land restoration and reforestation activities.

Refugee families get clean water thanks to Swedish innovation
In 2020, the Swedish social enterprise Starttimo made an in-kind donation of 3,160 solar-powered water treatment and water heating systems to refugee families in Uganda. Using solar energy, their innovative product cleans and heats water within a few hours, making it safe to drink and use. To address the water challenges and increase the use of renewable solar energy in off-grid regions of Uganda, UNHCR works actively to use Solvatten technology and educate communities on its benefits in their field operations.

500,000 tons of CO2 emissions reduced by using cleaner sources of energy 2019 result: 10% 2020 target: 20%

In 2020, 250,951 refugees returned to their country of origin—a decrease of 26% from 2019 (317,291). Despite situations of complex insecurity, exclusion of refugees from participation, and other drivers of displacement, 38,000 Syrian refugees returned home, 60% fewer than in 2019, a slowdown after 2018. They were assisted by a network of community centres in Syria, safe public places where women, men, boys and girls can meet for social activities and obtain protection services—ranging from legal aid, education and livelihood support to psychosocial support, gender-based violence prevention and response, and child protection interventions. In the Horn of Africa, UNHCR worked with the Intergovernmental Authority on Development (IGAD) and members of the Nairobi Process core group on the activation of the IGAD Support Platform. Launched at the Global Refugee Forum, the platform aims to mobilize political, technical and financial support for refugees, returnees and host communities. In 2020, UNHCR strengthened its collaboration with the UN Secretary-General’s Peacebuilding Fund (PBF), bolstering its contribution to the Sustaining Peace and 2030 Agendas. UNHCR collaborated with the PBF in Burkina Faso, the Democratic Republic of the Congo and Sudan in Africa, and El Salvador, Guatemala and Honduras in Central America. In Sudan, UNHCR implemented the PBF supported programme Our home solutions for forced displacement in West Darfur, focusing on local action plans, long-term development and conflict resolution in target localities. Together with UNDP, UNHCR provided support to the Sudan Peace Commission and to the implementation of the Juba Peace Agreement pertaining to millions of Sudanese affected by displacement. In Colombia, UNHCR signed a memorandum of understanding with the Victims Unit, which was set up by a 2011 law to support IDPs and other people affected by conflict, and developed a work plan, including a component on returns from abroad, for implementation in 2021. Thanks to a project supporting mobile registration units of the National Civil Registry Office, 19,570 identity documents were issued in the departments of Arauca, La Guajira, Norte de Santander and Atlántico. Operational highlights

Despite the pandemic, 40,774 Burundian refugees were assisted to return from Rwanda and the United Republic of Tanzania, bringing the total number of Burundian returnees to 120,500 since voluntary repatriation started in September 2017. Protection monitoring activities in return areas in Burundi showed some progress in returnees’ ability to access services and reintegrate. More than 90% of interviewed returnees reported returning to their place of origin, 79% reported having access to primary health care in their return areas, 82% of returnee households reported having access to land and 72% had civil documentation rights for their children. There were 2,311 returns to Afghanistan, a 73% decline largely due to a suspension of voluntary repatriation caused by the pandemic, coupled with the worsening security situation and a lack of basic services and economic opportunities.

The Government of Afghanistan committed to double the number of priority areas for return and reintegration from 20 to 40. In 2020, more than 900,000 returns, IDPs and community members were assisted by UNHCR and its partners with cash assistance and in-kind support, improved access to shelter, expansion of education and skills training, implementation of quick-impact livelihoods projects, and the development of public infrastructure including schools and health care facilities.

Challenges and unmet needs

Returns and reintegration efforts were hampered by the pandemic, with border closures and public health concerns preventing voluntary repatriation but also triggering some premature returns and onward movements. Returns were also limited by persistent problems in many countries of origin, including fragile or faltering peace processes, continuing insecurity, exclusion of refugees from peace processes and repatriation plans, and a failure to address the original drivers of displacement. Other deterrents to voluntary repatriation included destruction and confiscation of housing, land and property, severely overstretched services, and a lack of employment opportunities in the home country.

For more information on situations, see Chapter 6 of the 2020 Global Trends: Forced Displacement.
The family of a seven-year-old Syrian girl suffered a tear gas attack near resettlement hosts in Canada, which saved her life.

Results and achievements

The pandemic heightened the importance of resettlement and complementary pathways as protection and solution mechanisms and as a solid demonstration of responsibility-sharing. In 2020, the availability of such solutions decreased and implementation of the “Three-year strategy (2019-2021) on resettlement and complementary pathways” (3YS), which anticipated resettlement of 70,000 people and the admission of 140,000 refugees under complementary pathways in 2020, suffered a considerable setback. Despite COVID-19, UNHCR submitted over 39,500 refugees to 25 countries for resettlement, the majority originating from the Syrian Arab Republic (18,220), the Democratic Republic of the Congo (6,544), Eritrea (2,147), Somalia (1,070) and Sudan (1,050). 23,850 refugees departed on resettlement to 22 countries, 64% fewer than in 2019. UNHCR-facilitated departures were mainly from Lebanon (4,646), Turkey (4,098), Jordan (1,557), Egypt (1,353) and the United Republic of Tanzania (346). Half of refugee applicants were women and girls, and half were children. Submissions made on an emergency or urgent basis rose by 38% from 2019, accounting for a quarter of global submissions.

To help States and key stakeholders meet their commitments under the Global Compact on Refugees and in line with the 3YS, UNHCR and IOM collaborated under the “Sustainable resettlement and complementary pathways initiative 2020-2022”, known as the CRISP. The initiative aims to help States and other key actors establish or expand third-country solutions through capacity-building activities. To advocate for improved access to third-country solutions, UNHCR commissioned research supported by the CRISP on the benefits of resettlement and a mapping of global opportunities to advance resettlement and complementary pathways.

UNHCR led the creation of the CRISP-supported Global Task Force on Education Complementary Pathways, launched the Global Family Reunification Network, and worked on the creation of the Global Refugee Labour Mobility Task Force, three milestones towards achieving the 3YS goals. All three will be key platforms for sharing good practice and advising for refugees’ increased access to these solutions. The UNHCR Opportunities Platform, launched in September 2020 with the support of the CRISP, is a tool to help refugees find higher education scholarship programmes for refugees and key partners. The project now includes 24 universities and has welcomed around 70 students in three years.

Emergency Transit Mechanisms (ETMs) provided a life-saving solution, with 533 people of concern in Libya departing for Niger, Romania and Rwanda. A persistent challenge was the slow processing and lack of departures from the ETMs in Niger and Rwanda to the main resettlement countries, preventing additional evacuation flights from Libya taking place.

Global Strategic Priorities

Protection and solutions

To help States and key stakeholders meet their commitments under the Global Compact on Refugees and in line with the 3YS, UNHCR and IOM collaborated under the “Sustainable resettlement and complementary pathways initiative 2020-2022”, known as the CRISP. The initiative aims to help States and other key actors establish or expand third-country solutions through capacity-building activities.

To advocate for improved access to third-country solutions, UNHCR commissioned research supported by the CRISP on the benefits of resettlement and a mapping of global opportunities to advance resettlement and complementary pathways.

UNHCR led the creation of the CRISP-supported Global Task Force on Education Complementary Pathways, launched the Global Family Reunification Network, and worked on the creation of the Global Refugee Labour Mobility Task Force, three milestones towards achieving the 3YS goals. All three will be key platforms for sharing good practice and advising for refugees’ increased access to these solutions. The UNHCR Opportunities Platform, launched in September 2020 with the support of the CRISP, is a tool to help refugees find higher education scholarship programmes for refugees and key partners. The project now includes 24 universities and has welcomed around 70 students in three years.

Emergency Transit Mechanisms (ETMs) provided a life-saving solution, with 533 people of concern in Libya departing for Niger, Romania and Rwanda. A persistent challenge was the slow processing and lack of departures from the ETMs in Niger and Rwanda to the main resettlement countries, preventing additional evacuation flights from Libya taking place.

Challenges and unmet needs

The 2020 target of 70,000 refugees resettled in 31 countries was not met due to a shortfall in resettlement quotas, exacerbated by COVID-19, which led to the suspension of most departures from March to June 2020 with only slow and partial re-openings subsequently. Travel restrictions also significantly affected complementary pathways. The pandemic prompted embassies to suspend visa services, appointments and new applications, which particularly affected refugees with family reunification applications, while UNHCR strove to coordinate with its partners to keep the resettlement programme running and ensure protection for those most at risk. UNHCR also encouraged States to be flexible and innovative with interviews and visa processing in resettlement and complementary pathways, including family reunification.

The Refugee Steering Group was convened in January 2020 with representatives from national, regional and global refugee-led networks that contributed to the Global Refugee Forum. It plays an important advisory role in planning the Annual Tripartite Consultations on Resettlement, coordinating refugee participation and creating spaces for discussions on matters of concern.

As a result of the pandemic, admissions under complementary pathways in 2020 were limited. The economic slowdown in many parts of the world affected labour mobility opportunities and many scholarship programmes for refugees have been temporarily halted. While data in these areas will be provided by the States later in 2021, the evidence from partners already suggested that the goal of 140,000 complementary pathways admissions in 2020 was not achieved.

Operational highlights

To address COVID-related challenges, many operations reconfigured their resettlement processing, using remote interviews and adapting the working environment.

In Italy, 2020 saw an expansion of the University Corridors for Refugees (UNICORE) project, which brings refugees residing in 25 countries and Brazil to nationals of Ethiopia to study in Italy. UNICORE was set up in 2019 by Italian universities with the support of UNHCR, the Italian Ministry of Foreign Affairs and International Cooperation, and key partners. The project now includes 24 universities and has welcomed around 70 students in three years.

Emergency Transit Mechanisms (ETMs) provided a life-saving solution, with 533 people of concern in Libya departing for Niger, Romania and Rwanda. A persistent challenge was the slow processing and lack of departures from the ETMs in Niger and Rwanda to the main resettlement countries, preventing additional evacuation flights from Libya taking place.

Challenges and unmet needs

The 2020 target of 70,000 refugees resettled in 31 countries was not met due to a shortfall in resettlement quotas, exacerbated by COVID-19, which led to the suspension of most departures from March to June 2020 with only slow and partial re-openings subsequently. UNHCR also encouraged States to be flexible and innovative with interviews and visa processing in resettlement and complementary pathways, including family reunification.
Local integration and other local solutions

Young Iraqi refugee Ali exchanges cultural and culinary experiences with his Belgian “buddy” Ignace, in Ghent, Belgium.

Results and achievements

Local integration of refugees is a complex and gradual process that involves refugees establishing themselves and integrating into the community in a country of asylum. During the Global Refugee Forum (GRF), several countries and other entities pledged to advance and promote local integration and other local solutions, such as permitting long-term legal stay and naturalization, including refugees in labour markets and education programmes, and promoting social cohesion. However, in 2020 the pandemic became the overriding challenge.

In Chad, the out-of-camp approach was maintained and strengthened, namely by integrating all potential newly arriving refugees into host villages, with the ultimate goal of transforming 30% of refugee camps into villages by 2024 to allow for more inclusive socioeconomic integration.

Advances in the legal integration of refugees included the Democratic Republic of the Congo’s commitment at the GRF to offer 10-year residence permits to the 200,000 Rwandan refugees who have opted to stay there after the termination of their status clause. In preparation, 75,000 Rwandans were verified.

As a result of UNHCR’s advocacy, Liberia committed to provide land for agriculture and permanent housing to 5,000 locally integrated Ivorian refugees, in line with its local integration strategy.

Challenges and unmet needs

The COVID-19 pandemic hampered plans and initiatives as priorities shifted. With stretched resources, further advancement of socioeconomic inclusion and legal local integration was challenging.

In some situations, policy and legal restrictions prevented legal local integration from going ahead. The pandemic significantly affected the number of advocacy events. More investment was required to enable UNHCR to advocate with governments and popularize the arguments in favour of the local integration of refugees.

UNHCR engages in campaigns and events that are endorsed by faith-based organizations, backed by followings of the #WithRefugees coalition were reached by a designer and refugee a designer and refugee. On WRD, the WRD theme, “Every action counts, everyone can make a difference”, served as a call for equality. Videos and stories featured refugees fighting the pandemic and the organization’s determination to stay the course despite the added burden of COVID-19. Most events were held virtually and many were highlighted, including those held by partners, on UNHCR’s Global Website. Inspired by the battle against COVID-19 and worldwide demonstrations for racial justice, UNHCR’s World Refugee Day (WRD) theme, “Every action counts, everyone can make a difference”, served as a call for equality. Videos and stories featured refugees fighting the pandemic and the organization’s determination to stay the course despite the added burden of COVID-19. Most events were held virtually and many were highlighted, including those held by partners, on UNHCR’s Global Website. On WRD, the #WithRefugees coalition—backed by faith-based organizations, businesses, universities, NGOs, private sector partners and over 200 cities—sent a message of inclusion with a positive narrative about refugees in communities, helping UNHCR mobilize new audiences. Faith-based members acknowledged their special responsibility to tackle xenophobia. More than 800 people registered for a joint UNHCR-Council of Europe webinar marking WRD, “Creating inclusive cities: everyone can make a difference”. The #IBelong campaign to end statelessness highlighted legislative breakthroughs by Côte d’Ivoire, the Dominican Republic, the Islamic Republic of Iran, Kenya, North Macedonia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan and other States. Goodwill Ambassador Côte d’Ivoire’s #WithRefugees video proved one of the campaign’s most successful products ever. The campaign highlighted how people without a legal identity were at extra risk in the pandemic and needed to be included in national COVID-19 responses. UNHCR’s highly committed group of Goodwill Ambassadors, high profile supporters and digital influencers, with extensive audience reach despite COVID-19, created opportunities for advocacy and fundraising partnerships and brought authentic refugee voices and emergency appeals directly to the public. Their support for key UNHCR priorities included COVID-19 messages, emergency appeals and virtual participation in World Refugee Day, the #IBelong campaign and the first ever online Nansen ceremony. Goodwill Ambassadors led virtual discussions, e-gaming tournaments, poetry crowdsourcing, art contests, online concerts, music videos, comedy events and more. Some of UNHCR’s most in-demand Goodwill Ambassadors include refugees whose lived experience brings power and authenticity to their advocacy. Together with high profile supporters, they helped raise millions of dollars and generated thousands of news items. Their reach of more than 177 million followers brought UNHCR record social media engagement.
ANNEXES

MEMBERS OF UNHCR’s EXECUTIVE COMMITTEE AND STATES PARTIES TO THE REFUGEE AND STATELESSNESS CONVENTIONS

UNHCR is governed by the United Nations General Assembly and the Economic and Social Council (ECOSOC). In 1958, ECOSOC established the Executive Committee of the High Commissioner’s Programme (ExCom), pursuant to a resolution of the General Assembly. Its main tasks are to approve the High Commissioner’s programmes, advise the High Commissioner in the exercise of his functions (mainly on protection issues), and oversee the Office’s finances and administration.

ExCom holds an annual session in Geneva every October. The 77th session took place from 5 to 9 October 2020. Meetings of the Executive Committee’s Standing Committee are held at various dates throughout the year to carry on the work between plenary sessions.

ExCom membership is on the widest possible geographical basis from States (Members of the United Nations) with a demonstrated interest in, and devotion to, the solution of refugee problems. By the end of 2020, there were 106 ExCom members in the following table—in blue—which also shows the States parties to the 1951 Convention relating to the Status of Refugees and its Protocol of 1967 and to the 1954 Convention relating to the Status of Stateless Persons and the 1961 Convention on the Reduction of Statelessness.
